Subject: **Phase I Environmental Site Assessment**
13610 Yorba Avenue
Chino, California 91710
AEI Project No. 475849

DRAFT

Dear Tyler Banton:

AEI Consultants is pleased to provide the *Phase I Environmental Site Assessment* of the above referenced property. This assessment was authorized and performed in accordance with the scope of services engaged.

We appreciate the opportunity to provide services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (310) 798-4255 or jjohns@aeiconsultants.com.

Sincerely,
DRAFT
Jennifer Johns
Vice President
AEI Consultants

REPORT VIABILITY

Site Visit	March 13, 2023
Regulatory Database Review	March 2, 2023
Interview(s)	Property Owner: N/A Key Site Manager: March 7, 2023
EP Declaration	March 16, 2023
Environmental Lien Search (if conducted by AEI)	N/A
Report Viability per ASTM E1527-21	August 29, 2023

The dates listed are required for Users who are using the report in connection with CERCLA liability protections. The User may have their own criteria when the report is being used for business risk purposes, and not CERCLA liability protections.

DRAFT

EXECUTIVE SUMMARY

AEI Consultants (AEI) was retained by LI Acquisitions, LLC to conduct a Phase I ESA in conformance with AEI's contract and the scope and limitations of ASTM Standard Practice E1527-21 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), for the property located at 13610 Yorba Avenue, Chino, San Bernardino County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

Pertinent subject property information is noted below:

Property Information	
Site Address(es)	13610 Yorba Avenue, Chino, San Bernardino County, California 91710
Property ID (APN or Block/Lot)	101-950-101 and 101-951-107
Location	Northwest corner of the intersection of Yorba Avenue and Schaefer Avenue
Property Type	Industrial/Manufacturing
Site and Building Information	
Approximate Site Acreage/Source	13.96/Assessor
Number of Buildings	Three
Building Construction Date(s)/Source	1916/Assessor
Building Square Footage (SF)/Source	1,858/Assessor
Number of Floors/Stories	One
Basement or Subgrade Area(s)	Yes; partial basement
Number of Units	N/A
Additional Improvements	The subject property is improved with a single family residence which has been vacant for at least the past 5-1/2 years. The residence contains a large pool area with an emptied in-ground pool. Additionally, the subject property has a horse stable which is no longer in use and a chicken coop. The subject property is developed with a barn which is no longer in use. The northern portion of the subject property has been paved with gravel and is currently in use as a parking lot/ storage area for motor vehicles, primarily diesel trucks.
On-site Occupant(s)	N/A
Current On-site Operations/Use	Chicken Coop and Truck Parking
Current Use of Hazardous Substances	None identified
Regulatory Information	
Regulatory Database Listing(s)	None identified

A chronological summary of historical subject property information is as follows:

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
Prior to 1916	Unknown use/Data failure; refer to Section 1.6.1	Aerial photographs, city directories, topographic maps, agency records
1916	Current residential building constructed (13610 Yorba Avenue)	Agency records
1938-1977	Agricultural land with current farmstead	Aerial photographs
1985-Present	Farmstead on otherwise vacant land	Agency records

DRAFT

The immediately surrounding properties consist of the following:

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
North	Industrial Development (Under Construction) formerly Chino Valley Unified School District (CVUSD) agricultural land (13404 Yorba Avenue)	Yes; refer to Section 5.1
East	Yorba Avenue followed by: Anderson International Trading (13551 Yorba Avenue) Executive Plastics, Inc. (13575 Yorba Avenue) AST Enzymes (13591 Yorba Avenue) Wing Lee Farms (13625 Yorba Avenue) American Beef Packers Inc (13677 Yorba Avenue) Schaefer Avenue followed by: Multi-tenant commercial office (4711 Schaefer Avenue)	Yes; refer to Section 5.1
South	Schaefer Avenue followed by: Diamond Wipes International, Inc. (4651 Schaefer Avenue)	Yes; refer to Section 5.1
West	Schaefer Avenue followed by: ProColor Collision Chino (4590 Schaefer Avenue) Road America (4580 Schaefer Avenue) Inland Countertops, Inc. (4575 Carter Court) So Cal Tint (4560 Schaefer Avenue) Domestic Diesel & Auto Services (4588 Carter Court) Chino Mini Storage (13555 Ramona Avenue) Buena Vista High School (13509 Ramona Avenue)	Yes; refer to Section 5.1

DRAFT

Findings and Opinions

Significant Data Gap(s) is defined by the current ASTM Standard E1527 as a data gap that affects the ability of the environmental professional to identify a recognized environmental condition.

AEI did not identify significant data gaps which affected our ability to identify RECs.

Recognized Environmental Condition (REC) is defined by the current ASTM Standard E1527 as the (1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

- AEI did not identify evidence of RECs during the course of this assessment.

Controlled Recognized Environmental Condition (CREC) is defined by the current ASTM Standard E1527 as a recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).

- AEI did not identify evidence of CRECs during the course of this assessment.

Historical Recognized Environmental Condition (HREC) is defined by the current ASTM Standard E1527 as a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations).

- AEI did not identify evidence of HRECs during the course of this assessment.

Other Environmental Considerations (OEC) warrant discussion, but do not qualify as RECs as defined by the current ASTM Standard E1527. These include, but are not limited to, de minimis conditions and/or environmental considerations such as the presence of ACMs, LBP, radon, mold, and lead in drinking water, which can affect the liabilities and financial obligations of the client, the health and safety of site occupants, and the value and marketability of the subject property. A de minimis condition is defined by the ASTM Standard as a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

- The subject property was historically used for agricultural purposes. There is a potential that agricultural chemicals, such as pesticides, herbicides and fertilizers, were used on site. Based on the presence of the site improvements, no further action related to the former agricultural use of the subject property appears warranted at this time. If redevelopment of the subject property is planned for residential use and the site improvements are removed, exposing unimproved areas, the user of the report should contact the local planning or other applicable oversight agency department to determine whether sampling relating to the former agricultural use of the subject property is required prior to redevelopment activities.
- Due to the age of the subject property buildings, there is a potential that ACMs are present. AEI was not provided access to the interiors of the buildings (buildings were locked and boarded up), therefore the condition of suspect ACMs could not be evaluated. Based on the potential presence of ACMs, AEI recommends the implementation of an O&M Plan which stipulates that the repair and maintenance of damaged materials should be performed to protect the health and safety of the building occupants. In the event that building renovation or demolition activities are planned, a thorough asbestos survey to identify asbestos-containing building materials is required in accordance with the EPA NESHAP 40 CFR Part 61 prior to demolition or renovation activities that may disturb suspect ACMs.

