

Builder's Bulletin

Effective on permits issued on or after July 1, 2006

Reference:

Ordinance No. 2005-17, Section 15.24.050 Gas Piping for CNG vehicles.

"All newly constructed privately owned residential garages shall have a gas line and electrical outlet installed to a point along the garage wall that is near the vehicles fuel opening so that compressed natural gas fueling of a vehicle could occur in the future without obstruction."

The gas service line shall be a minimum of 1/2" NPT and the electrical outlet shall be a **dedicated** 120VAC, 15 amp GFCI protected outlet. Gas line and electrical outlet to be installed a minimum of 24 inches above finished floor and within 36 inches horizontally from each other.
