**Re: Phase I Environmental Site Assessment Report
Majestic Chino Flight
SEC of Flight Avenue and Remington Avenue
Chino, California 91710
Nova Project No.: V21-2923**

Nova Group, GBC (Nova) has performed a Phase I Environmental Site Assessment (ESA) of the above referenced property in accordance with ASTM E 1527-13 and Majestic Realty Co ESA scope of work. Please find a copy of the report enclosed.

We declare that to the best of our knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR and, we have the specific qualifications based on education, training, and experience to assess the Property, as described herein. We have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR, Part 312.

We certify that we have no undisclosed interest in the Property, and that our employment and compensation are not contingent upon our findings and opinions. The scope of this assessment, methodology, limiting conditions, and reliance language are outlined within this report.

Respectfully submitted,

Nova Group, GBC

EXECUTIVE SUMMARY

Nova Group, GBC (Nova) was authorized by Majestic Realty Co, to conduct a Phase I Environmental Site Assessment (ESA) of the Majestic Chino Flight property located at SEC of Flight Avenue and Remington Avenue, Chino, California ("the Property"). Nova has conducted this ESA in accordance with the scope and limitations of ASTM E1527-13, "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process."

The Property is comprised of six contiguous tracts of irregular-shaped land that is approximately 42.77 acres in size. The Property is developed with two buildings that have been partially demolished and as well as scattered concrete water and feed troughs. Original dates of construction were not available; however, based on a review of historical information, the Property appears to have been developed between 1959 and 1966. Currently, the Property is no longer in use.

Findings and Opinions

Nova has performed a Phase I ESA in conformance with the scope and limitations of ASTM E1527-13 of the Majestic Chino Flight property located at SEC of Flight Avenue and Remington Avenue, Chino, California. Any exceptions to or deletions from this practice are described in the Introduction Section of this report. Evidence of recognized environmental conditions (RECs), historical recognized environmental conditions (HRECs), controlled recognized environmental conditions (CRECs) or other environmental issues in connection with the Property or off-Property facilities, if any, are detailed within the table below.

Finding(s)	Opinion(s)
RECs - On Property	
Imported fill covering an area of approximately one acre was observed on the southeast portion of the Property and based on historical aerial photographs was deposited between 2012 and 2018. PVC piping was observed as well a municipal waste partially buried within the fill material. No documentation of the origin of the fill material was provided.	Based on the absence of information regarding the source, the imported fill material is considered a REC to the Property and further investigation is recommended.
Property - CRECs	
None	None
Property - HRECs	
None	None
RECs/CRECs/HRECs Originating from an Off-Property Facility	
None	None
De Minimis Environmental Conditions	
None	None

Non-Scope Considerations (NSCs)/Business Environmental Risks (BERs)

Environmental issues with regard to NSCs and/or BERs, if any, identified in connection with the Property at the time of the Property assessment are detailed below.

Finding	Recommendation
A large amount of agricultural and domestic dumping was observed along the eastern boundary. No labeling or indication of hazardous materials use or disposal/abandonment was observed.	These materials should be disposed of in accordance with applicable local and state regulations.
Due to the age of the estimated initial development of the Property structures, septic systems maybe present.	Should a septic system be encountered during development activities, it should be properly removed in accordance with applicable local and state regulations.
A well in a tin shed is present at the Property, centrally near the southern boundary. The well appears to no longer in service and reportedly was part of a water system for the dairy cows historically present. No records or data was available regarding this feature. No industrial operations, nearby hazardous materials handling or releases are were observed or reported.	Should the on-site water well not be needed in the future, it should be properly plugged and abandoned in accordance with applicable local and state regulations.
Based on the age of the remaining Property improvements, there is a potential for asbestos containing materials (ACM) to exist.	Prior to performing any demolition activities, a asbestos survey should be conducted.

1.0 INTRODUCTION

Nova was authorized by Majestic Realty Co. to conduct a Phase I Environmental Site Assessment (ESA) of Majestic Chino Flight located at SEC of Flight Avenue and Remington Avenue, Chino, California ("the Property"). Nova has conducted this ESA in accordance with the scope and limitations of American Society for Testing and Materials (ASTM) Designation E1527-13, "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process." There are no exceptions to, or deletions from, the ASTM E1527-13 or the Majestic Realty Co ("User") authorized Scope of Services, unless otherwise stated herein.

On April 23, 2021, Conrad Van Dyke, representing Nova, conducted a Property reconnaissance to assess the possible presence of recognized environmental conditions (RECs) and non-ASTM environmental issues, as prescribed by the scope of work, at the Property. Nova's assessment included review of ASTM-defined sources of historical information, reconnaissance of adjoining properties, background research, and review of available local, state, and federal regulatory records.

Nova contracted Environmental Risk Information Services (ERIS), to perform a computer database search for local, state, and federal regulatory records pertaining to environmental concerns for the Property and facilities in the vicinity of the Property.

1.1 Purpose

The purpose of this Phase I ESA is to identify RECs in connection with the Property. As defined by ASTM E1527-13, a REC is the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment, and includes Controlled Recognized Environmental Conditions (CRECs). A CREC is a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a No Further Action (NFA) letter or equivalent, or meeting risk-based criteria established by the regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, Activity and Use Limitations [AULs], Institutional Controls [ICs], or Engineering Controls [ECs]). This Phase I ESA may also identify Historical Recognized Environmental Conditions (HRECs). A HREC is a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

De minimis conditions, which are not considered RECs, generally do not present a threat to human health or the environment and generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

1.2 Scope of Services

Nova's Scope of Services for this Phase I ESA conforms with the due diligence standards detailed in ASTM E1527-13 and Majestic Realty Co Phase I ESA Scope of Work requirements. Services provided for this project included:

- ▶ A records review of standard federal, state, tribal and local record sources, as well as physical setting sources;
- ▶ A review of standard historical resources regarding historical land use activities at the Property;
- ▶ Interviews with people that have knowledge regarding the past or present uses of the Property, including present and past owners, operators, and occupants of the Property, as well as with local government officials, where feasible;
- ▶ A reconnaissance of the Property to visually and physically observe the Property for evidence of RECs; and
- ▶ Review of previous environmental reports, if available.

Copies of resumes of Nova's Environmental Professionals who prepared this report are included in the Appendix.

Nova investigated the Property for certain Non-Scope Considerations (NSCs) and/or Business Environmental Risks (BERs) that are not considered in the CERCLA definition of hazardous substances (42 USC § 9601.14) nor specifically required per ASTM E1527-13. A summary of NSC assessment is found within the NSCs/BERs section of this report. This assessment did not include sampling or testing of materials (i.e., building, radon, soil, water, or air quality). This assessment included an evaluation for a potential vapor intrusion or encroachment condition to exist at the Property.

1.3 Significant Assumptions

There is a possibility that even with the proper application of these methodologies there may exist on the Property conditions that could not be identified within the scope of the assessment or which were not reasonably identifiable from the available information. Nova believes that the information obtained from the record review and the interviews concerning the Property is reliable. However, Nova cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete.

1.4 Limitations and Exceptions

The findings and conclusions contain all of the limitations inherent in these methodologies that are referred to in the ASTM E1527-13. Nova was not requested to limit or deviate from the ASTM E1527-13 during the conduct of this assessment. The following limiting condition(s), deletion(s), deviation(s), and/or data failure(s)/data gap(s) as listed, if any, are not critical and do not alter the conclusions or recommendations of this assessment unless otherwise stated.

1.4.1 Limiting Conditions

Limiting Conditions include physical obstructions such as adjacent buildings, bodies of water, asphalt/concrete, or other paved surface areas, as well as other physical constraints including rain or snow, observed at the time of the assessment.

- No significant inaccessible areas, limitations or physical obstructions/constraints were encountered during the Property reconnaissance.

1.4.2 Data Gaps

A data gap, as defined in ASTM E1527-13, is the *“lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information.”*

- Data gaps in excess of the recommended five-year interval were encountered. However, based on the available information reviewed, this data failure is not considered to be a significant data gap and is not expected to alter the conclusions or recommendations of this assessment.
- The absence of earlier published historical information prior to 1935 constitutes a historical data failure as defined by ASTM E 1527-13 given that the Property was still developed as agricultural land at that time. Review of additional historical sources outlined in ASTM E 1527-13 would not likely provide additional useful information regarding the past use of the Property based on the established pattern of agricultural land use.
- Nova encountered a data gap by not interviewing current or past Property owners, or adjoining property owners, as none were available for comment, did not respond to requests to information, or did not exist. However, based on our review of the available municipal, regulatory, and historical information, the absence of information obtained from interviews with these individuals is not considered significant to the findings, conclusions, or recommendations of this assessment.
- The Environmental Health and Building Departments were unresponsive to information requests. Based on our review of the available municipal, regulatory, and historical information, the absence of information obtained from interviews with referenced agencies is not considered significant to the findings, conclusions, or recommendations of this assessment. Should information be received from referenced agencies that alters the findings of this ESA, an addendum to this report will be provided under separate cover.

1.5 Special Terms and Conditions

Authorization to perform this work was given by a directive from Majestic Realty Co.

The conclusions and findings set forth in this report are strictly limited in time and scope to the date of the evaluations. The conclusions presented in the report are based solely on the services described therein, and not on scientific tasks or procedures beyond the scope of agreed-upon services or the time and budgeting restraints imposed by the Client. No subsurface exploratory drilling or sampling was done under the scope of this work. Unless specifically stated otherwise in the report, no chemical analyses have been performed during the course of this ESA.

Some of the information provided in this report is based upon personal interviews, and research of available documents, records, and maps held by the appropriate government and private agencies. This is subject to the limitations of historical documentation, availability, and accuracy of pertinent records, and the personal recollections of those persons contacted.

The content and conclusions provided by Nova in this report are based solely on the information collected during our investigation and activities at the Property, our present understanding of the Property conditions, and our professional judgment in light of such information at the time this report was prepared. Part of the findings in this investigation is based on data provided by others. This report presents Nova's professional opinion, and no warranty, expressed or implied, is made.

1.6 User Reliance

Nova acknowledges and agrees that the report may be relied upon by Majestic Realty Co. This report has no other purpose and may not be relied upon by any other person or entity without the written consent of Nova. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with Nova granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against Nova, its officers, employees, vendors, successors or assigns. Reliance is provided in accordance with Nova's Proposal and General Conditions executed by Majestic Realty Co on April 9, 2021.

2.0 PROPERTY DESCRIPTION

2.1 User Provided Information

Pursuant to ASTM E1527-13, Nova requested the following Property information from the User of this report and from the Key Site Manager (KSM). Information provided by the User (if any) or the KSM is included in various sections of this report.

User Provided Information		
Item	Not Provided by User	Provided by User
Environmental Pre-survey Questionnaire	✓	
Title Records	✓	
Environmental Cleanup Liens or AULs (40 CFR 312.25 and 40 CFR 312.26(a)(1)(v) and vi))	✓	
Specialized Knowledge (40 CFR 312.28)	✓	
Valuation Reduction for Environmental Issues (40 CFR 312.29)	✓	
Identification of Key Site Manager		✓
Reason for Performing Phase I ESA		✓
Prior Environmental Reports	✓	
Other	✓	

2.2 Location and Legal Description

According to the San Bernardino County Assessor/Tax information, the Property is comprised of six contiguous tracts of irregular-shaped land. A topographic map, as well as figures, are included in the Appendices. A summary of Property details is provided below.

Location and Legal Description	
Property Location	SEC of Flight Avenue and Remington Avenue, Chino, San Bernardino County, California 91710
APN(s)	105507102, 105507101, 105506102, 105506101, 105505101 and 105505102
Historical/Listed Property Address(es)	N/A
Acreage	42.77
Abbreviated Legal Description	Not available via publicly ascertainable resources.
Current Owner / Date of Acquisition	Nova was unable to ascertain the ownership or the most recent date of acquisition via review of publicly ascertainable resources. According to information provided by the Client via email, the Property owner is San Bernardino County.
Survey Map / Alta Survey	A survey/plat map depicting current and/or future Property features/development was not provided.

2.3 Property and Vicinity General Characteristics

Nearby land use in the vicinity of the Property, as well as the general setting of the Property, is described below.

Property and Vicinity General Characteristics	
General Surrounding Area Use	Combined mixed use commercial / industrial.
Zoning Information	LI - Light Industrial Land Use District
On-Property Parking Facilities	Neither surface parking or parking facilities are currently present within the limits of the Property.
Public Thoroughfares/Roads	Property: N/A North: Remington Avenue East: N/A South: N/A West: Flight Avenue
Landscaping	The Property is mostly undeveloped land covered by natural vegetation.
Geologic and Hydrogeologic Conditions	No apparent routes of direct discharge that have the potential of facilitating the migration of hazardous substances or petroleum products that are likely to migrate to or from the Property, or from nearby/adjoining property were observed. Water bodies were not observed within the limits of the Property and/or in close proximity.

2.4 Current Property Use

Based on current assessment efforts, the Property is currently unoccupied and developed with two buildings that have been partially demolished and as well as scattered concrete water and feed troughs.

2.5 Description of Property Improvements

The following table summarizes Property improvements based on interview information and review of publicly ascertainable sources, as well as observations made during the reconnaissance of the Property. Interior finishes of the Property building(s), if any, and information regarding extensive renovations, as applicable, are detailed within the Property Reconnaissance section.

Summary of Property Improvements							
Building Name	No. of Stories	Sub-Levels	Apprx. Square Feet	Construction Date	Foundation	Exterior	Roof
Former Home	N/A	None	Unknown	Early 1960s	Reinforced Concrete	N/A	N/A
Former Dairy	N/A	None	Unknown	Early 1960s	Reinforced Concrete	N/A	N/A

2.5.1 Services and Utilities

The following municipal services and utilities are provided to the Property and/or the surrounding area.

Utilities	
Item	Description
Potable Water Supply	Provided and maintained by the Chino municipal service district.
Sewage Disposal System	Provided and maintained by the Chino municipal service district. Indication of a septic system or cesspool was not observed at the Property during the reconnaissance and/or review of publicly available resources.
Storm Water	Direct percolation to the ground.
Electricity / Natural Gas	Southern California Edison / Southern California Gas Company
Heating/Cooling Systems	No active heating or cooling systems are present at the Property.

2.6 Current Use of Adjoining Property

During the vicinity reconnaissance, Nova observed the following land use on properties in the immediate vicinity of the Property.

Current Use of Adjoining Properties	
North	UMA Warehouse (15207 Flight Avenue) and Caleres Inc Distribution Center (15245 Van Vliet)
East	A former dairy under the process of demolition (8819 Remington Avenue)
South	Dowell Holding (15578 Hellman Avenue) and Best Buy RLC (8646 Enterprise Way)
West	Flight Avenue with undeveloped land beyond.

Based on evaluation of current adjoining land use, the current use, treatment, storage, disposal or generation of hazardous substances or petroleum products was not observed. RECs were not identified based on the current uses of above-referenced adjoining properties.

3.0 RECORDS REVIEW

3.1 Standard Environmental Record Sources

3.1.1 State and Federal Regulatory Review

Information from standard federal, state and tribal environmental record sources was provided through ERIS. Data from governmental agency lists are updated and integrated into one database, which is updated as data is released. This integrated database also contains postal service data in order to enhance address matching. Records from one government source are compared to records from another to clarify any address ambiguities. The demographic and geographic information available provides assistance in identifying and managing risk. The accuracy of the geocoded locations is approximately +/-300 feet.

In some cases, location information supplied by the regulatory agencies is insufficient to allow the database companies to geocode facility locations. These facilities are listed under the unmappables section within the database report. Any unmappables identified in the regulatory database are discussed below in the appropriate sections.

3.1.1.1 Regulatory Database Report Summary

The following is a summary of facilities identified/present in the standard/additional database sources within the ASTM prescribed Approximate Minimum Search Distance (AMSD). Refer to the Regulatory Records Appendix for a complete listing.

Regulatory Report Summary

3.1.1.2 Property Regulatory Database Summary

Following review of standard/additional database sources, the following facilities (if any) have been identified for the Property.

Database(s)	Facility Name (address)	Discussion
San Bernardino CUPA, Delisted Haz, ICIS, FINDS/FRS, EMISSIONS	Nyenhuis Dairy (8711 Remington Avenue)	The Property is identified on the San Bernardino CUPA (Facility ID: FA0000588), Delisted Haz, ICIS, FINDS/FRS (ID: 110024270322) and EMISSIONS databases for reportable air emissions. No violation suggesting a release of hazardous materials is associated with these listings.
RCRA-NonGen, FINDS/FRS	County of San Bernardino (8711 Remington Avenue)	The Property is identified on the RCRA-NonGen and FINDS/FRS databases. As of Jan 2021, there are no Compliance Monitoring and Enforcement (violations) records associated with this facility (EPA ID CAC002990655). No violation suggesting a release of hazardous materials is associated with these listings.