DRAFT

- Due to the age of the subject property buildings, there is a potential that LBP is present. AEI was not provided access to the interiors of the buildings (buildings were locked and boarded up), therefore the condition of interior painted surfaces could not be evaluated. During the site reconnaissance, AEI observed damaged and peeling paint on the exterior of the subject property residence as well as on some of the barn structures. Based on the potential presence of LBP, AEI recommends the property owner implement an O&M Plan which stipulates that the assessment, repair and maintenance of damaged painted surfaces be performed to protect the health and safety of the building occupants. Local regulations may apply to LBP in association with building demolition/renovations and worker/occupant protection. Actual material samples would need to be collected or an x-ray fluorescence (XRF) survey performed in order to determine if LBP is present. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.
- The south adjoining site across Schaefer Avenue, Diamond Wipes International, Inc., is a heavy industrial manufacturer of wet wipes. This facility has various listings detailing the treatment and disposal of liquid and/or semi solid waste as well as seasonal discharge of contaminated water. Additionally, this facility is listed in both the NPDES and CIWQS databases in relation to their industrial storm water discharge. See Section 5.1 for additional details. Further investigation is pending. PFAS are not currently classified by CERCLA as a hazardous substance and thus the potential presence of PFAS does not represent a REC at this time. However, the report User should be aware that regulatory criteria and classifications are subject to change. As such, it would be prudent for the property owner to review future assessment reports associated with this facility to ensure that the subject property is not impacted.

Conclusions

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard Practice E1527-21, of 13610 Yorba Avenue, Chino, San Bernardino County, California, the *subject property*. Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

This assessment has revealed no evidence of recognized environmental conditions, controlled recognized environmental conditions, or significant data gaps in connection with the subject property.

Recommendations

AEI recommends no further investigation for the subject property at this time.

DRAFT

1.0 INTRODUCTION

This report documents the methods and findings of the Phase I Environmental Site Assessment performed in conformance with AEI's contract and scope and limitations of ASTM Standard Practice E1527-21 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), for the property located at 13610 Yorba Avenue, Chino, San Bernardino County, California (Appendix A: Figures and Appendix B: Property Photographs).

1.1 Scope of Work

The purpose of the Phase I ESA is to assist the client in identifying potential RECs, in accordance with the most current ASTM E1527 Standard associated with the presence of any hazardous substances or petroleum products, their use, storage, and disposal at and in the vicinity of the subject property. Property assessment activities focused on: 1) a review of federal, state, tribal, and local databases that identify and describe underground fuel tank sites, leaking underground fuel tank sites, hazardous waste generation sites, and hazardous waste storage and disposal facility sites within the ASTM approximate minimum search distance; 2) a property and surrounding site reconnaissance, and interviews with the past and present owners and current occupants and operators to identify potential environmental contamination; and 3) a review of historical sources to help ascertain previous land use at the site and in the surrounding area.

1.2 Additional Services

Other Environmental Considerations such as ACMs, LBP, lead in drinking water, radon, mold, and wetlands can result in business environmental risks for property owners which may disrupt current or planned operations or cash flow and are generally beyond the scope of a Phase I assessment as defined by the current ASTM Standard E1527. Based upon the agreed-on scope of services this ESA did not include subsurface or other invasive assessments, business environmental risks, or other services not specifically identified and discussed herein.

1.3 Significant Assumptions

The following assumptions are made by AEI in this report. AEI relied on information derived from secondary sources including governmental agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, and personal interviews. AEI has reviewed and evaluated the thoroughness and reliability of the information derived from secondary sources including government agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, or personal interviews. It appears that all information obtained from outside sources and reviewed for this assessment is thorough and reliable. However, AEI cannot guarantee the thoroughness or reliability of this information.

Groundwater flow, unless otherwise specified by on-site well data or well data from the subject property or nearby sites, is inferred from contour information depicted on the USGS topographic maps. AEI assumes the property has been correctly and accurately identified by the client, designated representative of the client, property contact, property owner, and property owner's representatives.

DRAFT

1.4 LIMITATIONS

Property conditions, as well as local, state, tribal, and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this assessment apply strictly to the environmental regulations and property conditions existing at the time the assessment was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the property. AEI makes no warranty, expressed or implied, except that the services have been performed in accordance with generally accepted environmental property assessment practices applicable at the time and location of the assessment.

Considerations identified by ASTM as beyond the scope of a Phase I ESA that may affect business environmental risk at a given property include the following: ACMs, radon, LBP, lead in drinking water, wetlands, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, mold, and high voltage lines. These environmental issues or conditions may warrant assessment based on the type of the property transaction; however, they are considered non-scope issues under the current ASTM Standard E1527.

If requested by the client, these non-scope issues are discussed herein. Otherwise, the purpose of this assessment is solely to satisfy one of the requirements for qualification of the innocent landowner defense, contiguous property owner or bona fide prospective purchaser under CERCLA. The current ASTM Standard E1527 and the United States EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) constitute the "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in:

1. 42 U.S.C. § 9601(35)(B), referenced in the current ASTM Standard E1527.
2. Sections 101(35)(B) (ii) and (iii) of CERCLA and referenced in the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312).
3. 42 U.S.C. § 9601(40) and 42 U.S.C. § 9607(q).

The Phase I Environmental Site Assessment is not, and should not be construed as, a warranty or guarantee about the presence or absence of environmental contaminants that may affect the property. Neither is the assessment intended to assure clear title to the property in question. The sole purpose of assessment into property title records is to ascertain a historical basis of prior land use. All findings, conclusions, and recommendations stated in this report are based upon facts, circumstances, and industry-accepted procedures for such services as they existed at the time this report was prepared (i.e., federal, state, and local laws, rules, regulations, market conditions, economic conditions, political climate, and other applicable matters). All findings, conclusions, and recommendations stated in this report are based on the data and information provided, current subject property use, and observations and conditions that existed on the date and time of the property reconnaissance.

Responses received from local, state, or federal agencies or other secondary sources of information after the issuance of this report may change certain facts, findings, conclusions, or circumstances to the report. A change in any fact, circumstance, or industry-accepted procedure upon which this report was based may adversely affect the findings, conclusions, and recommendations expressed in this report.

DRAFT

AEI's limited radon screening, if included, is intended to provide a preliminary screening to evaluate the potential presence of elevated radon concentrations at the site. The proposed scope is not intended to define the full extent of the presence of radon at the subject property. As such, the results should be used for lending purposes only. The recommendations and conclusions presented as a result of the limited preliminary radon screening apply strictly to the property conditions existing at the time the sampling was performed. The sample analytical results are only valid for the time, place, and condition of the site at the time of collection and AEI does not warrant that the results will be repeatable or are representative of past or future conditions.

1.5 Limiting Conditions/Deviations

The performance of this assessment was limited by the following:

- While additional assessments may have been conducted on the subject property, these documents must be provided for AEI's review in order for the information to be summarized/included in this report. Please refer to Section 6.3 for a summary of previous reports and other documentation provided to AEI during this assessment.
- The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.
- The subject property owner was not interviewed during this assessment. Based on information obtained from other sources, including the key site manager, this limiting condition is not expected to alter the overall findings of this assessment.
- Due to the size of the subject property, AEI performed a reconnaissance of the property utilizing a field technique of traversing the site in an attempt to provide an overlapping field of view. Due to the size of the property and the vegetation present on site, isolated areas of the site may have not been accessible for direct observation during AEI's field reconnaissance. Based on the quality of information obtained from other sources, this limitation is not expected to significantly alter the findings of this assessment.
- Due to the large volume of materials within portions of the building and vehicles parked within exterior areas, direct visual observation of many of the floor and wall areas of the building and exterior ground surfaces was not possible. Features may be present that were not observed during AEI's field reconnaissance. Based on the quality of information obtained from other sources, this limitation is not expected to significantly alter the findings of this assessment.
- On March 6, 2023, the City of Chino Building and Planning Departments were contacted for information on the subject property in order to identify historical tenants/use, property development, and/or hazardous substance/petroleum product handling. Due to the time frame of this assessment, records were not available for review. However, based on the quality of information obtained from other sources including the San Bernardino County Environmental Health Services, San Bernardino County Fire Protection District, Hazardous Materials Division and the Chino Valley Fire District, this limitation is not expected to significantly alter the findings of this assessment.

DRAFT

1.6 Data Failure and Data Gaps

According to the current ASTM Standard E1527, data gaps occur when the Environmental Professional is unable to obtain information required by the Standard, despite good faith efforts to gather such information. Pursuant to the current ASTM Standard E1527, only significant data gaps, defined as those that affect the ability of the Environmental Professional to identify RECs, need to be documented.

Data failure is one type of data gap. According to the current ASTM Standard E1527, data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met. Pursuant to the current ASTM Standard E1527, historical sources are required to document property use back to the property's first developed use or back to 1940, whichever is earlier, or periods of five years or greater.

1.6.1 Data Failure

The following data failure was identified during the course of this assessment:

Data Failure	The earliest historical resource obtained during this assessment was assessor's office information indicating that the subject property was developed with a residence in 1916. The lack of historical sources for the subject property dating back to first developed use represents historical data source failure. However, as it is assumed that the subject property would have been previously used for residential and/or agricultural purposes, if not undeveloped, this data failure is not expected to significantly alter the findings of this assessment.
Information/Sources Consulted	Aerial photographs, city directories, agency records, previous reports, interviews

1.6.2 Significant Data Gaps

AEI did not identify significant data gaps which affected our ability to identify RECs.

1.7 Reliance

All reports, both verbal and written, are for the benefit of Lovett Industrial, LLC, LI Acquisitions, LLC, Carlyle Investment Management LLC, Carlyle Realty IX, LLC, and their affiliates, joint ventures, investors, lenders, and assigns. This report has no other purpose and may not be relied upon by any other person or entity without the written consent of AEI. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with AEI granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against AEI, its officers, employees, vendors, successors or assigns. Reliance is provided in accordance with AEI's contract and Terms and Conditions executed by LI Acquisitions, LLC on February 28, 2023. The limitation of liability defined in the Terms and Conditions is the aggregate limit of AEI's liability to the client and all relying parties.

DRAFT

2.0 SITE AND VICINITY DESCRIPTION

2.1 Site Location and Description

Property Information	
Site Address(es)	13610 Yorba Avenue, Chino, San Bernardino County, California 91710
Property ID (APN or Block/Lot)	101-950-101 and 101-951-107
Location	Northwest corner of the intersection of Yorba Avenue and Schaefer Avenue
Property Type	Industrial/Manufacturing
Site and Building Information	
Approximate Site Acreage/Source	13.96/Assessor
Number of Buildings	Three
Building Construction Date(s)/Source	1916/Assessor
Building Square Footage (SF)/Source	1,858/Assessor
Number of Floors/Stories	One
Basement or Subgrade Area(s)	Yes; partial basement
Number of Units	N/A
Additional Improvements	The subject property is improved with a single family residence which has been vacant for at least the past 5-1/2 years. The residence contains a large pool area with an emptied in-ground pool. Additionally, the subject property has a horse stable which is no longer in use and a chicken coop. The subject property is developed with a barn which is no longer in use. The northern portion of the subject property has been paved with gravel and is currently in use as a parking lot/ storage area for motor vehicles, primarily diesel trucks.
On-site Occupant(s)	N/A
Current On-site Operations/Use	Chicken Coop and Truck Parking
Current Use of Hazardous Substances	None identified
Regulatory Information	
Regulatory Database Listing(s)	None identified

2.2 On-Site Utilities

Utility	Source/System Information
Heating System	Natural gas
Cooling System	Electricity
Potable Water	City of Chino Utilities
Sewage Disposal/Treatment	City of Chino Utilities

Utility source/system information listed in the table above is provided by the City of Chino, unless otherwise noted above.

DRAFT

2.3 Site and Vicinity Characteristics

The subject property is located in a mixed use industrial and residential area of Chino, California. The immediately surrounding properties consist of the following:

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
North	Industrial Development (Under Construction) formerly Chino Valley Unified School District (CVUSD) agricultural land (13404 Yorba Avenue)	Yes; refer to Section 5.1
East	Yorba Avenue followed by: Anderson International Trading (13551 Yorba Avenue) Executive Plastics, Inc. (13575 Yorba Avenue) AST Enzymes (13591 Yorba Avenue) Wing Lee Farms (13625 Yorba Avenue) American Beef Packers Inc (13677 Yorba Avenue) Schaefer Avenue followed by: Multi-tenant commercial office (4711 Schaefer Avenue)	Yes; refer to Section 5.1
South	Schaefer Avenue followed by: Diamond Wipes International, Inc. (4651 Schaefer Avenue)	Yes; refer to Section 5.1
West	Schaefer Avenue followed by: ProColor Collision Chino (4590 Schaefer Avenue) Road America (4580 Schaefer Avenue) Inland Countertops, Inc. (4575 Carter Court) So Cal Tint (4560 Schaefer Avenue) Domestic Diesel & Auto Services (4588 Carter Court) Chino Mini Storage (13555 Ramona Avenue) Buena Vista High School (13509 Ramona Avenue)	Yes; refer to Section 5.1