Based on regulatory status, above-referenced regulatory database listings are not considered to be a REC for the Property. Copies of the available FIND/FRS records are appended.

3.1.1.3 Adjacent/Adjoining Regulatory Listings

The following table summarizes facilities located on adjoining property or facilities that have been determined to have the potential to impact the Property.

Database	Facility Name (address)	Distance/Location	Topo. Position	Discussion
HHSS, UST Sweeps, Delisted UST, HIST Tank, San Bernardino CUPA	Vander Schaaf Farms / AG Vander Schaaf Farms / Lauren Duhalde Dairy #2 (8819 Remington Avenue)	Adjoining east	Cross-gradient	The UST (ID A36-000-35478) to the east of the Property is currently identified as being under the jurisdiction of the San Bernardino Health Department and was delisted in January of 2017.

Database	Facility Name (address)	Distance/Location	Topo. Position	Discussion
PFAS GW (x2)	Unaddressed	Adjoining north	Cross-gradient	Two sampling wells that tested for Perfluorooctanoic Acid (PFOA) and Perfluorooctanesulfonate (PFOS) are on adjoining land to the north of Property beyond Remington Avenue. EPA safe benchmarks for PFOA and PFOS are 70 parts per trillion (ppt). The State of California's Water Resource Control Board (WRCB) maintain a standard of 6.5 ppt for PFOS and 5.1 ppt for PFOA. Results for PFOA ranged from 2 to 3.2, below action levels. Further, additional compounds tested for include Perfluorohexane sulfonic acid (PFHxS), perfluorobutane sulfonic acid (PFBS), perfluorohexanoic acid (PFHxA), perfluoroheptanoic acid (PFHpA), perfluorononanoic acid (PFNA), perfluorodecanoic acid (PFDA) and 4,8-dioxia-3H-perfluorononanoic acid (ADONA) currently do not have analytical benchmarks established by the US EPA or the WRCB. All of the above acids are constituents of concern if groundwater is to be consumed by humans.

Based on absence of groundwater use, regulatory status, relative distance from the Property or topographic considerations, above-referenced facilities are not considered RECs in connection with the Property.

3.1.1.4 Surrounding Area Regulatory Listings With a Potential to Impact the Property

The following table summarizes facilities located beyond adjoining land or facilities that have been determined to have the potential to impact the Property. Additional facilities listed within the prescribed AMSD that have been determined not to be pertinent (i.e. regulatory status, distance or topographic considerations) to this assessment are detailed within the regulatory database report included in the Appendix.

Database	Facility Name (address)	Distance/Location	Topo. Position	Discussion
SEMS, CERCLIS	Chino Airport Radium Dials (7000 Merrill Avenue, Hangar A)	500+ feet west across Flight Avenue	Down-gradient	The facility is identified as being 494 feet west of the Property; however, this distance represents the western edge of the airport complex where this facility located. The nearest developed point of the airport complex is at least 4,700 feet from the Property's nearest boundary.
SEMS, CERCLIS	Chino Airport Napalm Waste (7000 Merrill Avenue)	500+ feet west across Flight Avenue	Down-gradient	The facility is identified as being 494 feet west of the Property; however, this distance represents the western edge of the airport complex where this facility located. The nearest developed point of the airport complex is at least 4,700 feet from the Property's nearest boundary.

Database	Facility Name (address)	Distance/Location	Topo. Position	Discussion
RCRA-TSD	Dubois Aviation Inc. (7000 Merrill Avenue, Building B-110)	500+ feet west across Flight Avenue	Down-gradient	The facility is identified as being 494 feet west of the Property; however, this distance represents the western edge of the airport complex where this facility located. The nearest developed point of the airport complex is at least 4,700 feet from the Property's nearest boundary.
RCRA-TSD	Concrete Motor Sports LLC (7000 Merrill Avenue Building B210D)	500+ feet west across Flight Avenue	Down-gradient	The facility is identified as being 494 feet west of the Property; however, this distance represents the western edge of the airport complex where this facility located. The nearest developed point of the airport complex is at least 4,700 feet from the Property's nearest boundary.
RCRA-TSD	Inland Valley Aviation Inc. (7000 Merrill Avenue Building A-335)	500+ feet west across Flight Avenue	Down-gradient	The facility is identified as being 494 feet west of the Property; however, this distance represents the western edge of the airport complex where this facility located. The nearest developed point of the airport complex is at least 4,700 feet from the Property's nearest boundary.
State-equivalent CERCLIS (Cleanup Sites), CDO?CAO	Chino Airport (7000 Merrill Avenue)	500+ feet west across Flight Avenue	Down-gradient	The facility is identified as being 494 feet west of the Property; however, this distance represents the western edge of the airport complex where this facility located. The nearest developed point of the airport complex is at least 4,700 feet from the Property's nearest boundary.

Based on regulatory status, relative distance from the Property or topographic considerations, above-referenced facilities are not considered RECs in connection with the Property.

3.1.2 Vapor Migration

During Nova's Property observations, review of historical sources, and review of regulatory databases, no current or historical usage of chemicals of concern at the Property or reported release or other indication of subsurface contamination from a Property source was evident. Additionally, no release or material threat of a release to the subsurface from an off-Property source was identified. As such, a vapor migration concern was not identified for the Property during the course of this assessment.

3.1.3 Regulatory Agency File and Records Review

Regulatory agency files obtained for purposes of this assessment and if deemed necessary to determine RECs, HRECs, CRECs or a *de minimis* condition in connection with the Property, are summarized in the State and Federal Regulatory Review section. Given that the Property, as well as adjoining or nearby property were not listed with an active/open release in the regulatory database report reviewed for this assessment, no additional file reviews were warranted at the time of this assessment.

3.1.4 Activity Use Limitations (AULs) and Environmental Liens (ELs)

Inquiry related to AULs and ELs were included on the Pre-Survey Questionnaire provided to the KSM during the preparation of this ESA.

No reference to AUL or EL were included in the written or verbal responses to Nova during the preparation of this ESA. In addition, ELs, deed restrictions or AULs were not reported/indicated within San Bernardino County Assessor/Tax information.

3.1.5 Interviews with State/Local Government Officials

The following agencies, as indicated, were contacted to obtain information regarding the presence of USTs, the use or storage of hazardous materials/petroleum products, current violations, emergency response actions or any documentation relative to environmental matters at the Property. Correspondence records, if any, are provided in the Appendix and specific information regarding individuals/agencies contacted is summarized in the interview section of this report. Should information be received from agencies that were unresponsive to information requests within the time frame of this report, if any, that alters the conclusions of this report an addendum will be forwarded to the Client.

Local/Regional Agency	Contacted	Comment
Fire Department	Yes	No records were found for the Property parcels.
Health or Environmental Department	Yes	Parcel searches were not possible through the County.
Building or Planning Department	Yes	Parcel searches were not possible through the City
Local/Regional Water Quality Agency	Yes	Available records are discussed in Section 3.1.

3.2 Physical Setting Sources

3.2.1 Topography

The United States Geological Survey (USGS), Corona North, California Quadrangle 7.5-minute series topographic map was reviewed for this ESA and is summarized below.

Physiography	
Topographic Property Elevation	640 feet above mean sea level.
Topographic Considerations	Gently sloped / Slopes downward toward the northwest.
Other Significant Surface Features	Surface waters/water bodies, production wells or other significant surface features are not depicted.

3.2.2 Soils / Geology

Soil and geologic information was obtained based on review of published information as detailed within the Reference section of this report.

Soils / Geology	
Surface Soils	
Soil Name	Hilmar loamy fine sand
Description	Hilmar loamy fine sand is derived from alluvium derived from granite. Hilmar loamy fine sand is described as having a surface layer of loamy fine sand underlain by stratified layers of loamy sand and loam to a depth of at least 23 to 60 inches. Hilmar loamy fine sand is reportedly somewhat poorly drained, has a moderate water storage capacity and is not considered a hydric soil.
Geologic Formation	
Formation Name	Pacific Border physiographic province
Description	Information concerning the geology of the Property was obtained from the USGS Ground Water Atlas of the United States, California region (1995). The Property is located within the Pacific Border physiographic province, which is characterized by steep rolling hills and mountains and consists of severely folded, faulted, commonly metamorphosed marine and continental sediments. Depth to bedrock is expected to be over 100 feet.

3.2.3 Hydrology

The following information was obtained based on review of published information as detailed within the Reference section of this report.

Hydrology	
Primary Aquifer	Valley Region Groundwater Basin
Aquifer Description	Unconfined aquifer
Depth to Groundwater	Approximately 200 feet below the ground surface.
On-Property Water Bodies	Settling ponds, lagoons, surface impoundments, or natural catch basins were not observed at the Property during this investigation.
Closest off-Property Water Body	Santa Ana River located approximately 3.5 miles southeast of the Property.
Shallow Groundwater Flow Direction	Nova considered the topographic gradient of the general Property area and inferred that the most likely hydrogeologic gradient would be to the northwest.
Sole Source Aquifer	The Property does not overlie a sole source aquifer.

3.2.4 Other Physical Settings Sources

Other Physical Setting Sources	
Flood Information	
Flood Zone, Panel Number and Date	Zone X (shaded and unshaded) according to Panel Number 06071C9375H, dated August 28, 2008.
Flood Zone Description	Moderate risk areas within the 0.2-percent-annual-chance floodplain, areas of 1-percent-annual-chance flooding where average depths are less than 1 foot, areas of 1-percent-annual-chance flooding where the contributing drainage area is less than 1 square mile, and areas protected from the 1-percent-annual-chance flood by a levee. No Base Flood Elevations (BFEs) or base flood depths are shown within these zones.
Distance to Closest Flood Hazard	Approximately 0.5 mile to the east.
Oil and Gas Exploration (current or historical)	
Oil or Gas Wells	Historical/current oil or gas exploration was not identified within the Property limits or within immediately surrounding properties.
Pipelines	Pipelines were not identified within the Property limits or within immediately surrounding properties.

Other Physical Setting Sources	
Wetlands	
Wetland Areas	According to the US Fish and Wildlife Service Wetlands Mapper, the Property or nearby land is not located in a wetland area. In addition, evidence of suspect wetlands was not observed at the time of the assessment.
Well Records	
Well Log Records / Well Mapping Program	No water wells and/or groundwater monitor wells were recorded on file for the Property and/or adjoining/nearby land.

3.3 Historical Use Information

The purposes of obtaining and reviewing "historical sources is to develop a history of the previous uses of the property and surrounding area, in order to help identify the likelihood of past uses having led to RECs in connection with the property." Nova attempted to research all obvious Property use from the present, back to the Property's first developed use; or back to 1940, whichever is earlier. Copies of below pertinent sources reviewed, such that establish Property uses or changes in use, are included in the Appendix of this report.

Historical Sources		
Historical Resource	Checked if Reviewed	Years Reviewed
Aerials	✓	1935, 1938, 1939, 1948, 1952, 1959, 1966, 1973, 1975, 1980, 1985, 1994, 2002, 2005, 2010, 2012, 2018, 2020
Fire Insurance Maps	✓	The Property and surrounding area is not mapped.
Topographic Maps	✓	1942, 1954, 1967, 1973, 1975, 1981, 2017
Local City Directories	✓	1971, 1972, 1975, 1979, 1985, 1988, 1990-91, 1994-95, 2001, 2006, 2009, 2013, 2018
Tax Files	✓	2021
Recorded Land Title Records		Not reasonably ascertainable or considered to be useful.
Building Department Records		Not reasonably ascertainable or considered to be useful.
Zoning/Land Use Records	✓	2021
Other Historical Sources		Not reasonably ascertainable or considered to be useful.

3.3.1 Summary of Historical Property Uses

The following is a summary of historical Property use based on review of available historical resources.

Property	
Time Period	Historical Summary
1935-1959	Land is undeveloped and appears to be engaged in either, orchards, field crop agriculture or being used as grazing land.
1966-2018	The Property has been partially developed with a dairy facility and residential home.
2012-2018	Imported fill material was brought into the northeastern corner of the Property.
2018-present	San Bernardino County reportedly took possession of the Property and the existing improvements were partially demolished.

Based on review of the information discussed above, the historical research has not identified prior uses that are expected to have resulted in a REC in connection with the Property. The imported fill material is further discussed in Section 4.16.

3.3.2 Summary of Historical Adjoining/Adjacent Property Uses

The following are summaries of each adjoining property based on review of available historical resources.

Adjoining/Adjacent Property	
Time Period	Historical Summary
North	
1935-1994	Land appears to be engaged in field crop agriculture or is being used as grazing land.
2002-2012	Land, centrally along the northern boundary of the Property has been developed with a single small structure.
2018-present	Land has been developed for use by large warehouse-style commercial buildings.
East	
1935-1952	Land is cleared and appears to be engaged in field crop agriculture or is being used as grazing land.
1959-1966	Land is now occupied by a single residential home.
1973-2018	Land appears to have been engaged in dairy operations.
2018-present	Land to the east was reportedly taken possession of by San Bernardino County.
South	
1935-1569	Land appears to be predominately engaged in orchard agriculture.
1966	Land is no longer occupied by orchards and has been partially developed with rural homes and what appears to be several livestock breeding pens.
1973-2012	Land has been progressively developed with what appears to be a dairy farm and feedlots.
2018-present	Land has been fully redeveloped with several large warehouse style buildings.
West	
1935-1994	Land is undeveloped field crop or grazing land.
2002-present	Land has been developed with a small structure, but otherwise appears similar to earlier historical sources.

Based on the information discussed above, the historical research has not identified prior adjacent/adjoining property uses such that are expected to have resulted in REC in connection with the Property.

3.3.3 Additional Environmental Record Sources

Although requested, no previously prepared environmental reports such as Phase I or II ESAs, lead-based paint surveys, lead-in-water surveys, asbestos surveys, or geotechnical reports were provided for Nova's review.

4.0 PROPERTY RECONNAISSANCE

Nova conducted a reconnaissance visit to the Property on April 23, 2021. The Property visit was performed by Conrad Van Dyke, Nova Field Manager. Nova was provided with an escort with keys for access, but no Key Site Manager (KSM) was available for interview. The escort had no meaningful knowledge or history regarding the Property.

The following table summarizes current Property operations observed at the time of the assessment. Specific information/details regarding such features (if any) are discussed in detail below.

	Checked if Present/Observed
Interior and Exterior Observations	
Hazardous Substances and Petroleum Products	
Hazardous Substance and Petroleum Products Containers (Not Necessarily in Connection With Identified Uses)	
Drums	✓
Unidentified Substance Containers	
Storage Tanks	
Odors	
Pools of Liquid	
PCBs (electrical or hydraulic equipment)	✓
Past Use(s) of the Property	
Additional Observations	✓
Exterior Observations	
Evidence of a Release (i.e. stained soil/pavement or stressed vegetation)	
Solid Waste	
Pits, Ponds, or Lagoons	
Wastewater	
Wells	✓
Septic Systems (current or historical)	✓
Landfills / Fill of Unknown Origin	✓
Interior Observations	
Stains or Corrosion	
Drains, Sumps and/or Catch Basins	

4.1 Hazardous Substances / Petroleum Products

4.1.1 Storage

Evidence of hazardous substances and/or petroleum products, within containers of five-gallons or more (if any), associated with current Property operations (use, treat, storage, disposal or generation) observed at the time of the assessment, if any, are detailed within the table below. Evidence of a release, if any, observed at the time of the assessment is discussed in the Evidence of a Release section.

Summary of Hazardous Substances / Petroleum Products				
Substance	Quantity / Container Description	Identified Use	Location on Property	Evidence of a Release
None	N/A	N/A	N/A	N/A

4.1.2 Management and Disposal

Information regarding management and disposal of hazardous substances and/or petroleum products is discussed in detail within the following table.

Type of Waste Generated	Management/Disposal Practices
None	N/A

4.1.3 Equipment

Operations or equipment/materials involving the use of hazardous substances or petroleum products, if any, are detailed within the following table.

Equipment Type	Description
None	N/A

Current use and likelihood of use, treatment, storage, disposal or generation of hazardous substances or petroleum products found in connection with the Property, if any, is discussed in the following sections.