2.4 Physical Setting

Geologic Unit: Description/Source	Q: Marine and nonmarine (continental) sedimentary rocks derived from the Pleistocene-Halocene era. This composition consists of alluvium, lake, playa, and terrace deposits; unconsolidated and semi-consolidated mostly nonmarine in nature, but includes marine deposits near the coast./USGS and United States Department of the Interior
Soil Series: Description/Source	Cb: Chino silt loam is a soil composition that lies anywhere from 20 to 3,100 feet in elevation and typically receives 8 to 20 inches of precipitation annually. If properly irrigated, this soil type makes for prime farmland. The soil landform is composed of linear, talf, toeslope basin floors and flood plains of alluvium derived from mixed material. This soil type is somewhat poorly drained and has a medium level runoff class. It is rare for soil of this composition to flood or pond. /USDA Soil Survey
Groundwater Flow Direction/Source	South-southwest/Topographic map interpretation
Estimated Depth to Groundwater/Source	37-50 feet bgs/Case Closure Summary for Chino Automotive Services, 13688 Central Avenue, Chino, CA 91710
Surface waters on the subject property or adjoining sites	None
Additional notes	None

DRAFT

Note: Groundwater flow direction can be influenced locally and regionally by the presence of local wetland features, surface topography, recharge and discharge areas, horizontal and vertical inconsistencies in the types and location of subsurface soils, and proximity to water pumping wells. Depth and gradient of the water table can change seasonally in response to variation in precipitation and recharge, and over time, in response to urban development such as storm water controls, impervious surfaces, pumping wells, cleanup activities, dewatering, seawater intrusion barrier projects near the coast, and other factors.

DRAFT

3.0 HISTORICAL RECORDS REVIEW

Reasonably ascertainable standard historical sources as outlined in the current ASTM Standard E1527 were used to determine previous uses and occupancies of the subject property that are likely to have led to RECs in connection with the subject property. A chronological summary of historical data found, including but not limited to aerial photographs, historical city directories, Sanborn fire insurance maps, and agency records, is as follows:

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
Prior to 1916	Unknown use/Data failure; refer to Section 1.6.1	Aerial photographs, city directories, topographic maps, agency records
1916	Current residential building constructed (13610 Yorba Avenue)	Agency records
1938-1977	Agricultural land with current farmstead	Aerial photographs
1985-Present	Farmstead on otherwise vacant land	Agency records

The subject property was historically used for agricultural purposes. There is a potential that agricultural chemicals, such as pesticides, herbicides and fertilizers, were used on site. If redevelopment of the subject property is planned for residential use and the site improvements are removed, exposing unimproved areas, the user of the report should contact the local planning or other applicable oversight agency department to determine whether sampling relating to the former agricultural use of the subject property is required prior to redevelopment activities.

If available, copies of historical sources are provided in Appendix D.

3.1 AERIAL PHOTOGRAPHS

AEI reviewed aerial photographs of the subject property and surrounding area. A search was made of the EDR collection of aerial photographs. Aerial photographs were reviewed for the following years (1938-2016, non-inclusive):

Year(s)	Subject Property Description	Adjoining Site Descriptions
1938	Current residential dwelling present on the central eastern edge of the property. Northern portion of the property developed with agricultural orchards. Southern portion of subject property remains vacant	NORTH: Agricultural land EAST: Roadway followed by agricultural land SOUTH: Roadway followed by agricultural land as well as two residential dwellings WEST: Agricultural land
1946, 1948, 1953	Previous orchards and vacant land redeveloped with row crops; residence remained unchanged	NORTH: No significant changes EAST: No significant changes SOUTH: No significant changes WEST: No significant changes
1959	Corral added onto the western edge of the subject property residence	NORTH: No significant changes EAST: No significant changes SOUTH: Additional residential dwelling constructed across roadway, otherwise no significant changes WEST: No significant changes
1964	No significant changes	NORTH: Residential dwelling constructed on otherwise agricultural land EAST: Roadway followed by agricultural land as well as a single commercial/industrial

DRAFT

Year(s)	Subject Property Description	Adjoining Site Descriptions
		building SOUTH: No significant changes WEST: No significant changes
1966	Previous coral separated into smaller corrals/stables.	NORTH: No significant changes EAST: Roadway followed by both agricultural and vacant land as well as previous commercial/industrial building SOUTH: Previous agricultural land largely cleared into what appears to be a track WEST: No significant changes
1975	Northern portion of subject property cleared and graded, otherwise no significant changes	NORTH: No significant changes EAST: Roadway followed by agricultural land as well as two commercial/industrial buildings SOUTH: Previous track redeveloped agriculturally WEST: No significant changes
1977	Previous corrals expanded northward and additional building constructed, otherwise no significant changes	NORTH: No significant changes EAST: No significant changes SOUTH: No significant changes WEST: No significant changes
1985, 1989, 1994	All previous agricultural land cleared and graded; previous residence still present	NORTH: No significant changes EAST: Roadway followed by several industrial buildings SOUTH: Roadway followed by vacant land as well as the current large industrial building WEST: Vacant land as well as two commercial/industrial buildings and a storage center
2002, 2005	Dirt race track developed on the northern portion of property; otherwise no significant changes	NORTH: Dirt race track developed on property; previous residence still present EAST: No significant changes SOUTH: Roadway followed by current industrial buildings WEST: Current commercial/industrial buildings as well as a storage center
2009, 2012, 2016	Former racetrack no longer present, otherwise no significant changes	NORTH: Former track and residential dwelling no longer present; cleared graded land EAST: No significant changes SOUTH: No significant changes WEST: No significant changes

Subject property:

- Agricultural land - Refer to Section 3.0

Adjoining Site(s):

- Large-scale industrial facilities - Refer to Section 5.1

DRAFT

3.2 Sanborn Fire Insurance Maps

Sanborn Fire Insurance maps were developed in the late 1800s and early 1900s for use as an assessment tool for fire insurance rates in urbanized areas. A search was made of the EDR collection of Sanborn Fire Insurance maps.

Sanborn map coverage was not available for the subject property.

3.3 City Directories

A search of historical city directories was conducted for the subject property utilizing EDR. No potential tenants of concern were identified based on AEI's review of the historical city directories. Directories were reviewed in approximate five-year increments from 1922-2017, non-inclusive. The first listing for the subject property appeared in 1965. The following table summarizes the results of the city directory search.

Subject Property

Year(s)	Address - Occupant Listed
1965	13610 Yorba Avenue - George Putnam
1999	13610 Yorba Avenue - Alonso Sarabia
2003	13610 Yorba Avenue - George Putnam, Alonso Sarabia
2004, 2009, 2014	13610 Yorba Avenue - Alonso Sarabia

If listed above, XXXX indicates that the address is valid but there is no occupancy information available.

A search of historical city directories was also conducted for the adjoining sites noted below utilizing EDR. Please refer to the appendices for a complete list of historical adjoining site tenants identified by EDR. The table below summarizes the potential tenants of concern based on AEI's review of the historical city directories.

Adjoining Site Addresses

Direction	Address(es)
North	N/A
East	13551-13677 Yorba Avenue, 4711 Schaefer Avenue
South	4651 Schaefer Avenue
West	4525 and 4590 Schaefer Avenue, 4575 and 4588 Carter Court, 13509 and 1355 Ramona Avenue

3.4 Historical Topographic Maps

In an attempt to close any data failure, AEI reviewed historical topographic maps utilizing EDR. Historical topographic maps were reviewed for the years 1897-1982, non-inclusive. No additional historical information was obtained from available topographic maps.

3.5 Chain of Title

Based on the quality of information obtained from other sources, a chain of title search was not performed as part of this assessment.

DRAFT

4.0 REGULATORY AGENCY RECORDS REVIEW

Local and state agencies, such as environmental health departments, fire prevention bureaus, and building and planning departments are contacted to identify any current or previous reports of hazardous substance use, storage, and/or unauthorized releases that may have impacted the subject property. In addition, information pertaining to AULs, defined as legal or physical restrictions, or limitations on the use of, or access to, a site or facility, is requested.

4.1 Local Environmental Health Department and/or State Environmental Agency

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
San Bernardino County Environmental Health Services (SBCEHS)	March 6, 2023	Online	N/A	No records on file

4.2 Fire Department

SWRCB GeoTracker Historical Hazardous Substance Storage Information	March 10, 2023	Online	N/A	No records on file
CA Department of Toxic Substances Control (DTSC) Hazardous Waste Tracking System (HWTS)	March 10, 2023	Online	N/A	No records on file
CA DTSC EnviroStor	March 10, 2023	Online	N/A	No records on file
CalEPA Regulated Site Portal	March 10, 2023	Online	N/A	No records on file
South Coast Air Quality Management District (AQMD)	March 10, 2023	Online	N/A	No records on file

No other agencies were contacted during the course of this assessment.

4.7 Oil and Gas Wells

Agency	Date Referenced	Resource	Oil or gas wells located within 500 feet of the subject property
California Geologic Energy Management Division	March 10, 2023	CalGEM Map	No

4.8 Oil and Gas Pipelines

Agency	Date Referenced	Resource	Pipelines located within 500 feet of the subject property
National Pipeline Mapping System (NPMS)	March 10, 2023	NPMS Public Map Viewer	No

4.9 State Environmental Superliens

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state environmental superliens.

4.10 State Property Transfer Laws

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state property transfer laws.

DRAFT

5.0 REGULATORY DATABASE RECORDS REVIEW

AEI contracted EDR to conduct a search of publicly available information from federal, state, tribal, and local databases containing known and suspected sites of environmental contamination and sites of potential environmental significance. Data gathered during the current regulatory database search is compiled by EDR into one regulatory database report. Location information for listed sites is designated using geocoded information provided by federal, state, or local agencies and commonly used mapping databases with the exception of "Orphan" sites. Due to poor or inadequate address information, Orphan sites are identified but not geocoded/mapped by EDR, rather, information is provided based upon vicinity zip codes, city name, and state. The minimum search distance from the federal and state environmental records database listings specified in the current ASTM Standard E1527 is included in Section 5.1. A copy of the regulatory database report, which includes detailed descriptions of the databases noted below as well as the total number of sites identified, is included in Appendix C of this report.

In determining if a listed site is a potential environmental concern to the subject property, AEI generally applies the following criteria to classify the site as lower potential environmental concern: 1) the site only holds an operating permit (which does not imply a release), 2) the site's distance from, and/or topographic position relative to, the subject property, and/or 3) the site has recently been granted "No Further Action" by the appropriate regulatory agency.

Regulatory database listings associated with the subject property, adjoining site(s) and/or nearby sites of concern that were determined to warrant additional discussion are identified and further discussed in Section 5.1.

DRAFT

5.1 RECORDS SUMMARY

Database	Search Distance (Miles)	Subject Property	Adjoining Site(s)	Other Nearby Sites of Concern
Federal NPL (Superfund) sites	1.0

Facility Name	CVUSD Yorba Property
Address	31512 Yorba Avenue
Distance & Direction	Adjoining to the North
Hydrologic Position	Up-gradient
Databases Listed	RCRA NONGEN/NLR
Comments	Details provided for the RCRA Non Generator (NONGEN)/No Longer Regulated (NLR) listing identified the site as "not a generator, verified" in 2006. The NAICS Description provided for the business is "new housing operative builders". No violations were identified in connection with the RCRA listing. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern.

Facility Name	ESM Plastics
Address	13575 Yorba Avenue
Distance & Direction	Adjoining to the East across Yorba Avenue
Hydrologic Position	Up-gradient
Databases Listed	SAN BERN CO. PERMIT
Comments	E S M Plastics was issued a special generator permit by San Bernardino County due to its storage and handling of special chemicals and hazardous materials. All permits have since expired as of the issuance of this report. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern.

Facility Name	American Lamb, Wing Lee Farms
Address	13625 Yorba Avenue
Distance & Direction	Adjoining to the East across Yorba Avenue
Hydrologic Position	Up-gradient
Databases Listed	SWEEPS UST, CA FID UST, HIST UST, SAN BERN. CO. PERMIT
Comments	According to the regulatory database, a diesel fuel UST of unknown capacity was previously located at this facility. The database lists the UST as becoming active on July 1, 1985. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern.

Facility Name	Specialty Enzymes & Biochemicals
Address	13591 Yorba Avenue
Distance & Direction	Adjoining to the east across Yorba Avenue
Hydrologic Position	Up-gradient
Databases Listed	SAN BERN CO. PERMIT

DRAFT

Comments	Specialty Enzymes & Chemicals was issued a hazmat handler permit for facilities operating with 11-25 employees San Bernardino County. This permit has been expired since March 31, 2012. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern.