4.2 Drums

Drums were observed at the time of the assessment within the limits of the Property. The drums appear to be used as part of a agricultural irrigation and/or animal watering system. No labeling was observed on the barrels suggesting hazardous historical content. It is recommended that they be property disposed.

4.3 Unidentified Substance Containers

Unidentified substance containers suspected of containing hazardous substances or petroleum products were not observed during the Property reconnaissance.

4.4 Storage Tanks

Aboveground storage tanks (ASTs) or underground storage tanks (USTs), if any, including evidence of fill pipes, fill ports, or vent pipes, observed during the Property reconnaissance or reported during interviews are summarized below.

Quantity and Capacity of ASTs/ USTs	Installation/ Removal Date	Contents	Location	Use	Secondary Containment	Evidence of a Release
Current/Active Storage Tanks						
None	N/A	N/A	N/A	N/A	N/A	N/A
Historical Storage Tanks						
None	N/A	N/A	N/A	N/A	N/A	N/A

4.5 Odors

Strong, pungent, or noxious odors were not noted at the time of the assessment or reported by Property sources.

4.6 Catch Basins, Sumps and Pools of Liquid

No evidence of on-Property sumps or catch basins was observed or reported during the Property reconnaissance. Additionally, pools of liquids/standing surface water containing liquid likely to be a hazardous substance or petroleum product were not observed at the time of the Property assessment or identified during interviews.

4.7 PCBs

Transformers and other electrical/hydraulic equipment (i.e., oil-filled switches, balers, hoists, vehicle lifts, dock levelers, hydraulic elevators, etc.) manufactured prior to 1979 could contain PCBs at a level that subjects them to regulation by the USEPA. In 1979, the USEPA issued a final rule, banning the manufacturing, processing, distribution of PCBs in commerce and use (44 Federal Register 31514). PCBs in electrical equipment are controlled by USEPA regulations 40 CFR, Part 761. The following table summarizes electrical or hydraulic equipment located within the limits of the Property (if any) that has the potential to contain PCBs.

Quantity / Type of Equipment	Installation Date	Non-PCB Labels Present	Potentially Contains PCBs	Responsible Party/ Third Party Contractor	Evidence of a Release/ Physical Damage
Four pad-mounted transformers	Unknown	No	Yes	Electric Provider	No

Given that evidence of a release was not observed at the time of the assessment associated with above-referenced equipment, as well as management by the identified responsible party, the presence of such equipment is not considered a REC in connection to the Property.

4.8 Past Use(s) of the Property

Past uses of the Property were not observed during the Property reconnaissance that was likely to have involved the use, treatment, storage, disposal, or generation of hazardous substances or petroleum products.

4.9 Additional Observations

A large amount of agricultural and domestic dumping was observed along the eastern boundary. No labeling or indication of hazardous materials use or disposal/abandonment was observed and as such these materials should be disposed of as municipal waste unless during the disposal process evidence to the contrary is discovered.

4.10 Evidence of a Release

No obvious indication of hazardous material or petroleum product or hazardous waste releases, such as stained areas or stressed vegetation, was observed during the Property reconnaissance or reported to Nova during interviews.

4.11 Solid Waste

To the extent visually and/or physically observed or identified from interviews or records review, the following is a summary of solid waste observed at the time of the assessment, if any.

Solid Waste Disposal	
None observed.	None observed.

4.12 Pits, Ponds or Lagoons

No evidence of on-Property pits, ponds, or lagoons, was observed or reported during the Property reconnaissance.

4.13 Wastewater

Property sources reported that discharge to sanitary sewer is limited to wastewater generated within the restrooms (i.e. toilets, sinks). No indication of industrial wastewater disposal or treatment systems were observed during the Property reconnaissance or reported to Nova.

Wastewater Source / Type	Description and Management/Disposal Practices
None	N/A

4.14 Wells

Wells (i.e. dry wells, irrigation wells, injection wells, abandoned wells or other wells), if any, observed during the Property reconnaissance or reported during interviews are summarized below.

Well Type/Use	Status	Installation Date	Depth	Screen Interval	Location
Irrigation Supply	Inactive / Not Plugged	Not Reported	Not Reported	Not Reported	Not Reported

A well in a tin shed is present at the Property, centrally near the southern boundary. The well appears to no longer be in service and reportedly was part of a water system for the dairy cows historically present. No records or data was available regarding this feature. No industrial operations, nearby hazardous materials handling or releases are were observed or reported. This is considered a non-scope consideration and it is recommended that the well be properly decommissioned.

4.15 Septic Systems (Current or Historical)

Indication of a Property septic system or cesspool was not observed at the Property during the reconnaissance and/or review of publicly available resources. It should be noted that due to the age of the estimated initial development of the Property structures, septic systems maybe present. If encountered during redevelopment of the Property, they should be properly decommissioned.

4.16 Landfills / Fill of Unknown Origin

Imported fill covering an area of approximately one acre was observed on the southeast portion of the Property and based on historical aerial photographs was deposited between 2012 and 2018. PVC piping was observed as well a municipal waste partially buried within the fill material. No documentation of the origin of the fill material was provided. Based on the absence of information regarding the source, the imported fill material is considered a REC to the Property and further investigation is recommended.

5.0 NON-SCOPE CONSIDERATIONS (NSCS)/BUSINESS ENVIRONMENTAL RISKS (BERS)

5.1 Asbestos Containing Materials (ACMs)

Asbestos is primarily regulated by the United States EPA through the EPA NESHAP Standard (40 CFR Chapter 61, Subpart M), the OSHA through the General Industry Standard, and the Construction Industry Standard (29 CFR 1926.1101 and 29 CFR 1910.1001). Many states have regulations in place for the inspection, management, and remediation of asbestos including company and individual licensing requirements for all activities relating to asbestos. Under both federal and state regulations building owners and employers may be required to perform certain activities related to the in-place management of asbestos, and prior to renovations or demolition activities (i.e. asbestos inspections or remediation) that may disturb building materials suspected of containing asbestos. ACMs can include but is not limited to floor tile, plaster, drywall, surfacing, pipe wrap, roofing materials, siding and many other common building materials in any building regardless of construction date. In addition, the Occupational Safety and Health Administration (OSHA) regulation 29 CFR 1926.1101, requires certain construction materials to be *presumed* to contain asbestos, for purposes of this regulation. All thermal system insulation (TSI), surfacing material, and asphalt/vinyl flooring that are present in a building constructed prior to 1981 and have not been appropriately tested are presumed asbestos containing materials (PACMs). ASTM E1527-13 and NESHAP regulations define ACM as containing more than one percent asbestos, which is also considered regulated ACM. Friable ACM is building material that can be crumbled, pulverized, or reduced to powder by hand pressure. Non-friable refers to materials that contain asbestos bound by cement, plastic, adhesive, etc., (i.e. gaskets, floor coverings, roofing materials, etc.).

The limited survey consisted of noting observable materials (materials which were readily accessible and visible during the course of the Property reconnaissance, as applicable) that often contain asbestos. This activity was not designed to discover all sources of suspect ACM, PACM, or asbestos at the Property; or to comply with any regulations and/or laws relative to planned disturbance of building materials such as renovation or demolition, or any other regulatory purpose. Rather, it is intended to provide an indication if significant (significant due to quantity, accessibility, or condition) potential sources of ACM or PACM are present at the Property. Additional sampling, inspection, and evaluation will be warranted for any other use.

Given the early 1960s construction of the remaining Property improvements, use of friable and non-friable ACMs in building construction and finishes cannot be ruled out without independent sample analysis. Suspect ACMs, as well as collection of building material samples for asbestos analysis, if any, are detailed within the table below.

Observed Building Materials			
Material Type / Location	Asbestos Content / Analytical Results	Friable	Physical Condition
ASBESTOS SAMPLING RESULTS			
No Samples Collected	N/A	N/A	N/A

Observed Building Materials			
Material Type / Location	Asbestos Content / Analytical Results	Friable	Physical Condition
SUSPECT BUILDING MATERIALS (NOT SAMPLED)			
Concrete/Plaster	Suspect ACM	No	Damaged

Sampling of building materials for ACM was not conducted as part of current assessment efforts.

5.2 Lead-Based Paint (LBP)

Due to the early 1960s construction date of the remaining Property improvements, LBP may be present. Since the current regulations regarding LBP are generally for residential properties, LBP is not considered a significant environmental concern to the non-residential Property.

Sampling of materials for LBP was not conducted as part of current assessment efforts.

5.3 Radon

The USEPA has prepared a map to assist national, state, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three Radon Zones, with Zone 1 being those areas with the average predicted indoor radon concentration in residential dwellings exceeding the USEPA Action limit of 4.0 picoCuries per liter of air (pCi/L). It is important to note that the USEPA has found homes with elevated levels of radon in all three zones, and the USEPA recommends Property-specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

A review of the EPA Map of Radon Zones places the Property in Zone 2, where the average predicted radon levels are between 2.0 and 4.0 pCi/L.

Based on the non-residential use of the Property, radon is not considered to be a significant concern and no sampling was performed or warranted.

5.4 Evidence of Mold

As part of this assessment, Nova performed a limited visual inspection for the significant presence of mold. A class of fungi, molds have been found to cause a variety of health problems in humans, including allergic, toxicological, and infectious responses. Molds are decomposers of organic materials, and thrive in humid environments, and produce tiny spores to reproduce, just as plants produce seeds. When mold spores land on a damp spot indoors, they may begin growing and digesting whatever they are growing on in order to survive. When excessive moisture or water accumulates indoors, mold growth will often occur, particularly if the moisture problem remains undiscovered or unaddressed. As such, interior areas of buildings characterized by poor ventilation and high humidity are the most common locations of mold growth. Building materials including drywall, wallpaper, baseboards, wood framing, insulation and carpeting often play host to such growth.

Nova observed interior areas of the Property for the presence of significant presence of water and/or mold. The following is a summary of water/mold damaged materials, if any, observed at the time of the assessment. This activity was not designed to discover all areas which may be affected by mold. Rather, it is intended to give the Client an indication if significant (based on observed areas) mold is present at the Property. Additional areas of mold not observed as part of this limited assessment, possibly in pipe chases, HVAC systems and behind enclosed walls and ceilings, may be present on the Property.

Observed Mold / Water Damage				
Location	Material Impacted	Type of Damage	Quantity (visible estimate)	Cause of Damage
None	N/A	N/A	N/A	N/A

5.5 Lead in Drinking Water / Overall Drinking Water Quality

The Property is not currently connected to the municipal water systems. A well is present that is reportedly no longer in service. The City of Chino's 2019 Consumer Confidence Report indicates that the municipal system is compliant with state and federal standards, including those for lead and copper.

Nova did not conduct sampling of drinking water at the Property for the presence of total lead content.

6.0 INTERVIEWS

Pursuant to ASTM E1527-13, the following interviews were conducted during this assessment in order to obtain information indicating RECs in connection with the Property. Findings from these interviews are discussed in the appropriate sections in this report.

6.1 Present Owner, Occupants and Key Site Manager

Nova made reasonable attempts to interview occupants of the Property who possessed knowledge of its current and past use history. Individuals with good knowledge of the uses and physical characteristics of the Property that were interviewed during the course of this assessment are summarized below. Interview content is included in various sections of this report.

Interviews				
Name	Affiliation	Contact Information	Date Contacted / Interviewed	Duration of Occupancy
Linda Casey	Site Escort, Majestic Realty	LCasey@majesticrealty.com	April 23, 2021	N/A

6.2 Past Owners, Operators and Occupants

Interviews with past owners, operators, and occupants that are likely to have material information regarding the potential for contamination at the Property were not considered reasonably ascertainable during the course of this assessment.

6.3 State and/or Local Government Officials

The following State or Local agencies that serve the area in which the Property is located were contacted in an effort to obtain information indicating RECs in connection with the Property. Interview content is discussed in detail within the Records Review section.

Interviews			
Name	Affiliation	Contact Information	Date Contacted / Interviewed
Alma Nielson	Chino Fire Department	909-902-5260	April 20, 2021
Clerk	Chino Building Department	909-334-3251	April 20, 2021

6.4 Others

Information obtained during interviews with other local government officials is incorporated into the appropriate segments of this section.

7.0 FINDINGS, OPINIONS AND CONCLUSIONS

7.1 Findings and Opinions

Evidence of RECs, CRECs, HRECs or other environmental issues in connection with the Property or off-Property facilities, if any, are detailed within the table below.

Finding(s)	Opinion(s)
RECs - On Property	
Imported fill covering an area of approximately one acre was observed on the southeast portion of the Property and based on historical aerial photographs was deposited between 2012 and 2018. PVC piping was observed as well a municipal waste partially buried within the fill material. No documentation of the origin of the fill material was provided.	Based on the absence of information regarding the source, the imported fill material is considered a REC to the Property and further investigation is recommended.
Property - CRECs	
None	None
Property - HRECs	
None	None
RECs/CRECs/HRECs Originating from an Off-Property Facility	
None	None
De Minimis Environmental Conditions	
None	None

7.2 Conclusions and Recommendations

Nova has performed a Phase I ESA in conformance with the scope and limitations of ASTM E1527-13 of Majestic Chino Flight at SEC of Flight Avenue and Remington Avenue, Chino, California. Any exceptions to or deletions from this practice are described in the Introduction Section of this report.

Conclusion(s)	Recommendation(s)
Imported fill covering an area of approximately one acre was observed on the southeast portion of the Property and based on historical aerial photographs was deposited between 2012 and 2018. PVC piping was observed as well a municipal waste partially buried within the fill material. No documentation of the origin of the fill material was provided. Based on the absence of information regarding the source, the imported fill material is considered a REC to the Property and further investigation is recommended.	Uncharacterized fill material should be evaluated for content.

7.2.1 Non-Scope Considerations (NSCs)/Business Environmental Risks (BERs)

Environmental issues with regard to NSCs or BERs, if any, identified in connection with the Property at the time of the Property assessment are detailed below.

Finding	Recommendation
A large amount of agricultural and domestic dumping was observed along the eastern boundary. No labeling or indication of hazardous materials use or disposal/abandonment was observed.	These materials should be disposed of in accordance with applicable local and state regulations.
Due to the age of the estimated initial development of the Property structures, septic systems maybe present.	Should a septic system be encountered during development activities, it should be property removed in accordance with applicable local and state regulations.
A well in a tin shed is present at the Property, centrally near the southern boundary. The well appears to no longer in service and reportedly was part of a water system for the dairy cows historically present. No records or data was available regarding this feature. No industrial operations, nearby hazardous materials handling or releases are were observed or reported.	Should the on-site water well not be needed in the future, it should be properly plugged and abandoned in accordance with applicable local and state regulations.
Based on the age of the remaining Property improvements, there is a potential for asbestos containing materials (ACM) to exist.	Prior to performing any demolition activities, a asbestos survey should be conducted.

7.3 Deletions and Deviations

Performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs in connection with the Property based on reasonably ascertainable information, as well as reasonable constraints with regard to time and cost. All limiting conditions, deletions, and deviations from the ASTM E1527-13 (if any) is listed individually and in detail, including Client imposed constraints, and all additions, within the Introduction section of this report.

RE: CITY DIRECTORY RESEARCH
Majesc Chino Flight
SEC of Flight Avenue and Remington Avenue Chino, CA

Thank you for contacting ERIS for an City Directory Search for the site described above. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. We have provided the nearest addresses(s) when adjacent addresses are not listed. If we have searched a range of addresses, all addresses in that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on more highly developed areas. Newly developed areas may be covered in the more recent years, but the older directories will tend to cover only the "central" parts of the city. To complete the search, we have either utilized the ACPL, Library of Congress, State Archives, and/or a regional library or history center as well as multiple digitized directories. These do not claim to be a complete collection of all reverse listing city directories produced.

ERIS has made every effort to provide accurate and complete information but shall not be held liable for missing, incomplete or inaccurate information. To complete this search we used the general range(s) below to search for relevant findings. If you believe there are additional addresses or streets that require searching please contact us at 866-517-5204.

Search Criteria:

- All of Remington Avenue
- 15000-15699 of Flight Avenue
- All of Van Vilet Avenue
- All of Enterprise Way
- 8400-8899 of Kimball Avenue

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Inc. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

RAT Def:	Response action that requires expeditious attention to reduce imminent and substantial dangers to human health, welfare, or the environment or an emergency response required within hours or days to address acute situations involving actual or potential threat to human health, the environment, or real or personal property due to the release of a hazardous substance. Characterization of a removal action as removal, not immediate removal or planned removal, started at the beginning of FY 1987. This code now takes the place of immediate removal (IR) and planned removal (PR).