Facility Name	American Beef Packers Inc., Vandereyk Case. Atlas Meat
Address	13677 Yorba Avenue
Distance & Direction	Adjoining to the east across Yorba Avenue
Hydrologic Position	Up-gradient
Databases Listed	RCRA NONGEN/NLR, SWEEPS UST, CA FID UST, HIST UST, CHMIRS, NPDES, CERS, CERS HAZ WASTE, SAN BERN. CO. PERMIT
Comments	According to the regulatory database, this site was equipped with one (1) 3,000-gallon unleaded gasoline UST as well as one 5,000-gallon diesel UST which were installed on 1984. Although these USTs are listed in the HIST UST database, they are also listed in both the SWEEPS UST and CA FID UST databases as "active." No releases have been reported in association with this UST. Due to the lack of a documented release, the storage of hazardous materials within registered tanks is not a significant environmental concern. According to the regulatory database, this site is listed as a NPDES site for a basic industrial storm water discharge permit which was issued on November 13, 2008 and remains active as of the issuance of this report. No violations are reported in association with this permit. Based on the lack of reported violations, this listing is not expected to represent a significant environmental concern. Atlas Meat was listed as a CERS and CERS HAZ WASTE facility for its use as a chemical storage facility and hazardous waste generator, respectively. This facility received various citation notices between 2010 and 2022 for failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities, failure to properly label hazardous waste accumulation containers and portable tanks, failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method, and various other administrative violations; all violations have since been returned to compliance. Details provided for the RCRA Non Generator (NONGEN)/No Longer Regulated (NLR) listing identified American Beef Packers Inc as "not a generator, verified" in 2009. The NAICS Description provided for the business is "animal (except poultry) slaughtering". No violations were identified in connection with the RCRA listing. American Beef Packers Inc was granted permits by San Bernardino County for its operation as a large quantity generator, hazardous material operator, and EPCRA facility. All permits pertaining to this facility expired on September 30, 2022 and remain inactive as of the issuance of this report. As such, these permits are not expected to be of significant environmental concern. According to the regulatory database, this site is listed as a CHMIRS site due to an incident which occurred on September 12, 2013. According to the database, a called called the Chino Valley Fire District stated that the main valve failed on a large collection trailer which resulted in the release of about 200 gallons of a mixture of cow blood and water. The release left private property, went

DRAFT

	out onto the street, then into a storm drain that runs to Chino Creek but the City of Chino Public Works stopped the flow by using sandbags before the release could impact the creek. A third party company was contracted to perform cleanup on the scene and the release was contained. Based on the lack of a documented release of hazardous substances and/or petroleum products, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern.

Facility Name	Avalon Holding Company LLC DBA Fix Auto, Avalon USA Holdings 1 LLC DBA ProColor Collision
Address	4590 Schaefer Avenue
Distance & Direction	Adjoining to the west
Hydrologic Position	Down-gradient
Databases Listed	RCRA NONGEN/NLR (x2)
Comments	Details provided for the RCRA Non Generator (NONGEN)/No Longer Regulated (NLR) listing identified the site as "not a generator, verified" in 2017 and 2022. The NAICS Description provided for the business is "automotive body, paint, and interior repair and maintenance". No violations were identified in connection with the RCRA listing. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern.

Facility Name	Diamond Wipes International, Inc.
Address	4651 Schaefer Avenue
Distance & Direction	Adjoining to the north across Schaefer Avenue
Hydrologic Position	Down-gradient
Databases Listed	RCRA-SQG, RCRA-LQG, AST, ICIS, FINDS, ECHO, CHMIRS, NPDES, CIWQS, CERS, CERS HAZ WASTE, EMI, WDS, HAZNET, SAN BERN. CO. PERMIT
Comments	According to the regulatory database, this site is listed as a NPDES and CIWQS site for a basic industrial storm water discharge permit which was issued on August 6, 2010 and expired February 14, 2017. No violations are reported in association with this permit. Based on the lack of reported violations, this listing is not expected to represent a significant environmental concern. This site is also listed as a CHMIRS site due to an incident which occurred on July 21, 2016. According to the database, a caller phoned into the San Bernardino County Fire Department stating that during transit of the substance from receiving to quarantine it was spilled by the forklift driver. This caused the release of approx 200 gallons of citrus terpenes mixed with ethanol. The spill was subsequently halted and contained. Diamond Wipes International, Inc was listed as a RCRA SQG for the generation of hazardous wastes in the years 1993 and 2020 and again as an RCRA LQG in the years 2017 and 2020. The following types of hazardous wastes were identified: ignitable waste and corrosive waste. The NAICS Descriptions provided for the business were "pesticide and other chemical manufacturing, " "pharmaceutical preparation manufacturing," "motor vehicle body manufacturing," and "toilet preparation manufacturing". No violations were identified in connection with the RCRA listing. This property is listed as a FINDS and ECHO site in association with the aforementioned RCRA listings. No violations or enforcement actions were identified on the EPA websites

DRAFT

	Envirofacts and ECHO. Based on the nature of this listings and lack of violations, they are not expected to represent a significant environmental concern. According to the regulatory database, this site is equipped with one (1) 1,455-gallon AST of unknown contents. No releases have been reported in association with this AST. Due to the lack of a documented release, the storage of hazardous materials within registered tanks is not a significant environmental concern. Diamond Wipes International, Inc was listed as a CERS and CERS HAZ WASTE facility for its use as a chemical storage facility and hazardous waste generator, respectively. This facility received various citation notices between 2016 and 2020 for failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities, failure of a large quantity RCRA generator to prepare the Biennial report (Form 8700), and submit to DTSC, failure to submit 2019 - 2020 Annual Report by due date, and various other administrative violations; all violations have since been returned to compliance. Based on the lack of a documented significant release, the review of regulatory agency files for this site was not deemed necessary, and the listings are not expected to represent a significant environmental concern.

Facility Name	Pressroom Solutions, Inc.
Address	4575 Carter Court
Distance & Direction	Adjoining to the west
Hydrologic Position	Down-gradient
Databases Listed	EMI, SAN BERN CO. PERMIT
Comments	Pressroom Solutions, Inc was identified on the EMI regulatory database for the release of two tons of organic hydrocarbon gasses in 1990. No other releases have been reported to the South Coast Air Quality Management District since then. Additionally, in 2010 the facility was issued two permits from the San Bernardino County for operating as an EPCRA facility handling hazmats with no more than 10 employees. According to the database, both permits expired on January 31, 2010 and have not been renewed since. Based on the lack of a documented release to soils or groundwater, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern.

Facility Name	Domestic Diesel and Auto, Local Motivated Transportation InC.
Address	4588 Carter Court
Distance & Direction	Adjoining to the west
Hydrologic Position	Down-gradient
Databases Listed	RCRA NONGEN/NLR, CERS, CERS HAZ WASTE, HWTS, HAZNET, EMI, SAN BERN. CO. PERMIT
Comments	Details provided for the RCRA Non Generator (NONGEN)/No Longer Regulated (NLR) listing identified Domestic Diesel and Auto as "not a generator, verified" in 2017. The NAICS Description provided for the business is "general automotive repair". No violations were identified in connection with the RCRA listing. Local Motivated Transportation, Inc was listed in the HWTS database as a permanent state hazardous waste generator site on July 19, 2017. The property was listed in the HAZNET regulatory database in connection several tons of

DRAFT

hazardous waste produced between the years 2017 and 2022. Among the waste generated were the following: unspecified organic liquid mixtures and unspecified oil containing waste. The waste disposal methods were noted as including of storage. bulking, and/or transfer off site as well as acid regeneration, organics recovery, etc. Several transporters are listed as being responsible for the waste produced at the facility. Among these are: Abury Environmental Services, US Ecology Vernon Inc, and Advanced Environmental Inc. The facility remains active as of the issuance of this report. Additionally, Local Motivated Transportation Inc was listed as a CERS and CERS HAZ WASTE facility for its use as a chemical storage facility and hazardous waste generator, respectively. This facility received various citation notices in 2022 for failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities, failure to properly label hazardous waste accumulation containers and portable tanks, failure to adequately establish and implement a business plan when storing/handling a hazardous material at or above reportable quantities, and various other administrative violations; all violations have since been returned to compliance.

Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern.

5.2 Vapor Migration

AEI reviewed reasonably ascertainable information for the subject and nearby properties, including a regulatory database, files for nearby release sites, and/or historical documentation, to determine if potential vapor-phase migration concerns may be present which could impact the subject property.

AEI did not identify significant on-site concerns and/or regulated listings from nearby sites. A vapor-phase migration concern is not expected to currently exist at the subject property.

5.3 PFAS-Related Regulatory Database Listings (Emerging Contaminants)

As defined in Section 3.2.36 of the current ASTM Standard E1527, hazardous substance means “those substances defined as a hazardous substance pursuant to CERCLA 42 USC § 9601(14), as interpreted by EPA regulations and the courts.” There are some substances that non-environmental professionals and others may assume to be hazardous substances that are not defined (or not yet defined) as hazardous substances under CERCLA, through interpretation by EPA regulations and the courts. These substances may include: (i) some substances that occur naturally or through biological digestion (for example, methane), and (ii) substances about which human understanding is evolving (for example, per- and polyfluoroalkyl substances, also known as “PFAS”). These and any other “emerging contaminants,” where they are not identified as a hazardous substance by CERCLA, as interpreted by EPA regulations and the courts, are not included in the scope of this standard. Some of these substances may be considered a “hazardous substance” (or equivalent) under applicable state laws. In those instances, where a Phase I ESA is performed to satisfy both federal and state requirements, or as directed by the user of the report, it is permissible to include analysis and/or discussion of these substances, in the same manner as any other Non-Scope Consideration. If and when such emerging contaminants are defined to be a hazardous substance under CERCLA, as interpreted by EPA regulations and the courts, such substances shall be evaluated within the scope of this standard.

DRAFT

As an initial screening tool for potential PFAS contamination, AEI reviewed PFAS-related database listings from EDR.

It should be noted that AEI's limited PFAS screening is based solely on review of the resources cited. Identification, or lack thereof, is not a warranty that PFAS contamination is present or absent at a site. Additionally, it should be noted that given the evolving nature of science and regulatory oversight of PFAS, additional sources of PFAS contamination may exist at the subject property, adjoining sites and/or other other nearby sites not identified by the limited screening tools reviewed.

Source	Subject Property Identified	Adjoining Site(s) Identified	Other Nearby Site(s) of Concern Identified	Comments
EDR PFAS Regulatory Database Listing(s)		✔		Identified listing(s) discussed below

Facility Name	Diamond Wipes International, Inc.
Address or Latitude/ Longitude	4651 Schaefer Avenue
Distance & Direction	Adjoining to the south across Schaefer Avenue
Hydrologic Position	Down-gradient
PFAS Database(s) Listed	PFAS ECHO
Comments	The adjoining property was identified in the EDR PFAS ECHO database. This database includes facility operations that may potentially handle PFAS. Information is typically derived from NAICS/SIC codes and is based on general information regarding site operations. No known releases have been identified in association with this facility. As such, evidence of PFAS contamination has not been identified to originate at this facility at this time. PFAS are not currently classified by CERCLA as a hazardous substance and thus the potential presence of PFAS does not represent a REC at this time. However, the report User should be aware that regulatory criteria and classifications are subject to change.

Facility Name	Bright Shark Powder
Address or Latitude/ Longitude	34.00444/-117.70585
Distance & Direction	Adjoining to the southwest
Hydrologic Position	Down-gradient
PFAS Database(s) Listed	PFAS ECHO
Comments	The adjoining property was identified in the EDR PFAS ECHO database. This database includes facility operations that may potentially handle PFAS. Information is typically derived from NAICS/SIC codes and is based on general information regarding site operations. No known releases have been identified in association with this facility. As such, evidence of PFAS contamination has not been identified to originate at this facility at this time. PFAS are not currently classified by CERCLA as a hazardous substance and thus the potential presence of PFAS does not represent a REC at this time. However, the report User should be aware that regulatory criteria and classifications are subject to change.

DRAFT

6.0 INTERVIEWS AND USER PROVIDED INFORMATION

6.1 INTERVIEWS

Pursuant to the current ASTM Standard E1527, the following interviews were performed during this assessment in order to obtain information indicating RECs in connection with the subject property.