CUF Case: NO
Case Worker: PAH
File Location: Regional Board

In the afternoon of July 22, 2010, three buried drums were discovered during trenching for installation of a storm drain pipeline for a new facility for SCE. Additional drums were discovered during the response activities. By sunset, eight buried drums had been removed from the excavation. The drums did not have lids and contained soil that had been placed on top of other materials. The contents of the drums were field tested using a HazCat chemical identification kit, and determined to be a non-explosive, flammable, non-corrosive, organic resin-type material. The eight drums were placed in a roll-off bin. Two more drums were visible in the excavation, but were left in place due to limited remaining daylight. Samples were collected of the soil, the material in the drums, and the liquid in one of the drums. The samples were delivered to Microbac Laboratory in Riverside, and analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), total petroleum hydrocarbons (TPH) carbon range, polynuclear aromatic hydrocarbons (PAHs), CAM17 metals, and flashpoint (only the liquid sample). The analytical results indicated that high concentrations of benzene were present in all of the samples. Also detected were toluene, ethylbenzene, xylene, styrene, 1,2,4-trimethylbenzene, and naphthalene. On July 28, 2010, a geophysical survey was conducted in an effort to locate any additional buried drums. During the survey, several areas to the east and west of the original excavation were marked as possible targets for further investigation. Excavation and removal of additional drums was conducted between August 16 and August 25, 2010. A total of 51 drums, several aluminum canisters and pieces of wood were removed from the excavation and placed in roll-off-bins. Excavated soil was stockpiled and covered with plastic sheeting. Additional soil was excavated from beneath the drums, placed in stockpiles and covered. The resulting excavation measured approximately 100 feet from east to west and 20 feet from north to south. The bottom of the excavation varied from 10 to 15 feet below ground surface. Patricia Hannon of Board Staff observed the collection of the final confirmation soil samples on August 26, 2010. Staff from the U.S. EPA and the California Department of Toxic Substances Control were also present. The samples were submitted to a California certified laboratory for analysis as per the TCRAP. The analytical results for the soil samples showed only very low concentrations of benzene (<1 to 1.28 micrograms/kilogram (µg/kg)), ethylbenzene (<1 to 2.24 µg/kg), xylene (<1 to 28.8 µg/kg), 1,3,5 trimethylbenzene (<5 to 55.4 µg/kg), naphthalene (<5 to 10.9 µg/kg), TPH gasoline range (<1 to 4.71 milligrams/kilogram (mg/kg)), TPH diesel range <1 to 123 mg/kg, and TPH motor oil range (<1 to 355 mg/kg).

Sites from GeoTracker Search - Cleanup Action Report (as of Feb 27, 2021)

Action Type:	EXCAVATION	Begin Date:	8/16/2010
Phase:	Solid Waste	End Date:	8/26/2010
Description:	A total of 51 drums (containing jellied fuel waste product), several aluminum canisters and pieces of wood were removed from the excavation. An estimate 25 tons of waste product, drums, canisters, and debris was excavated from the site and placed in bins and sealed. The sealed bins were transported and disposed of at Rineco in Benton, Arkansas.		

Contaminant Mass Removed:

Action Type:	EXCAVATION	Begin Date:	8/16/2010
Phase:	Soil	End Date:	8/26/2010
Description:	The stockpiled soil, 826.31 tons, was transported to TPS Technologies in Adelanto, California for disposal.		
Contaminant Mass Removed:

Title Description Comments:	Phone call from Ben Wienk of Tetra Tech regarding the content of the buried drums. The goo in the drums maybe napalm. The stuff contains styrene and high concentrations of benzene which are components found in napalm (jellied gasoline) according to Ben. A geophysical survey (EM and metal detector) was conducted on Thursday. Strong signals were found just to the east and west of where the drums were found. Ben said he will be meeting with the County Dept. of Airports, San Bernardino Haz. Mat and Double Barrel (commercial haz. response company) Monday morning to discuss how to proceed. Ben will be putting together a report on what has happened so far and will include a work plan for the next step.

Calwater Watershed Name:		Santa Ana River - Middle Santa Ana River - Chino (Split) (801.21)				
DWR GW Subbasin Name:		Upper Santa Ana Valley - Chino (8-002.01)				
Disadvantaged Community:						
Site History:						

The primary chemicals of concern in the groundwater at the site are trichloroethene, 1,2,3-trichloropropane, cis-1,2-dichloroethene, 1,2-dichloroethane, and 1,1-dichloroethene. Offsite plume characterization field activities were initiated in 2007. Twelve cone penetrometer testing (CPT)/direct push borings were advanced to investigate the below grade lithology, and to determine the horizontal and vertical extent of the VOCs in the groundwater in the vicinity of the site. Eleven additional direct push borings were also advanced, and water samples were collected. The soils encountered consisted of silts, sands, gravels and some clay lenses. The depth to groundwater ranged from 25 to 50 feet below ground surface (bgs), with the depth to water decreasing toward the south. Groundwater was detected at approximately 50 feet bgs at the Kimball Avenue boring location, approximately 30 to 45 feet bgs at the Bickmore Avenue boring locations and approximately 25 to 35 feet bgs at the Pine Avenue boring locations. The local groundwater flow direction is toward the southeast. Based on the results of the investigation in 2007, nine nested groundwater monitoring wells were installed in 2008 at three locations along the axis of the plume. Three wells were installed at each location to monitor the shallow (approximately 35 to 96 feet bgs), intermediate (approximately 91 to 146 feet bgs) and deep (approximately 206 to 309 feet bgs) groundwater zones.

Site History:

The primary chemicals of concern in the groundwater at the site are trichloroethene, 1,2,3-trichloropropane, cis-1,2-dichloroethene, 1,2-dichloroethane, and 1,1-dichloroethene.

Offsite plume characterization field activities were initiated in 2007. Twelve cone penetrometer testing (CPT)/direct push borings were advanced to investigate the below grade lithology, and to determine the horizontal and vertical extent of the VOCs in the groundwater in the vicinity of the site. Eleven additional direct push borings were also advanced, and water samples were collected. The soils encountered consisted of silts, sands, gravels and some clay lenses. The depth to groundwater ranged from 25 to 50 feet below ground surface (bgs), with the depth to water decreasing toward the south. Groundwater was detected at approximately 50 feet bgs at the Kimball Avenue boring location, approximately 30 to 45 feet bgs at the Bickmore Avenue boring locations and approximately 25 to 35 feet bgs at the Pine Avenue boring locations. The local groundwater flow direction is toward the southeast.

Based on the results of the investigation in 2007, nine nested groundwater monitoring wells were installed in 2008 at three locations along the axis of the plume. Three wells were installed at each location to monitor the shallow (approximately 35 to 96 feet bgs), intermediate (approximately 91 to 146 feet bgs) and deep (approximately 206 to 309 feet bgs) groundwater zones.

Title Description Comments:

phone call with consultant - document status update: Revised IRAP is being reviewed by San Bernardino County. Requested a copy of the Mitigated Negative Declaration. Consultant will contact the County and request a copy. Status of activities proposed in the Short-Term Aquifer Testing and On-Site Discharge Of Purge Water (southeast side of plume) - Water has been pumped from the 3 ag. wells and placed in tanks, awaiting lab. results. Aquifer pump testing of the monitoring wells is partially complete. Consultant trying to locate higher capacity pumps for the rest of the wells that will fit in the casings.

Title Description Comments:

Talked to Todd Minten, Operations Manager at Chino Basin Desalter Authority (909-218-3731) and ask how they treat the VOC in the groundwater from Well 02 and 03. He said the raw water from wells 01 through 04 are treated with an air stripper to removed the VOCs and then the water is mix with the product water from the reverse-osmosis system, which then put in to the municipal water line.

Violations

Violation Date: 08/14/2020 Violation Source: CERS
 Violation Program: APSA Violation Division: San Bernardino County Fire Department
 Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
 Violation Notes:

OBSERVATION: Adequate secondary containment has not been provided to the ~200-gallon used oil tank and 55-gallon drum of gear oil at the maintenance shop. CORRECTIVE ACTION: Submit a photograph showing that secondary containment has been provided to the used oil tank and 55-gallon drum of gear oil which can hold the entire contents of the containers.

Violation Description:

Failure of a conditionally exempt facility to allow the UPA to conduct a periodic inspection, install secondary containment when the UPA determines that it is necessary, and/or conduct daily visual inspections to protect the waters of the state.

Violations

Violation Date: 08/14/2020 Violation Source: CERS
 Violation Program: HMRRP Violation Division: San Bernardino County Fire Department
 Citation: HSC 6.95 25508.1(a)-(f) - California Health and Safety Code, Chapter 6.95, Section(s) 25508.1(a)-(f)
 Violation Notes:

OBSERVATION: Hazardous materials were observed on site during the inspection that are not listed in the most current CERS inventory or are listed in lesser quantities. Also, the site map does not show the emergency evacuation staging areas or the locations of emergency response equipment (fire extinguishers/spill kits/eye wash stations). CORRECTIVE ACTION: Submit a signed statement that updated Business Plan elements have been submitted into CERS.

Violation Description:

Failure to electronically update business plan within 30 days of any one of the following events:
 A 100 percent or more increase in the quantity of a previously disclosed material.
 Any handling of a previously undisclosed hazardous materials at or above reportable quantities.
 A change of business address, business ownership, or business name.
 A substantial change in the handler's operations that requires modification to any portion of the business plan.

Violations

Violation Date: 06/08/2017 Violation Source: CERS
 Violation Program: HW Violation Division: San Bernardino County Fire Department
 Citation: HSC 6.5 25250.22 - California Health and Safety Code, Chapter 6.5, Section(s) 25250.22
 Violation Notes:

Returned to compliance on 07/31/2017. Used oil filters not lawfully managed.

Violation Description:

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
----------------	--------------------------	------------------	-------------------------	-----------------------	-------------	-----------

Failure to properly manage used oil and/or fuel filters in accordance with the requirements.

Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Notes:

OBSERVATION: The last Business Plan update submitted by this facility is dated 2/23/2018. CORRECTIVE ACTION: Submit a signed statement that a Business Plan update has been submitted into CERS.

Violation Description:

Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.

Violations

Violation Date: 08/14/2020 **Violation Source:** CERS
Violation Program: HW **Violation Division:** San Bernardino County Fire Department
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Notes:

OBSERVATION: Observed a 55-gallon drum of waste coolant, a 55-gallon drum of waste non-metal oil filters, and a ~200-gallon container of used oil missing complete legible hazardous waste labels. CORRECTIVE ACTION: Submit photographs showing that the containers of waste coolant, used oil, and waste non-metal oil filters have been properly labeled as hazardous waste.

Violation Description:

Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violations

Violation Date: 08/14/2020 **Violation Source:** CERS
Violation Program: HW **Violation Division:** San Bernardino County Fire Department
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Notes:

OBSERVATION: Observed a 55-gallon drum of waste non-metal oil filters and a 55-gallon drum of waste coolant that have been stored on site for longer than the 180 day accumulation time limit. CORRECTIVE ACTION: Submit a copy of a hazardous waste manifest showing that the waste coolant and waste non-metal oil filters have been removed.

Violation Description:

Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met:
(1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms.

Violation Division: San Bernardino County Fire Department
Violation Notes:

Returned to compliance on 03/13/2014. OBSERVATION: THE OVERFILL VISUAL ALARM DID NOT FUNCTION WHEN OVERFILL PREVENTION TESTS CONDUCTED. COMPLIANCE: MET ONSITE. CONTRACTOR REPLACED THE BULB AND RETESTED.

Violation Description:

Failure of the overfill prevention system to meet one of the following requirements:
 1. Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or
 2. Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or
 3. Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or
 4. Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling.

Site Type:	SCHOOL		
Office:	SOUTHERN CALIFORNIA SCHOOLS & BROWNFIELDS OUTREACH		
Past Use that Caused Contam:	AGRICULTURAL - LIVESTOCK		
Potential Media Affected:	SOIL		
Potential Contamin of Concern:			

ARSENIC, DDD, DDE, DDT, LEAD

SITE HISTORY:

The site is located near Kimball and Grove Avenues. The approximately 20-acre site is currently fallow land, surrounded by a housing development and existing dairies. The site has been historically utilized for dairy and row crop operations, indicating the potential for pesticide application and other chemicals of concern. A farm equipment storage yard was present north of the proposed school site. The soil at the site and the adjacent properties will be turned over to reduce the organic material contents and then graded.

Status:	NO FURTHER ACTION

Cleanup Status: CERTIFIED AS OF 6/30/2010
Cleanup Oversight Agencies: DTSC - SITE CLEANUP PROGRAM - LEAD AGENCY
School District:
Past Use that Caused Contam: AGRICULTURAL - LIVESTOCK
Potential Media Affected: SOIL
Site History:

The site has been used for agricultural purposes since the 1930's. From about 1931 through the 1960's, the site was used for crop cultivation. During the 1970's, the property use transitioned towards livestock rearing. From the 1980's through 2005, the site was primarily used for dairy operations, livestock rearing and crop/pasture cultivation.

Note on Feb 15 2008: The Proponent is reevaluating the development of this property due to the downturn in the real estate market. The status of the project was changed to inactive, and will remain so until the Proponent is ready to start the project.

Potential Contamin of Concern:

CHLORDANE

Unplottable Summary

Total: 0 Unplottable sites

DB	Company Name/Site Name	Address	City	Zip	ERIS ID
----	------------------------	---------	------	-----	---------

No unplottable records were found that may be relevant for the search criteria.

Unplottable Report

No unplottable records were found that may be relevant for the search criteria.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13, Section 8.1.8 Sources of Standard Source Information:

"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."

Standard Environmental Record Sources

Federal

Formerly Utilized Sites Remedial Action Program:

DOE FUSRAP

The U.S. Department of Energy (DOE) established the Formerly Utilized Sites Remedial Action Program (FUSRAP) in 1974 to remediate sites where radioactive contamination remained from the Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations. The DOE Office of Legacy Management (LM) established long-term surveillance and maintenance (LTS&M) requirements for remediated FUSRAP sites. DOE evaluates the final site conditions of a remediated site on the basis of risk for different future uses. DOE then confirms that LTS&M requirements will maintain protectiveness.

Government Publication Date: Mar 4, 2017

National Priority List:

NPL

National Priorities List (Superfund)-NPL: EPA's (United States Environmental Protection Agency) list of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. The NPL, which EPA is required to update at least once a year, is based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action.

Government Publication Date: Feb 23, 2021

National Priority List - Proposed:

PROPOSED NPL

Includes sites proposed (by the EPA, the state, or concerned citizens) for addition to the NPL due to contamination by hazardous waste and identified by the Environmental Protection Agency (EPA) as a candidate for cleanup because it poses a risk to human health and/or the environment.

Government Publication Date: Feb 23, 2021

Deleted NPL:

DELETED NPL

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Government Publication Date: Feb 23, 2021

SEMS List 8R Active Site Inventory:

SEMS

The Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted.

Government Publication Date: Jan 28, 2021

Inventory of Open Dumps, June 1985:

ODI

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

Government Publication Date: Jun 1985

SEMS List 8R Archive Sites:

[SEMS ARCHIVE](#)

The Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time.

Government Publication Date: Jan 28, 2021

Comprehensive Environmental Response, Compensation and Liability Information System -

[CERCLIS](#)

CERCLIS:

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

Government Publication Date: Oct 25, 2013

EPA Report on the Status of Open Dumps on Indian Lands:

[IODI](#)

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

Government Publication Date: Dec 31, 1998

CERCLIS - No Further Remedial Action Planned:

[CERCLIS NFRAP](#)

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Government Publication Date: Oct 25, 2013

CERCLIS Liens:

[CERCLIS LIENS](#)

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Jan 30, 2014

RCRA CORRACTS-Corrective Action:

[RCRA CORRACTS](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

Government Publication Date: Jan 22, 2021

RCRA non-CORRACTS TSD Facilities:

[RCRA TSD](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites listed as treatment, storage and/or disposal facilities of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA).

Government Publication Date: Jan 22, 2021

RCRA Generator List:

[RCRA LQG](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.

Government Publication Date: Jan 22, 2021

RCRA Small Quantity Generators List:

[RCRA SQG](#)

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

Government Publication Date: Jan 22, 2021

RCRA Very Small Quantity Generators List:

[RCRA VSQG](#)

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Very Small Quantity Generators (VSQG) generate 100 kilograms or less per month of hazardous waste, or one kilogram or less per month of acutely hazardous waste. Additionally, VSQG may not accumulate more than 1,000 kilograms of hazardous waste at any time.

Government Publication Date: Jan 22, 2021

RCRA Non-Generators:

[RCRA NON GEN](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

Government Publication Date: Jan 22, 2021

Federal Engineering Controls-ECs:

[FED ENG](#)

Engineering controls (ECs) encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Feb 23, 2021

Federal Institutional Controls- ICs:

[FED INST](#)

Institutional controls are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's (United States Environmental Protection Agency) expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site.

Government Publication Date: Feb 23, 2021

Land Use Control Information System:

[LUCIS](#)

The LUCIS database is maintained by the U.S. Department of the Navy and contains information for former Base Realignment and Closure (BRAC) properties across the United States.

Government Publication Date: Sep 1, 2006

Emergency Response Notification System:

[ERNS 1982 TO 1986](#)

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1982-1986

Emergency Response Notification System:

[ERNS 1987 TO 1989](#)

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1987-1989

Emergency Response Notification System:

[ERNS](#)

Database of oil and hazardous substances spill reports made available by the United States Coast Guard National Response Center (NRC). The NRC fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. These data contain initial incident data that has not been validated or investigated by a federal/state response agency.

Government Publication Date: Nov 9, 2020

The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database:

[FED BROWNFIELDS](#)

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Jan 6, 2021

FEMA Underground Storage Tank Listing:

[FEMA UST](#)

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

Government Publication Date: Dec 31, 2017

Facility Response Plan:

[FRP](#)

List of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

Government Publication Date: Dec 2, 2020

Historical Gas Stations:

[HIST GAS STATIONS](#)

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

Government Publication Date: Jul 1, 1930

Petroleum Refineries:

[REFN](#)

List of petroleum refineries from the U.S. Energy Information Administration (EIA) Refinery Capacity Report. Includes operating and idle petroleum refineries (including new refineries under construction) and refineries shut down during the previous year located in the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, and other U.S. possessions. Survey locations adjusted using public data.

Government Publication Date: Jul 10, 2020

Petroleum Product and Crude Oil Rail Terminals:

[BULK TERMINAL](#)

List of petroleum product and crude oil rail terminals made available by the U.S. Energy Information Administration (EIA). Includes operable bulk petroleum product terminals located in the 50 States and the District of Columbia with a total bulk shell storage capacity of 50,000 barrels or more, and/or the ability to receive volumes from tanker, barge, or pipeline; also rail terminals handling the loading and unloading of crude oil that were active between 2017 and 2018. Petroleum product terminals comes from the EIA-815 Bulk Terminal and Blender Report, which includes working, shell in operation, and shell idle for several major product groupings. Survey locations adjusted using public data.

Government Publication Date: Apr 28, 2020

LIEN on Property:

[SEMS LIEN](#)

The EPA Superfund Enterprise Management System (SEMS) provides LIEN information on properties under the EPA Superfund Program.

Government Publication Date: Jan 28, 2021

Superfund Decision Documents:

[SUPERFUND ROD](#)

This database contains a listing of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD), along with other associated memos and files. This information is maintained and made available by the US EPA (Environmental Protection Agency).

Government Publication Date: Feb 23, 2021

State

State Response Sites:

[RESPONSE](#)

A list of identified confirmed release sites where the Department of Toxic Substances Control (DTSC) is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk. This database is state equivalent NPL.

Government Publication Date: Jan 13, 2021

EnviroStor Database:

[ENVIROSTOR](#)

The EnviroStor Data Management System is made available by the Department of Toxic Substances Control (DTSC). Includes Corrective Action sites, Tiered Permit sites, Historical Sites and Evaluation/Investigation sites. This database is state equivalent CERCLIS.

Government Publication Date: Jan 13, 2021

Delisted State Response Sites:

[DELISTED ENVS](#)

Sites removed from the list of State Response Sites made available by the EnviroStor Data Management System, Department of Toxic Substances Control (DTSC).

Government Publication Date: Jan 13, 2021

Solid Waste Information System (SWIS):

[SWF/LF](#)

The Solid Waste Information System (SWIS) database made available by the Department of Resources Recycling and Recovery (CalRecycle) contains information on solid waste facilities, operations, and disposal sites throughout the State of California. The types of facilities found in this database include landfills, transfer stations, material recovery facilities, composting sites, transformation facilities, waste tire sites, and closed disposal sites.

Government Publication Date: Feb 8, 2021

Solid Waste Disposal Sites with Waste Constituents Above Hazardous Waste Levels:

[SWRCB SWF](#)

This is a list of solid waste disposal sites identified by California State Water Resources Control Board with waste constituents above hazardous waste levels outside the waste management unit.

Government Publication Date: Sep 20, 2006

EnviroStor Hazardous Waste Facilities:

[HWP](#)

A list of hazardous waste facilities including permitted, post-closure and historical facilities found in the Department of Toxic Substances Control (DTSC) EnviroStor database.

Government Publication Date: Jan 13, 2021

Sites Listed in the Solid Waste Assessment Test (SWAT) Program Report:

[SWAT](#)

In a 1993 Memorandum of Understanding, the State Water Resources Control Board (SWRCB) agreed to submit a comprehensive report on the Solid Waste Assessment Test (SWAT) Program to the California Integrated Waste Management Board (CIWMB). This report summarizes the work completed to date on the SWAT Program, and addresses both the impacts that leakage from solid waste disposal sites (SWDS) may have upon waters of the State and the actions taken to address such leakage.

Government Publication Date: Dec 31, 1995

Construction and Demolition Debris Recyclers:

[C&D DEBRIS RECY](#)

This listing of Construction and Demolition Debris Recyclers is maintained by the California Intergrated Waste Management Board-common C&D materials include lumber, drywall, metals, masonry (brick, concrete, etc.), carpet, plastic, pipe, rocks, dirt, paper, cardboard, or green waste related to land development.

Government Publication Date: Jun 20, 2018

Recycling Centers:

[RECYCLING](#)

This list of Certified Recycling Centers that are operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Nov 2, 2020

Listing of Certified Processors:

[PROCESSORS](#)

This list of Certified Processors that are operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Oct 27, 2020

Listing of Certified Dropoff, Collection, and Community Service Programs:

[CONTAINER RECY](#)

This list of Certified Dropoff, Collection, and Community Service Programs (non-buyback) operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Dec 16, 2020

Land Disposal Sites:

[LDS](#)

Land Disposal Sites in GeoTracker, the State Water Resources Control Board (SWRCB)'s data management system. The Land Disposal program regulates of waste discharge to land for treatment, storage and disposal in waste management units. Waste management units include waste piles, surface impoundments, and landfills.

Government Publication Date: Mar 9, 2021

Leaking Underground Fuel Tank Reports:

[LUST](#)

List of Leaking Underground Storage Tanks within the Cleanup Sites data in GeoTracker database. GeoTracker is the State Water Resources Control Board's (SWRCB) data management system for managing sites that impact groundwater, especially those that require groundwater cleanup (Underground Storage Tanks, Department of Defense and Site Cleanup Program) as well as permitted facilities such as operating Underground Storage Tanks. The Leak Prevention Program that overlooks LUST sites is the SWRCB in California's Environmental Protection Agency.

Government Publication Date: Mar 9, 2021

Delisted Leaking Storage Tanks:

[DELISTED LST](#)

List of Leaking Underground Storage Tanks (LUST) cleanup sites removed from GeoTracker, the State Water Resources Control Board (SWRCB)'s database system, as well as sites removed from the SWRCB's list of UST Case closures.

Government Publication Date: Mar 9, 2021

Permitted Underground Storage Tank (UST) in GeoTracker:

[UST](#)

List of Permitted Underground Storage Tank (UST) sites made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA).

Government Publication Date: Mar 23, 2021

Proposed Closure of Underground Storage Tank Cases:

[UST CLOSURE](#)

List of UST cases that are being considered for closure by either the California Environmental Protection Agency, State Water Resources Control Board or the Executive Director that have been posted for a 60-day public comment period.

Government Publication Date: Feb 2, 2021

Historical Hazardous Substance Storage Information Database:

[HHSS](#)

The Historical Hazardous Substance Storage database contains information collected in the 1980s from facilities that stored hazardous substances. The information was originally collected on paper forms, was later transferred to microfiche, and recently indexed as a searchable database. When using this database, please be aware that it is based upon self-reported information submitted by facilities which has not been independently verified. It is unlikely that every facility responded to the survey and the database should not be expected to be a complete inventory of all facilities that were operating at that time. This database is maintained by the California State Water Resources Control Board's (SWRCB) Geotracker.

Government Publication Date: Aug 27, 2015

Statewide Environmental Evaluation and Planning System:

[UST SWEEPS](#)

The Statewide Environmental Evaluation and Planning System (SWEEPS) is a historical listing of active and inactive underground storage tanks made available by the California State Water Resources Control Board (SWRCB).

Government Publication Date: Oct 1, 1994

Aboveground Storage Tanks:

[AST](#)

A statewide list from 2009 of aboveground storage tanks (ASTs) made available by the Cal FIRE Office of the State Fire Marshal (OSFM). This list is no longer maintained or updated by the Cal FIRE OSFM.

Government Publication Date: Aug 31, 2009

SWRCB Historical Aboveground Storage Tanks:

[AST SWRCB](#)

A list of aboveground storage tanks made available by the California State Water Resources Control Board (SWRCB). Effective January 1, 2008, the Certified Unified Program Agencies (CUPAs) are vested with the responsibility and authority to implement the Aboveground Petroleum Storage Act (APSA).

Government Publication Date: Dec 1, 2007

Oil and Gas Facility Tanks:

[TANK OIL GAS](#)

Locations of oil and gas tanks that fall under the jurisdiction of the Geologic Energy Management Division of the California Department of Conservation (CalGEM) (CCR 1760). CalGEM was formerly the Division of Oil, Gas, and Geothermal Resources (DOGGR).

Government Publication Date: Feb 12, 2021

Delisted Storage Tanks:

[DELISTED TNK](#)

This database contains a list of storage tank sites that were removed by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA) and the Cal FIRE Office of State Fire Marshal (OSFM).

Government Publication Date: Mar 18, 2021

California Environmental Reporting System (CERS) Tanks:

[CERS TANK](#)

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Aboveground Petroleum Storage and Underground Storage Tank regulatory programs. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

Government Publication Date: Feb 9, 2021

Delisted California Environmental Reporting System (CERS) Tanks:

[DELISTED CTNK](#)

This database contains a list of Aboveground Petroleum Storage and Underground Storage Tank sites that were removed from in the California Environmental Protection Agency (CalEPA) Regulated Site Portal.

Government Publication Date: Feb 9, 2021

Historical Hazardous Substance Storage Container Information - Facility Summary:

[HIST TANK](#)

The State Water Resources Control Board maintained the Hazardous Substance Storage Containers listing and inventory in th 1980s. This facility summary lists historic tank sites where the following container types were present: farm motor vehicle fuel tanks; waste tanks; sumps; pits, ponds, lagoons, and others; and all other product tanks. This set, published in May 1988, lists facility and owner information, as well as the number of containers. This data is historic and will not be updated.

Government Publication Date: May 27, 1988

Site Mitigation and Brownfields Reuse Program Facility Sites with Land Use Restrictions:

[LUR](#)

The Department of Toxic Substances Control (DTSC) Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents land use restrictions that are active. Some sites have multiple land use restrictions.

Government Publication Date: Jan 13, 2021

CALSITES Database:

[CALSITES](#)

This historical database was maintained by the Department of Toxic Substance Control (DTSC) for more than a decade. CALSITES contains information on Brownfield properties with confirmed or potential hazardous contamination. In 2006, DTSC introduced EnviroStor as the latest Brownfields site database.

Government Publication Date: May 1, 2004

Hazardous Waste Management Program Facility Sites with Deed / Land Use Restrictions:

[HLUR](#)

The Department of Toxic Substances Control (DTSC) Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Government Publication Date: Feb 18, 2021

Deed Restrictions and Land Use Restrictions:

[DEED](#)

List of Deed Restrictions, Land Use Restrictions and Covenants in GeoTracker made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency. A deed restriction (land use covenant) may be required to facilitate the remediation of past environmental contamination and to protect human health and the environment by reducing the risk of exposure to residual hazardous materials.

Government Publication Date: Mar 9, 2021

Voluntary Cleanup Program:

[VCP](#)

List of sites in the Voluntary Cleanup Program made available by the Department of Toxic Substances and Control (DTSC). The Voluntary Cleanup Program was designed to respond to lower priority sites. Under the Voluntary Cleanup Program, DTSC enters site-specific agreements with project proponents for DTSC oversight of site assessment, investigation, and/or removal or remediation activities, and the project proponents agree to pay DTSC's reasonable costs for those services.

Government Publication Date: Jan 13, 2021

GeoTracker Cleanup Program Sites:

[CLEANUP SITES](#)

A list of Cleanup Program sites in the state of California made available by The State Water Resources Control Board (SWRCB) of the California Environmental Protection Agency (EPA). SWRCB tracks leaking underground storage tank cleanups as well as other water board cleanups.

Government Publication Date: Mar 9, 2021

Delisted County Records:

[DELISTED COUNTY](#)

Records removed from county or CUPA databases. Records may be removed from the county lists made available by the respective county departments because they are inactive, or because they have been deemed to be below reportable thresholds.

Tribal

Leaking Underground Storage Tanks (LUSTs) on Indian Lands:
LUSTs on Tribal/Indian Lands in Region 9, which includes California.
Government Publication Date: Apr 8, 2020

INDIAN LUST

Underground Storage Tanks (USTs) on Indian Lands:
USTs on Tribal/Indian Lands in Region 9, which includes California.
Government Publication Date: Apr 8, 2020

INDIAN UST

Delisted Tribal Leaking Storage Tanks:
Leaking Underground Storage Tank facilities which have been removed from the Regional Tribal LUST lists made available by the EPA.
Government Publication Date: Apr 14, 2020

DELISTED ILST

Delisted Tribal Underground Storage Tanks:
Underground Storage Tank facilities which have been removed from the Regional Tribal UST lists made available by the EPA.
Government Publication Date: Apr 14, 2020

DELISTED IUST

County

Riverside County - Local Oversight Program List:
A list of Leaking Underground Storage Tank (LUST) facilities in Riverside County. This list is made available by Riverside County Department of Environmental Health. Environmental Cleanup Program provides oversight of assessments and cleanups at properties that have been, or may have been, contaminated with hazardous substances from LUSTs or releases associated with other commercial/industrial use.
Government Publication Date: Mar 23, 2021

RIVERSIDE LOP

Riverside County - Underground Storage Tanks List:
A list of registered Underground Storage Tank (UST) sites in Riverside County. This list is made available by Riverside County Department of Environmental Health. The Hazardous Materials Management Branch (HMMB) regulates and oversees the inspections of constructions, repairs, upgrades, system operation and removal of UST systems.
Government Publication Date: Mar 23, 2021

UST RIVERSIDE

San Bernardino County - CUPA List:
A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in San Bernardino County. This list is made available by San Bernardino County Fire Department which is the CUPA for all areas of the County except the city of Victorville.
Government Publication Date: Mar 4, 2021

SANBERN CUPA

Additional Environmental Record Sources

Federal

PFOA/PFOS Contaminated Sites:
List of sites where PFOA or PFOS contaminants have been found in drinking water or soil. Made available by the Federal Environmental Protection Agency (EPA).
Government Publication Date: Mar 1, 2021

PFAS NPL

Facility Registry Service/Facility Index:
The Facility Registry Service (FRS) is a centrally managed database that identifies facilities, sites, or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, and data collected from EPA's Central Data Exchange registrations and data management personnel. This list is made available by the Environmental Protection Agency (US EPA).

FINDS/FRS

Toxics Release Inventory (TRI) Program:

TRIS

The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment.

Government Publication Date: Feb 19, 2020

Perfluorinated Alkyl Substances (PFAS) Releases:

PFAS TRI

List of Toxics Release Inventory (TRI) facilities at which the reported chemical is a Per- or polyfluorinated alkyl substance (PFAS) included in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances. The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment.

Government Publication Date: Feb 19, 2020

Perfluorinated Alkyl Substances (PFAS) Water Quality:

PFAS WATER

The Water Quality Portal (WQP) is a cooperative service sponsored by the United States Geological Survey (USGS), the Environmental Protection Agency (EPA), and the National Water Quality Monitoring Council (NWQMC). This listing includes records from the Water Quality Portal where the characteristic (environmental measurement) is in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances.

Government Publication Date: Jul 20, 2020

Hazardous Materials Information Reporting System:

HMIRS

US DOT - Department of Transportation Pipeline and Hazardous Materials Safety Administration (PHMSA) Incidents Reports Database taken from Hazmat Intelligence Portal, U.S. Department of Transportation.

Government Publication Date: Sep 1, 2020

National Clandestine Drug Labs:

NCDL

The U.S. Department of Justice ("the Department") provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

Government Publication Date: Oct 5, 2020

Toxic Substances Control Act:

TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI).

Government Publication Date: Apr 11, 2019

Hist TSCA:

HIST TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.

Government Publication Date: Dec 31, 2006

FTTS Administrative Case Listing:

FTTS ADMIN

An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

FTTS Inspection Case Listing:

FTTS INSP

An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

Potentially Responsible Parties List:

PRP

Early in the cleanup process, the Environmental Protection Agency (EPA) conducts a search to find the potentially responsible parties (PRPs). EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site.

Government Publication Date: Feb 23, 2021

State Coalition for Remediation of Drycleaners Listing:

SCRD DRYCLEANER

The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

Government Publication Date: Nov 08, 2017

Integrated Compliance Information System (ICIS):

ICIS

The Integrated Compliance Information System (ICIS) is a system that provides information for the Federal Enforcement and Compliance (FE&C) and the National Pollutant Discharge Elimination System (NPDES) programs. The FE&C component supports the Environmental Protection Agency's (EPA) Civil Enforcement and Compliance program activities. These activities include Compliance Assistance, Compliance Monitoring and Enforcement. The NPDES program supports tracking of NPDES permits, limits, discharge monitoring data and other program reports.

Government Publication Date: Jan 6, 2021

Drycleaner Facilities:

FED DRYCLEANERS

A list of drycleaner facilities from Enforcement and Compliance History Online (ECHO) online search. The Environmental Protection Agency (EPA) tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments.

Government Publication Date: Feb 17, 2021

Delisted Drycleaner Facilities:

DELISTED FED DRY

List of sites removed from the list of Drycleaner Facilities (sites in the EPA's Integrated Compliance Information System (ICIS) with NAIC or SIC codes identifying the business as a drycleaner establishment).

Government Publication Date: Feb 17, 2021

Formerly Used Defense Sites:

FUDS

Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DoD) is responsible for an environmental restoration. This list is published by the U.S. Army Corps of Engineers.

Government Publication Date: Jan 28, 2020

Former Military Nike Missile Sites:

FORMER NIKE

This information was taken from report DRXTH-AS-IA-83A016 (Historical Overview of the Nike Missile System, 12/1984) which was performed by Environmental Science and Engineering, Inc. for the U.S. Army Toxic and Hazardous Materials Agency Assessment Division. The Nike system was deployed between 1954 and the mid-1970's. Among the substances used or stored on Nike sites were liquid missile fuel (JP-4); starter fluids (UDKH, aniline, and furfuryl alcohol); oxidizer (IRFNA); hydrocarbons (motor oil, hydraulic fluid, diesel fuel, gasoline, heating oil); solvents (carbon tetrachloride, trichloroethylene, trichloroethane, stoddard solvent); and battery electrolyte. The quantities of material a disposed of and procedures for disposal are not documented in published reports. Virtually all information concerning the potential for contamination at Nike sites is confined to personnel who were assigned to Nike sites. During deactivation most hardware was shipped to depot-level supply points. There were reportedly instances where excess materials were disposed of on or near the site itself at closure. There was reportedly no routine site decontamination.

Government Publication Date: Dec 1, 1984

PHMSA Pipeline Safety Flagged Incidents:

PIPELINE INCIDENT

A list of flagged pipeline incidents made available by the U.S. Department of Transportation (US DOT) Pipeline and Hazardous Materials Safety Administration (PHMSA). PHMSA regulations require incident and accident reports for five different pipeline system types.

Government Publication Date: Jul 7, 2020

Material Licensing Tracking System (MLTS):

MLTS

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

Historic Material Licensing Tracking System (MLTS) sites:

[HIST MLTS](#)

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

Government Publication Date: Jan 31, 2010

Mines Master Index File:

[MINES](#)

The Master Index File (MIF) contains mine identification numbers issued by the Department of Labor Mine Safety and Health Administration (MSHA) for mines active or opened since 1971. Note that addresses may or may not correspond with the physical location of the mine itself.

Government Publication Date: Nov 3, 2020

Surface Mining Control and Reclamation Act Sites:

[SMCRA](#)

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by the Office of Surface Mining Reclamation and Enforcement (OSMRE) to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of Abandoned Mine Land (AML) impacts, as well as information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

Government Publication Date: Dec 18, 2020

Mineral Resource Data System:

[MRDS](#)

The Mineral Resource Data System (MRDS) is a collection of reports describing metallic and nonmetallic mineral resources throughout the world. Included are deposit name, location, commodity, deposit description, geologic characteristics, production, reserves, resources, and references. This database contains the records previously provided in the Mineral Resource Data System (MRDS) of USGS and the Mineral Availability System/Mineral Industry Locator System (MAS/MILS) originated in the U.S. Bureau of Mines, which is now part of USGS. The USGS has ceased systematic updates of the MRDS database with their focus more recently on deposits of critical minerals while providing a well-documented baseline of historical mine locations from USGS topographic maps.

Government Publication Date: Mar 15, 2006

Uranium Mill Tailings Radiation Control Act Sites:

[URANIUM](#)

The Legacy Management Office of the Department of Energy (DOE) manages radioactive and chemical waste, environmental contamination, and hazardous material at over 100 sites across the U.S. The L.M. Office manages this database of sites registered under the Uranium Mill Tailings Control Act (UMTRCA).

Government Publication Date: Mar 4, 2017

Alternative Fueling Stations:

[ALT FUELS](#)

List of alternative fueling stations made available by the US Department of Energy's Office of Energy Efficiency & Renewable Energy. Includes Biodiesel stations, Ethanol (E85) stations, Liquefied Petroleum Gas (Propane) stations, Ethanol (E85) stations, Natural Gas stations, Hydrogen stations, and Electric Vehicle Supply Equipment (EVSE). The National Renewable Energy Laboratory (NREL) obtains information about new stations from trade media, Clean Cities coordinators, a Submit New Station form on the Station Locator website, and through collaborating with infrastructure equipment and fuel providers, original equipment manufacturers (OEMs), and industry groups.

Government Publication Date: Jan 18, 2021

Registered Pesticide Establishments:

[SSTS](#)

List of active EPA-registered foreign and domestic pesticide-producing and device-producing establishments based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that facilities producing pesticides, active ingredients, or devices be registered. The list of establishments is made available by the EPA.

Government Publication Date: Mar 31, 2020

Polychlorinated Biphenyl (PCB) Notifiers:

[PCB](#)

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

Government Publication Date: Nov 19, 2020

State

Dry Cleaning Facilities:

[DRYCLEANERS](#)

A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial, linen supply, commercial laundry, dry cleaning and pressing machines - Coin Operated Laundry and Dry Cleaning. This is provided by the Department of Toxic Substance Control.

Government Publication Date: Feb 22, 2021

Delisted Drycleaners:

[DELISTED DRYCLEANERS](#)

Sites removed from the list of drycleaner related facilities that have EPA ID numbers, made available by the California Department of Toxic Substance Control.

Government Publication Date: Feb 22, 2021

Non-Toxic Dry Cleaning Incentive Program:

[DRYC GRANT](#)

A list of grant recipients of the Non-Toxic Dry Cleaning Incentive Program made available by the California Air Resources Board (CARB). The program provides grants to eligible dry cleaning businesses to assist them in transitioning away from PERC machines to alternative non-toxic and non-smog forming technologies.

Government Publication Date: Feb 28, 2018

Per- and Polyfluoroalkyl Substances (PFAS):

[PFAS](#)

List of sites from the State Water Resources Control Board (SWRCB)'s GeoTracker at which one or more of the potential contaminants of concern are in the PFAS Master List of PFAS Substances made available by the Environmental Protection Agency (US EPA).

Government Publication Date: Mar 9, 2021

PFOA/PFOS Groundwater:

[PFAS GW](#)

A list of water wells from the Groundwater Ambient Monitoring and Assessment Program (GAMA) Groundwater Information System with the groundwater chemical perfluorooctanoic acid (PFOA) (NL = 0.014 UG/L) or perfluorooctanoic sulfonate (PFOS) (NL = 0.013 UG/L). The GAMA Groundwater Information System search is made available by California Water Boards.

Government Publication Date: Oct 22, 2020

Hazardous Waste and Substances Site List - Site Cleanup:

[HWSS CLEANUP](#)

The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements in providing information about the location of hazardous materials release sites. This list is published by California Department of Toxic Substance Control.

Government Publication Date: Nov 10, 2020

List of Hazardous Waste Facilities Subject to Corrective Action:

[DTSC HWF](#)

This is a list of hazardous waste facilities identified in Health and Safety Code (HSC) § 25187.5. These facilities are those where Department of Toxic Substances Control (DTSC) has taken or contracted for corrective action because a facility owner/operator has failed to comply with a date for taking corrective action in an order issued under HSC § 25187, or because DTSC determined that immediate corrective action was necessary to abate an imminent or substantial endangerment.

Government Publication Date: Jul 18, 2016

EnviroStor Inspection, Compliance, and Enforcement:

[INSP COMP ENF](#)

A list of permitted facilities with inspections and enforcements tracked in the Department of Toxic Substance Control (DTSC) EnviroStor.

Government Publication Date: Oct 7, 2020

School Property Evaluation Program Sites:

[SCH](#)

A list of sites registered with The Department of Toxic Substances Control (DTSC) School Property Evaluation and Cleanup (SPEC) Division. SPEC is responsible for assessing, investigating and cleaning up proposed school sites. The Division ensures that selected properties are free of contamination or, if the properties were previously contaminated, that they have been cleaned up to a level that protects the students and staff who will occupy the new school.

Government Publication Date: Jan 13, 2021

California Hazardous Material Incident Report System (CHMIRS):

[CHMIRS](#)

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS). This list has been made available by the California Office of Emergency Services (OES).

Government Publication Date: Jan 21, 2021

Historical California Hazardous Material Incident Report System (CHMIRS):

[HIST CHMIRS](#)

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS) prior to 1993. This list has been made available by the California Office of Emergency Services (OES).

Government Publication Date: Jan 1, 1993

Hazardous Waste Manifest Data:

[HAZNET](#)

A list of hazardous waste manifests received each year by Department of Toxic Substances Control (DTSC). The volume of manifests is typically 900,000 - 1,000,000 annually, representing approximately 450,000 - 500,000 shipments.

Government Publication Date: Oct 24, 2016

Historical Hazardous Waste Manifest Data:

[HIST MANIFEST](#)

A list of historic hazardous waste manifests received by the Department of Toxic Substances Control (DTSC) from year the 1980 to 1992. The volume of manifests is typically 900,000 - 1,000,000 annually, representing approximately 450,000 - 500,000 shipments.

Government Publication Date: Dec 31, 1992

DTSC Registered Hazardous Waste Transporters:

[HW TRANSPORT](#)

The California Department of Toxic Substances Control (DTSC) maintains this list of Registered Hazardous Waste Transporters.

Government Publication Date: Oct 19, 2020

Registered Waste Tire Haulers:

[WASTE TIRE](#)

This list of registered waste tire haulers is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Dec 16, 2020

California Medical Waste Management Program Facility List:

[MEDICAL WASTE](#)

This list of Medical Waste Management Program Facilities is maintained by the California Department of Public Health. The Medical Waste Management Program (MWMP) regulates the generation, handling, storage, treatment, and disposal of medical waste by providing oversight for the implementation of the Medical Waste Management Act (MWMA). The MWMP permits and inspects all medical waste off-site treatment facilities, medical waste transporters, and medical waste transfer stations. This list contains transporters, treatment, and transfer facilities.

Government Publication Date: Dec 31, 2020

Historical Cortese List:

[HIST CORTESE](#)

List of sites which were once included on the Cortese list. The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements for providing information about the location of hazardous sites.

Government Publication Date: Nov 13, 2008

Cease and Desist Orders and Cleanup and Abatement Orders:

[CDO/CAO](#)

The California Environment Protection Agency "Cortese List" of active Cease and Desist Orders (CDO) and Cleanup and Abatement Orders (CAO). This list contains many CDOs and CAOs that do NOT concern the discharge of wastes that are hazardous materials. Many of the listed orders concern, as examples, discharges of domestic sewage, food processing wastes, or sediment that do not contain hazardous materials, but the Water Boards' database does not distinguish between these types of orders.

Government Publication Date: Feb 16, 2012

California Environmental Reporting System (CERS) Hazardous Waste Sites:

[CERS HAZ](#)

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

Government Publication Date: Feb 9, 2021

Delisted Environmental Reporting System (CERS) Hazardous Waste Sites:

[DELISTED HAZ](#)

This database contains a list of sites that were removed from the California Environmental Protection Agency (CalEPA) in the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator.

Government Publication Date: Nov 29, 2018

Sites in GeoTracker:

[GEOTRACKER](#)

GeoTracker is the State Water Resource Control Boards' data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater. This is a list of sites in GeoTracker that aren't otherwise categorized as LUST, Land Disposal Sites (LDS), Cleanup Sites, or sites having Waste Discharge Requirements (WDR). This listing includes program types such as Underground Injection Control (UIC), Confined Animal Facilities (CAF), Irrigated Lands Regulatory Program, plans, and non-case information.

Government Publication Date: Mar 9, 2021

Mines Listing:

[MINE](#)

This list includes mine site locations extracted from the Mines Online database, maintained by the California Department of Conservation. Mines Online (MOL) is an interactive web map designed with GIS features that provide information such as the mine name, mine status, commodity sold, location, and other mine specific data. Please note: Mine location information is provided to assist experts in determining the location of mine operators in accordance with California Civil Code section 1103.4 and reflects information reported by mine operators in annual reports provided under Public Resources Code section 2207. While the Division of Mine Reclamation (DMR) attempts to populate MOL with accurate location information, the DMR cannot guarantee the accuracy of operator reported location information.

Government Publication Date: Jan 12, 2021

Recorded Environmental Cleanup Liens:

[LIEN](#)

The California Department of Toxic Substance Control (DTSC) maintains this list of liens placed upon real properties. A lien is utilized by the DTSC to obtain reimbursement from responsible parties for costs associated with the remediation of contaminated properties.

Government Publication Date: Nov 16, 2020

Waste Discharge Requirements:

[WASTE DISCHG](#)

List of sites in California State Water Resources Control Board (SWRCB) Waste Discharge Requirements (WDRs) Program in California, made available by the SWRCB via GeoTracker. The WDR program regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

Government Publication Date: Mar 9, 2021

Toxic Pollutant Emissions Facilities:

[EMISSIONS](#)

A list of criteria and toxic pollutant emissions data for facilities in California made available by the California Environmental Protection Agency - Air Resources Board (ARB). Risk data may be based on previous inventory submittals. The toxics data are submitted to the ARB by the local air districts as requirement of the Air Toxics "Hot Spots" Program. This program requires emission inventory updates every four years.

Government Publication Date: Dec 31, 2018

Clandestine Drug Lab Sites:

[CDL](#)

The Department of Toxic Substances Control (DTSC) maintains a listing of drug lab sites. DTSC is responsible for removal and disposal of hazardous substances discovered by law enforcement officials while investigating illegal/ clandestine drug laboratories.

Government Publication Date: Jan 19, 2021

Tribal

No Tribal additional environmental record sources available for this State.

County

Riverside County - Hazardous Waste Generator Sites List:

[RIVERSIDE HWG](#)

A list of Hazardous Waste Generator Sites in the County of Riverside. This list is made available by Riverside County Department of Environmental Health which has been designated as the CUPA for the County.

Government Publication Date: Mar 23, 2021

Riverside County - Disclosure Facility List:

[RIVERSIDE HZH](#)

A list of facilities disclosed to Riverside County Department of Environmental Health (DEH). This list is made available by Riverside County DEH which has been designated as the CUPA for the County. A business is required to establish and submit a Business Plan if the facility handles hazardous material equal to or greater than 55 gallons, 500 pounds or 200 cubic feet at any time during the year.

Government Publication Date: Mar 23, 2021

Riverside County - Medical Waste Facilities:

[RIVERSIDE MED WSTE](#)

This list of active and inactive medical waste facilities is maintained by the County of Riverside Department of Environmental Health.

Government Publication Date: Sep 1, 2020

Riverside County - California Accidental Release Prevention Program Sites:

[RIVERSIDE RMP](#)

This list of Riverside County California Accidental Release Prevention Program sites is maintained by the County of Riverside Department of Environmental Health. AB 3777 was enacted in 1986 to minimize potential emergencies involving acutely hazardous materials by requiring facilities which handle these materials to submit Risk Management Prevention Plans. The Riverside County Department of Environmental Health Hazardous Materials Branch began implementation of this Program County-wide in January 1991. All cities within Riverside County are included in this list.

Government Publication Date: Jul 29, 2020

San Bernardino County - Medical Waste Facility List:

[SANBERN MED WSTE](#)

This list of San Bernardino County medical waste facilities is maintained by the County of San Bernardino Department of Public Health Medical Waste Program. The Medical Waste Program regulates generators of medical waste based on the Medical Waste Management Act. The program inspects medical waste facilities, facilities with on-site medical waste treatment units, and common storage areas annually. This program also investigates complaints regarding mishandling of medical waste and facilities that may be operating without a valid health permit. Some facilities that may generate medical waste include hospitals, skilled nursing facilities, blood banks, and doctors, dental and veterinarian offices.

Government Publication Date: Dec 22, 2020

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

Demographic Profile

EJSCREEN EJ Indexes

Eleven primary environmental justice (EJ) indexes of EJSCREEN, EPA's screening tool for EJ concerns. EPA uses these indexes to identify geographic areas that may warrant further consideration or analysis for potential EJ concerns. The index values below are for the Census block group in which the facility is located. Note that use of these indexes does not designate an area as an "EJ community" or "EJ facility." EJSCREEN provides screening level indicators, not a determination of the existence or absence of EJ concerns. For more information, see the [EJSCREEN home page](#).

Census Block Group EJ Indexes (percentile)	
Particulate Matter (PM 2.5)	99.1
Ozone NATA Diesel PM	99.2
NATA Air Toxics Cancer Risk	98.2
NATA Respiratory Hazard Index (HI)	98.3
Traffic Proximity	75.2
Lead Paint Indicator	66.7
Superfund Proximity	90.2
Risk Management Plan (RMP) Proximity	89.1
Hazardous Waste Proximity	83.2
Wastewater Discharge Proximity	96.4

Number of EJ Indexes Above 80th Percentile

[View EJSCREEN Report](#)

Demographic Profile of Surrounding Area (3 Miles)

This section provides demographic information regarding the community surrounding the facility. ECHO compliance data alone are not sufficient to determine whether violations at a particular facility had negative impacts on public health or the environment. Statistics are based upon the 2010 U.S. Census and 2006-2010 American Community Survey 5-Year Summary and are accurate to the extent that the facility latitude and longitude listed below are correct. EPA's spatial processing methodology considers the overlap between the selected radii and the census blocks (for U.S. Census demographics) and census block groups (for ACS demographics) in determining the demographics surrounding the facility. For more detail about this methodology, see the [DFR Data Dictionary](#).

EPA Map of Radon Zones

LEGEND

Dark Red	Zone 1
Orange	Zone 2
Yellow	Zone 3

Zone designation for Puerto Rico is under development.

The purpose of this map is to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. This map is not intended to be used to determine if a home in a given zone should be tested for radon. Homes with elevated levels of radon have been found in all three zones. All homes should be tested regardless of geographic location.

IMPORTANT : Consult the EPA Map of Radon Zones document (EPA-402-R-93-071) before using this map. This document contains information on radon potential variations within counties. EPA also recommends that this map be supplemented with any available local data in order to further understand and predict the radon potential of a specific area.

Basemap: USGS National Map: Orthoimagery: Data refreshed October, 2020

This map complies with FEMA's standards for the use of digital flood maps if it is not void as described below. The basemap shown complies with FEMA's basemap accuracy standards

The flood hazard information is derived directly from the authoritative NFHL web services provided by FEMA. This map was exported on 4/12/2021 at 11:45 PM and does not reflect changes or amendments subsequent to this date and time. The NFHL and effective information may change or become superseded by new data over time.

This map image is void if the one or more of the following map elements do not appear: basemap imagery, flood zone labels, legend, scale bar, map creation date, community identifiers, FIRM panel number, and FIRM effective date. Map images for unmapped and unmodernized areas cannot be used for regulatory purposes.

San Bernardino County Southwestern Part, California

Hr—Hilmar loamy fine sand

Map Unit Setting

National map unit symbol: hck6
Elevation: 540 to 890 feet
Mean annual precipitation: 11 to 15 inches
Mean annual air temperature: 63 to 65 degrees F
Frost-free period: 320 to 365 days
Farmland classification: Prime farmland if irrigated

Map Unit Composition

Hilmar and similar soils: 85 percent
Minor components: 15 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Hilmar

Setting

Landform: Alluvial fans
Landform position (three-dimensional): Tread
Down-slope shape: Linear
Across-slope shape: Linear
Parent material: Alluvium derived from granite

Typical profile

A - 0 to 13 inches: loamy fine sand
C1 - 13 to 16 inches: loamy sand
C2 - 16 to 23 inches: loamy sand
2C - 23 to 60 inches: stratified loam to sandy loam

Properties and qualities

Slope: 0 to 2 percent
Depth to restrictive feature: More than 80 inches
Drainage class: Somewhat poorly drained
Runoff class: Medium
Capacity of the most limiting layer to transmit water (Ksat): Moderately high to high (0.60 to 2.00 in/hr)
Depth to water table: More than 80 inches
Frequency of flooding: Rare
Frequency of ponding: None
Calcium carbonate, maximum content: 5 percent
Maximum salinity: Very slightly saline to moderately saline (2.0 to 8.0 mmhos/cm)
Available water capacity: Moderate (about 8.7 inches)

Interpretive groups

Land capability classification (irrigated): None specified
Land capability classification (nonirrigated): 4w
Hydrologic Soil Group: B

Hydric soil rating: No

Minor Components

Delhi

Percent of map unit: 10 percent

Landform: Alluvial fans

Landform position (three-dimensional): Tread

Down-slope shape: Linear

Across-slope shape: Linear

Hydric soil rating: No

Tujunga, loamy sand

Percent of map unit: 5 percent

Landform: Alluvial fans

Landform position (three-dimensional): Tread

Down-slope shape: Linear

Across-slope shape: Linear

Hydric soil rating: No

MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:24,000.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service

Web Soil Survey URL:

Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: San Bernardino County Southwestern Part, California

Survey Area Data: Version 12, May 27, 2020

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: May 10, 2018—Jun 5, 2018

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

WATER CONSERVATION

As a reminder to residents, the city of Chino has permanent water conservation measures in place which include but are not limited to prohibition of the following:

- ✓ Allowing irrigation water to run off into a gutter, ditch, drain, driveway, sidewalk, street or onto pavement or other hard surface.
- ✓ Outdoor irrigation of landscape for more than minutes of watering per day per station.
- ✓ Automated irrigation of landscape during the hours of six a.m. to eight p.m.
- ✓ Outdoor irrigation of landscape on rainy days.
- ✓ Washing down hard or paved surfaces.
- ✓ Washing of automobiles, trucks, trailers, boats, airplanes, and other types of mobile equipment, unless done with a hand held bucket or hand held hose equipped with a positive shutoff nozzle for quick rinses.

Please call the city's water conservation hotline at (909) 334-3282 to get more information about water conservation or to report prohibited water use. Also, visit the following websites to learn more about saving water:

www.bewaterwise.com

www.cbwcd.org

To learn more about water saving rebates visit www.socalwatersmart.com.

COMMENTS OR QUESTIONS

If you have questions regarding the quality of your water or the information contained in this report, please contact Uchenna Ezea, at (909) 334-3441, 7:00 a.m. to 3:00 p.m., Monday through Thursday. Written inquiries may be sent to: city of Chino, Public Works - Water section, P.O. Box 667, Chino, CA 91708, Attention: Uchenna Ezea.

The public is encouraged to participate in discussions concerning the city's drinking water. Meetings of the Chino city council are typically scheduled on the second and third Tuesday of each month beginning at 7:00 p.m. at city hall, 13220 Central Avenue in Chino, California.

Please share this information with all other people who drink this water, especially those who may not have received this report directly. If you are a landlord or manage a multi-unit dwelling, please contact us at (909) 334-3265 to request additional copies of this report to ensure your tenants receive this important information.

Report your observations of prohibited water use by calling the city's water conservation hotline at (909) 334-3282 or by completing an online report on the city's website: www.cityofchino.org/residents/report_a_concern.

cityofchino

2019 Consumer

The city of Chino is pleased to provide you with this Annual Water Quality Report, also known as the Consumer Report. In accordance with state requirements, this report is intended to provide you, the consumer, with information regarding the quality of drinking water the city of Chino provided in 2019. In this report you will find important information on our water sources and water conservation. This report can also be found on the city's website: www.cityofchino.org/waterqualityreport. The title of these annual reports has been adjusted to match the year in which the city provided your drinking water supply.

OUR CLEAN WATER SUPPLY

The city of Chino's drinking water supply is a blend of surface water (rivers, lakes, streams) and groundwater (wells). Surface water is imported from Northern California by the Metropolitan Water District (MWD) of Southern California via the State Water Project aqueduct, and is treated at the Agua de Lejos Water Treatment Plant located in Upland. Groundwater supplies are extracted via local wells operated by the city of Chino or by the Chino Basin Desalter Authority (CBA). In 2019, treated groundwater represented approximately 69% of your drinking water supply, while the remaining 31% was produced by the Agua de Lejos Water Treatment Plant.

Source water assessments were conducted in 2001, 2007 and 2017 to determine the contamination vulnerabilities of the city of Chino's active wells. You may request a summary of the assessments by contacting the State Water Resources Control Board Division of Drinking Water (SWRCB-DDW) District Engineer at (909) 383-4328.

WATER QUALITY REGULATIONS

The Federal Safe Drinking Water Act requires the United States Environmental Protection Agency (USEPA) to safeguard drinking water by establishing standards that limit the amount of contaminants in drinking water. In California, the SWRCB-DDW also safeguards drinking water by establishing standards that are at least as stringent as the USEPA standards. One of the various State and Federal standards are found within this report. More information about contamination and potential health effects can be obtained by calling the USEPA's Safe Drinking Water Hotline (1-800-426-4791). In 2019, drinking water supplied by the city of Chino met all State and Federal drinking water health standards.

WATER TREATMENT FACILITY EXPANSION

The city of Chino is currently in the design phase of expanding our water treatment capabilities at our Eastside Water Treatment Facility. This Project will double the facility's maximum daily groundwater production from 5 million gallons per day (MGD) to 10 MGD. The expansion will include additional ion exchange and carbon units which will be plumbed into existing reservoirs located at the Eastside Facility. This expansion will help serve the southern portion of our water distribution system by maximizing our groundwater resource and reducing the city's reliance on imported water.

WATER QUALITY MONITORING

The city of Chino safeguards its water supply by exceeding the monitoring frequency required by the USEPA and SWRCB-DDW. The city of Chino's drinking water sources (local wells and imported water) are monitored for contaminants such as organic compounds, inorganic compounds, microorganisms, radionuclides, and aesthetic-related contaminants. The city of Chino's water distribution system is also monitored at various locations to ensure good water quality throughout the system. In 2019, the city's water supply was tested for contaminants at

The SWRCB-DDW allows certain supply sources and contaminants to be monitored less than once per year because the concentrations of these contaminants do not change frequently. Although the city's water supply was tested for more than two-hundred contaminants in 2018, regulations require the report to describe only the contaminants that were detected. The water quality data is typically reported in parts per billion (ppb), which is the equivalent of micrograms per liter (µg/L), or otherwise as listed under the units sub-heading.

IMPORTANT HEALTH INFORMATION

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons, such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly persons, and infants, can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. USEPA Centers for Disease Control (CDC) guidelines describing appropriate means to lessen the risk of infection caused by *cryptosporidium* and other contaminants are available from the Safe Drinking Water Hotline at (800) 426-4791.

CONTAMINANTS THAT MAY BE PRESENT IN OUR CLEAN WATER

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally-occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or human activity. Contaminants that may be present in source water include:

- Microbial contaminants, such as viruses and bacteria, that may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife.
- Inorganic contaminants, such as salts and metals, that can be naturally-occurring or result from urban stormwater runoff, industrial or domestic wastewater discharges, oil and gas production, mining, or farming.
- Pesticides and herbicides, that may come from a variety of sources such as agriculture, urban stormwater runoff, and residential uses.

- Organic chemical contaminants, including synthetic and volatile organic chemicals, that are by-products of industrial processes and petroleum production, and can also come from gas stations, urban stormwater runoff, agricultural application, and septic systems.
- Radioactive contaminants, that can be naturally-occurring or be the result of oil and gas production and mining activities.

In order to ensure that tap water is safe to drink, the USEPA and the SWRCB-DDW prescribe regulations that limit the amount of certain contaminants in water provided by public water systems. State Board regulations also establish limits for contaminants in bottled water that provide the same protection for public health.

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. Chino's source waters are blended or treated to yield a combined product that must comply with State and Federal standards.

NITRATE

Nitrate (reported as nitrogen (N) in drinking water at levels above 10 mg/L is a health risk for infants of less than six months of age. Such nitrate levels in drinking water can interfere with the capacity of the infant's blood to carry oxygen, resulting in a serious illness; symptoms include shortness of breath and blueness of the skin. Nitrate levels above 10 mg/L may also affect the ability of the blood to carry oxygen in other individuals, such as pregnant women and those with certain enzyme deficiencies. If you are caring for an infant, or you are pregnant, you should seek advice from your health care provider.

LEAD

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with old pipelines and home plumbing. The city of Chino is responsible for providing high quality drinking water, but cannot control the variety of existing materials used in your household plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you do so, you may want to collect the first water and reuse it for another purpose, such as watering plants. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline at (800) 426-4791, or at <http://www.epa.gov/lead>.

2019 Drinking Water Quality

Contaminant	Units	Year Tested	MCL { NL } <TT>	MCLG (PHG)	GROUNDWATER (CITY WELLS)		GROUNDWATER (CDA)		SURFACE WATER (IMPORTED)		MCL Violation	Possible Sources of Contaminant
					Range	Average	Range	Average	Range	Average		
Primary Standards												
Clarity												
Turbidity	NTU	2018	5.00	NA	0.1 - 0.45	0.28	0.18	0.18	ND - 0.14	0.01	No	Soil run-off
Radionuclides												
Gross Alpha	pCi/l	2018	15	0	.704 - 4.54	2.21	ND	ND	ND - 0.14	1.1	No	Erosion of natural deposits
Gross Beta	pCi/l	2018	50	0	NA	NA	NA	NA	NA	NA	No	Decay of natural and man made deposits
Radium 228	pCi/l	2018	5	(0.019)	NA	NA	NA	NA	NA	NA	No	Erosion of natural deposits
Uranium	pCi/l	2018	20	(0.43)	0.84 - 6.7	2.42	NA	NA	NA	NA	No	Erosion of natural deposits
Inorganic												
Aluminum	ppb	2018	1000	600	ND - 13	13	ND	ND	ND - 52	13	No	Erosion of natural deposits; residue from some surface water treatment processes
Arsenic	ppb	2018	10	(0.004)	1.1 - 1.6	1.4	ND	ND	ND	ND	No	Erosion of natural deposits; runoff from orchards, glass and electronics manufacturing
Chromium	ppb	2018	50	100	5.8 - 12	8.5	ND	ND	NA	NA	No	Erosion of natural deposits; discharge from steel or pulp mills
Flouride	ppm	2018	2	1	0.13 - 0.21	0.16	ND	ND	ND	ND	No	Erosion of natural deposits; water additive that promotes strong teeth; discharge from fertilizer and aluminum factories
Nitrate (as N)	ppm	2019	10	10	0.33 - 6.7	3.12 (a)(b)	4.6	4.6	ND - 2.7	0.9	No	Run-off and leaching from fertilizer use; leaching from septic tank and sewage; erosion of natural deposits
Perchlorate	ppb	2019	6	(1)	ND - 3.2	0.6 (b)	ND	ND	NA	NA	No	Perchlorate is an inorganic chemical used in solid rocket propellants, matches, and a variety of industries. It usually gets into drinking water as a result of environmental contamination from historic aerospace or other industrial operations that used or use, store, or dispose of perchlorate and its salts; Present in some fertilizers
Synthetic Organic												
Dibromochloropropane(DBCP)	ppb	2018	0.2	NA	.012 - .023	0.018	ND	ND	NA	NA	No	Banned nematocide that may still be present in soils due to run-off/leaching from former use on soybeans, cotton, vineyards, tomatoes, and tree fruit
1,2,3-Trichloropropane	ppb	2019	0.005	0.0007	ND	ND (b)	ND	ND	ND	ND	No	Industrial discharges; soil fumigation
Picloram	ppb	2018	500	166	NA	NA	ND	ND	NA	NA	No	Herbicide runoff
Secondary Standards												
Aesthetic												
Aluminum	ppb	2018	1000	600	ND - 13	13	ND	ND	ND - 52	13	No	Erosion of natural deposits; residual from some surface treatment processes
Foaming Agents(MBAS)	ppm	2018	0.5	NA	NA	NA	<0.08	<0.08	ND	ND	No	Municipal and industrial waste discharges
Odor-Threshold	TON	2018	3	NA	1	1	ND	ND	ND - 4.0	1.5	No	Naturally-occurring organic materials
Turbidity	NTU	2018	5.00	NA	0.1 - 0.45	0.28	0.8	0.18	ND - 0.14	0.1	No	Soil run-off
Total Dissolved Solids	ppm	2019	1000	NA	250 - 1000	510	460	460	140 - 280	203	No	Run-off/leaching from natural deposits
	µS/cm	2018	1600	NA	470 - 1300	718	620	620	260 - 530	343	No	Substances that form ions when in water
Copper	ppb	2018	1000	NA	ND - 3	1	ND	ND	NA	NA	No	Internal corrosion of household plumbing; erosion of natural deposits; leaching from wood preservatives
Zinc	ppb	2018	5000	NA	ND - 7.3	1.6	ND	ND	NA	NA	No	Run-off from natural deposits and industrial discharge
Chloride	ppm	2018	250	NA	17 - 91	34	120	120	28 - 93	48	No	Run-off/leaching from natural deposits; seawater
Sulfate	ppm	2018	250	NA	26 - 69	43	5.8	5.8	20 - 39	24	No	Run-off/leaching from natural deposits; industrial wastes
Other Monitored Parameters												
Alkalinity	ppm	2018	NA	NA	150 - 250	177	100	100	38 - 74	57	NA	Naturally-occurring
Bicarbonate	ppm	2018	NA	NA	180 - 300	212	100	100	46 - 90	69	NA	Naturally-occurring
Boron	ppb	2018	NA	NA	24 - 57	31	ND	ND	ND - 100	25	NA	Run-off /leaching from natural deposits; industrial wastes
Calcium	ppm	2018	NA	NA	57 - 150	87	62	62	13 - 20	16	NA	Naturally-occurring
Chromium VI (Hexavalent Chromium)	ppb	2018	NA (c)	0.02	5.6 - 12	8.4	ND	ND	NA	NA	No	Industrial discharges
Magnesium	ppm	2018	NA	NA	11.0 - 35	19	14	14	6.0 - 12.0	8.2	NA	Naturally-occurring
pH	Units	2018	NA	NA	7.32- 7.96	7.74	8	8	7.9 - 8.2	8.1	NA	NA
Potassium	ppm	2018	NA	NA	1.9- 3.2	2.4	1.6	1.6	1.5 - 3.1	2	NA	Naturally-occurring
Sodium	ppm	2018	NA	NA	18 - 34	22	28	28	26 - 61	37	NA	Run-off from natural deposits; seawater
Total Hardness (CaCO3)	ppm	2018	NA	NA	170 - 520	258	210	210	57 - 99	73	NA	Leaching from natural deposits
Total Organic Carbon	ppm	2018	<TT>	NA	NA	NA	ND	ND	1.4 - 2.9	2.1	NA	Various natural and man made sources.
Vanadium	ppb	2018	{50}	NA	NA	NA	NA	NA	ND	ND	No	Naturally-occurring; industrial waste discharges
Distribution System Monitoring												
Microbial	Units	Year Tested	MCL [MRDL]	(MCLG) [MRDLG]	Range	Average	Range	Average	Range	Average	MCL Violation	Possible Sources of Contaminant
Total Coliform Bacteria	%	2019	5.0% (d)	0	0 - 0%	0.00%	2.50%	2.50%	0 - .18%	0.20%	No	Naturally present in the environment
Disinfection Byproducts and Residuals												
TTHMs(Total Trihalomethane)	ppb	2019	80	NA	26 - 96		51.8				No	By-product of drinking water chlorination
Haloacetic acid (HAA5)	ppb	2019	60	NA	1 - 13		7.7				No	By-product of drinking water disinfection
Chlorine	ppm	2019	[4 as CL2]	[4 as CL2]	0.48 - 0.79		0.65				No	Drinking water disinfectant added for treatment
Copper & Lead	Units	Year Tested	AL	PHG	90% Percentile Value	Number of Sites	Sites Exceeding AL	No. of Schools Requesting Samples			AL Violation	Possible Sources of Contaminant
Copper	ppb	2018	1300	(300)	262	33	0	0			No	Internal corrosion of household plumbing
Lead	ppb	2018	15	(0.2)	5.7	33	0	7			No	Internal corrosion of household plumbing

FOOTNOTES

- (a) = This report describes the range of measured nitrate concentration in blended groundwater prior to delivery to the City of Chino's distribution system. The average nitrate concentration is based on an annual average. Nitrate in drinking water at levels above 10 ppm is a health risk for infants of less than six months of age. Such nitrate levels in drinking water can interfere with the capacity of the infant's blood to carry oxygen, resulting in a serious illness; symptoms include shortness of breath and blueness of the skin. Nitrate levels above 10 ppm may also affect the ability of the blood to carry oxygen in other individuals, such as pregnant women. If you are caring for an infant, or you are pregnant, you should seek advice from your health care provider. Nitrate levels may rise quickly for short periods of time because of rainfall or agricultural activity.
- (b) = Based on composite analysis of source production after treatment/blending and prior to delivery to the City of Chino's distribution system.
- (c) = There currently is no MCL for hexavalent chromium. The previous MCL of 0.010 mg/L was withdrawn on September 11, 2017.
- (d) = No more than 5% of monthly water samples shall test positive for coliform bacteria. The "average" is equal to the percentage of positive water samples for coliform bacteria.

WATER QUALITY STANDARDS AND DEFINITIONS

Maximum Contaminant Level (MCL): The maximum amount of a substance that is allowed in drinking water. Primary MCLs are established as close to the PHGs (or MCLGs) as is economically and technologically feasible. Secondary MCLs are established to protect the odor, taste, and appearance of drinking water.

Maximum Contaminant Level Goal (MCLG): The amount of a substance in drinking water below which there is no known or expected potential risk to health. MCLGs are established by the EPA.

Public Health Goal (PHG): The amount of a substance in drinking water below which there is no known or expected potential risk to health. PHGs are established by the California EPA.

Primary Drinking Water Standard: MCLs and MRDLs for contaminants that may affect health. It also includes the monitoring, reporting, and water treatment requirements for these MCLs and MRDLs.

Secondary Drinking Water Standard: MCLs for contaminants that may affect the color, taste, and aesthetic properties of water

Regulatory Action Level (AL): The amount of a substance which, if exceeded, triggers treatment or other requirements that a water system must follow.

Used to provide information to public water systems and others about certain nonregulated chemicals in drinking water that lack maximum contaminant levels (MCLs).

Maximum Residual Disinfection Level (MRDL): The maximum amount of a disinfectant allowed in drinking water. Addition of a disinfectant is required for control of microbial contaminants.

Maximum Residual Disinfectant Level Goal (MRDLG): The amount of a disinfectant added for water treatment below which there is no known or expected potential risk to health. MRDLGs do not consider resulting from the required application of disinfectants to control microbial contaminants.

Treatment Technique (TT): A required process intended to remove or reduce the amount of contaminants in drinking water. TT = 1 NTU

Regulatory Action Level (AL): The amount of a substance which, if exceeded, triggers treatment or other requirements that a water system must follow.

NTU = Nephelometric Turbidity Unit or unit measure of clarity;

pCi/L = picocuries per liter or the measure of radioactivity;

TON = Threshold Odor Number or unit of measure for odor;

µS/cm = microsiemens per centimeter or the measure of electrical conductance;;

ppm = parts per million or milligrams per liter (mg/l);;

ppb = parts per billion or micrograms per liter (µg/l);

ppt = parts per trillion or nanograms per liter (ng/l);

NA = Not Applicable because monitoring is not required or no established standard;

ND = Not Detected in laboratory analysis

APPENDIX G: Qualifications of Environmental Professionals

CONRAD VAN DYKE, EP PROJECT MANAGER/PROPERTY CONDITION ASSESSOR

PROFESSIONAL EDUCATION

B.S. Environmental Sciences, Michigan State University, East Lansing, MI, 2004

CERTIFICATIONS/QUALIFICATIONS

- ◆ Environmental Professional (EP) in Accordance with ASTM E1527-13
- ◆ AHERA Certified Asbestos Building Inspector
- ◆ OSHA 40-Hour Hazardous Waste Operations Certification (29CFR 1910.120) with Annual Refresher

SELECTED EXPERIENCE

Mr. Van Dyke has more than ten years of experience in the environmental due diligence field and has performed and managed hundreds of Phase I Environmental Site Assessment (ESA) projects during his career, including, but not limited to management of multi-site portfolios for a diverse client base in accordance with ASTM E1527, the USEPA All Appropriate Inquiry rules, Fannie Mae Delegated Underwriting Standards, Freddie Mac guidelines, HUD guidelines, NEPA, and other client-specific scopes of work. Mr. Van Dyke also has more than three years of Property Condition Assessment (PCA) experience ranging from large residential complexes to commercial and industrial facilities. His PCA experience includes the review and assessment of building systems (roof, foundation, façade) and associated amenities, generating replacement reserve table and PCA report.

Mr. Van Dyke has experience providing services in asbestos, lead-based paint (LBP), and mold practices and has performed asbestos bulk sampling for renovation and demolition purposes on a variety of structures, including residential, commercial, industrial sites, and schools. In addition to asbestos sampling, he has conducted asbestos abatement oversight on large scale (1 million + sq. ft.) abatement projects. Mr. Van Dyke has also served terms of employment with two State agencies in an environmental regulatory role as well as managed industrial sources air compliance testing and consulting privately.

PROFESSIONAL ORGANIZATIONS

- ◆ Soil & Water Conservation Society, State Board Member

NATIONAL AWARDS

- ◆ Ronald E. McNair Scholar for Environmental Research, Recipient, 1996, 1997

PUBLIC SERVICE

- ◆ City of Fort Collins, Colorado Air Quality Advisory Board

LINDY BREEDON, CES SENIOR PROJECT MANAGER

PROFESSIONAL EDUCATION

B.S. Environmental Science and Physical Geography, Nipissing University, North Bay, Ontario, Canada, 2005

CERTIFICATIONS/QUALIFICATIONS

- ◆ Environmental Professional (EP) in accordance with ASTM E1527-13
- ◆ National Register of Environmental Professionals (NREP) Certified Environmental Scientist (CES)
- ◆ 40-Hour H-301 HazMat Emergency Response Technician Training
- ◆ Termites and Other Wood Destroying Pests Training

SELECTED EXPERIENCE

Ms. Breedon has over 13 years of experience in the due diligence and environmental industries. She currently serves as a Senior Project Manager and is based in the Dallas/Fort Worth area. As a Senior Project Manager, Ms. Breedon's responsibilities include the management of projects for commercial, industrial, and multifamily facilities on tasks involving Phase I Environmental Site Assessments (ESAs) in accordance with ASTM 1527-13 and the USEPA All Appropriate Inquiry (AAI) rules and Property Condition Assessments (PCAs). She is experienced in managing multiple-site portfolio projects that require quick-response and verbal updates, technical support for environmental issues, and discussion of both environmental and property condition assessment findings. In addition to ASTM and AAI guidelines, she is versed in many different agency and lender-specific scopes of work. Finally, Ms. Breedon has also been involved in client relations and personnel management.

PHASE I ESAs

Ms. Breedon has performed hundreds of ESAs nationwide for various industrial, commercial, manufacturing, and oil and gas properties. These assessments include project planning; onsite research and assessment; review and analysis of federal, state, local, and historical records; report preparation; and client consultation. She understands facility operating systems; state and federal regulations; and the fate and transport of chemicals through air, soil, surface water, and groundwater. Ms. Breedon's environmental background includes a detailed understanding of the risks associated with hazardous and regulated materials, underground storage tanks (USTs), polychlorinated biphenyls (PCBs), asbestos-containing materials (ACM), lead-based paint (LBP), mold, and radon.

PROFESSIONAL ORGANIZATIONS

- ◆ North Texas Association of Environmental Professionals
- ◆ Society of Texas Environmental Professionals

VANESSA L. CHAMBERS, LEED AP

SENIOR VICE PRESIDENT, SOUTHERN REGIONAL MANAGER

PROFESSIONAL EDUCATION

B.S. Bioenvironmental Science, Texas A&M University, College Station, TX, 2002

CERTIFICATIONS/QUALIFICATIONS

- ◆ Licensed Asbestos Inspector in the State of Texas, License No. 602314
- ◆ Certified Lead Inspector in the State of Texas, Certification No. 2060752
- ◆ Licensed Mold Assessment Consultant in the State of Texas, License No. MAC0392
- ◆ Leadership in Energy and Environmental Design Accredited Professional (LEED AP)
- ◆ OSHA 40-Hour Hazardous Waste Operations and Emergency Response Certification with Annual Refresher

SELECTED EXPERIENCE

Mrs. Chambers is Senior Vice President and the Southern Regional Manager for Nova, based in the Dallas/Fort Worth area. She has experience with a wide variety of projects ranging from vacant land to industrial manufacturing, Brownfields sites, petroleum facilities, oil/gas properties, and telecommunications sites. As a result of her experience, Mrs. Chambers has become proficient in a variety of environmental services, including environmental site assessments (ESAs), limited site investigations, indoor air quality (IAQ) consulting, asbestos consulting services, activities under the jurisdiction of the National Environmental Policy Act, and regulatory compliance. In addition, Mrs. Chambers oversees the client development and technical delivery functions of the region.

ENVIRONMENTAL SITE ASSESSMENTS (ESAs)

Mrs. Chambers has performed numerous ESAs nationwide on industrial, commercial, and residential facilities under conventional ASTM standards as well as Texas Department of Housing and Community Affairs (TDHCA), Fannie Mae, Freddie Mac, and HUD programs. The performance of ESAs has required a strong understanding of facility operating systems, state and federal regulations, and fate and transport of chemicals through air, soil, surface water, and groundwater.

PHASE II INVESTIGATIONS

Mrs. Chambers has experience scoping and coordinating Phase II projects for a variety of clients. She has experience overseeing projects for sites throughout the United States, most notably in Texas. She has managed projects that received closure through the Texas Commission on Environmental Quality (TCEQ) Innocent Owner/Operator Program (IOP) and Voluntary Cleanup Program (VCP). Her experience also includes Municipal Setting Designations and Brownfields site assessments.

INDOOR AIR QUALITY (IAQ)

Mrs. Chambers has performed hundreds of IAQ assessments on commercial, industrial, and residential facilities. These investigations have included visual inspections, interviews of building occupants, and bulk, surface, and air sampling for VOCs, fungi (molds) and bacteria, respirable dust and formaldehyde, as well as the assessment of the adequacy of ventilation. Following receipt of the laboratory reports, she has interpreted data to prepare a written project report, including recommendations for corrective action. She has also participated in numerous seminars and training courses in indoor air quality. Mrs. Chambers is familiar with IAQ abatement procedures, including visual and analytical clearance standards.

ASBESTOS CONSULTING SERVICES

Mrs. Chambers has performed bulk sampling on numerous buildings to satisfy state and federal regulations for asbestos in public buildings. Surveys performed by Mrs. Chambers have been used to develop site-specific asbestos management plans and asbestos abatement plans and specifications. Mrs. Chambers is licensed as an asbestos inspector through the Texas Department of State Health Services and is proficient in her understanding of applicable rules and regulations.

REGULATORY COMPLIANCE

Mrs. Chambers has assisted and reviewed spill prevention, control, and countermeasure plans (SPCC Plans); industrial wastewater permits; industrial stormwater pollution prevention plans (SWP3); regulatory compliance assessments; stormwater sampling and monitoring reports; and air permitting and compliance reports.

NATIONAL ACCOUNT MANAGEMENT

Mrs. Chambers has managed several national accounts which require oversight of environmental, geotechnical, construction materials, and facilities services. Mrs. Chambers has served as the point of contact for lending institutions, large commercial/real estate institutions, developers, special servicers, and law firms.

PROFESSIONAL ORGANIZATIONS