6.1.1 OWNER AND KEY SITE MANAGER

Relation to Property	Name	Date Interviewed	Method of Contact	Year First Associated w/ Property	Notes
Owner/Owner Representative	George Putnam Trust	N/A	N/A	1961	Not interviewed; refer to Section 1.5
Key Site Manager	Mr. C;lyde Stauff	March 7, 2023	Email	Unknown	Interviewed; see Interview Summary table below

INTERVIEW SUMMARY

Question	Owner (Representative) Response/ Comment	Key Site Manager Response/ Comment
Do you have any knowledge of USTs, clarifiers or oil/water separators, sumps, or other subsurface features?	N/A	No
Do you have any knowledge of previous environmental investigations conducted on site?	N/A	Yes; refer to Section 6.3
Do you have any knowledge of current or past industrial operations and/or other operations which would involve the use of hazardous substances and/or petroleum products?	N/A	No
Are you aware of any known plans for site redevelopment or change in site use?	N/A	Yes
Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, at, or from the subject property?	N/A	No
Are you aware of any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on, at, or from the subject property?	N/A	No
Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?	N/A	No
Are you aware of any incidents of flooding, leaks, or other water intrusion, and/or complaints related to indoor air quality?	N/A	No

6.1.2 PAST OWNERS, OPERATORS, AND OCCUPANTS

AEI did not attempt to interview past owners, operators, and occupants of the subject property because information from these sources would likely be duplicative of information already obtained from other sources.

DRAFT

6.1.3 Interview with Others

Information obtained during interviews with local government officials is incorporated into the appropriate segments of this report.

6.2 User Provided Information

User provided information is intended to help identify the possibility of RECs in connection with the subject property. According to the current ASTM Standard E1527 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), certain items should be researched by the prospective landowner or grantee, and the results of such inquiries may be provided to the Environmental Professional. The responsibility for qualifying for LLPs by conducting the inquiries ultimately rests with the User, and providing the information to the Environmental Professional would be prudent if such information is available.

The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.

Question	Response/ Comment
1. Environmental liens that are filed or recorded against the property (40 CFR 312.25) Did a search of recorded land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?	Information not provided
2. Activity and use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and vi)). Did a search of recorded land title records (or judicial records where appropriate) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?	Information not provided
3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28). Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	Information not provided
4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29). Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?	Information not provided
5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30). Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example: (a) Do you know the past uses of the property? (b) Do you know of specific chemicals that are present or once were present at the	Information not provided

DRAFT

Question	Response/ Comment
property? (c) Do you know of spills or other chemical releases that have taken place at the property? (d) Do you know of any environmental cleanups that have taken place at the property?	
6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31). Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?	Information not provided

6.3 Previous Reports and Other Provided Documentation

Documentation was provided to AEI by the client during this assessment. A summary of this information follows:

Phase I Environmental Site Assessment (13610 Yorba Avenue, Chino, CA 91710), prepared by AEI Consultants (October 31, 2022)

This report describes the subject property generally consistent with current conditions with the following exceptions:

- At the time the previous report was prepared, the subject property was described as being occupied by a horse stable and a chicken coop which were in use as storage buildings. The chicken coop is no longer a storage building, but currently houses chickens.
- AEI stated the following in its Findings and Opinions:
    - AEI did not identify significant data gaps which affected our ability to identify RECS
    - AEI did not identify evidence of RECS during the course of this assessment.
    - AEI did not identify evidence of CRECS during the course of this assessment.
    - AEI did not identify evidence of HECS during the course of this assessment.
    - Other Environmental Considerations (OEC):
        - Due to the age of the subject property buildings, there is a potential that ACMs are present. AEI was not provided access to the interiors of the buildings (buildings were locked and boarded up), therefore the condition of suspect ACMs could not be evaluated. Based on the potential presence of ACMs, AEI recommends the implementation of an O&M Plan which stipulates that the repair and maintenance of damaged materials should be performed to protect the health and safety of the building occupants. In the event that building renovation or demolition activities are planned, a thorough asbestos survey to

DRAFT

identify asbestos-containing building materials is required in accordance with the EPA NESHAP 40 CFR Part 61 prior to demolition or renovation activities that may disturb suspect ACMs.

- Due to the age of the subject property buildings, there is a potential that LBP is present. AEI was not provided access to the interiors of the buildings (buildings were locked and boarded up), therefore the condition of interior painted surfaces could not be evaluated. During the site reconnaissance, AEI observed damaged and peeling paint on the exterior of the subject property residence as well as on some of the barn structures. Based on the potential presence of LBP, AEI recommends the property owner implement an O&M Plan which stipulates that the assessment, repair and maintenance of damaged painted surfaces be performed to protect the health and safety of the building occupants. Local regulations may apply to LBP in association with building demolition/renovations and worker/occupant protection. Actual material samples would need to be collected or an x-ray fluorescence (XRF) survey performed in order to determine if LBP is present. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.
- AEI did not observe interior areas of the subject property buildings, as the buildings were locked and boarded up. According to Cyndy Franz, owner representative, the subject property residence has been vacant and unoccupied for at least the last three years. Mrs. Franz informed AEI that due to the state of dilapidation of the building as well as the vast material build up located inside the building, she did not feel comfortable escorting the assessor through the building. Additionally, Mrs. Franz stated that on the few occasions in which personnel have been allowed into the building, they have been in full protection gear in order to protect from any and decomposing material and animal feces present. Based on absence of mechanical ventilation for an extended period of time, the interior finishes may have been impacted by condensation and ensuing mold.
- The south adjoining site across Schaefer Avenue, Diamond Wipes International, Inc., is a heavy industrial manufacturer of wet wipes. This facility has various listings detailing the treatment and disposal of liquid and.or semisolid waste as well as seasonal discharge of contaminated water. Additionally, this facility is listed in both the NPDES and CIWQS databases in relation to their industrial storm water discharge. See Section 5.1 for additional details. Further investigation is pending. PFAS are not currently classified by CERCLA as a hazardous substance and thus the potential presence of PFAS does not represent a REC at this time. However, the report User should be aware that regulatory criteria and classifications are subject to change. As such, it

DRAFT

would be prudent for the property owner to review future assessment reports associated with this facility to ensure that the subject property is not impacted.

- AEI stated the following in its Conclusions:
  - We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and E1527-21, of 13610 Yorba Avenue, Chino, San Bernardino County, California, the subject property. Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.
  - This assessment has revealed no evidence of recognized environmental conditions, controlled recognized environmental conditions, or significant data gaps in connection with the subject property.

- AEI stated the following in its Recommendations:
  - AEI recommends no further investigation for the subject property at this time

A copy of the report is included in the appendices.

6.4 Environmental Lien Search

In accordance with our approved scope of services, an environmental lien search was not performed as part of this assessment.

DRAFT

7.0 SITE RECONNAISSANCE

Site Reconnaissance Date	March 13, 2023
AEI Site Assessor(s)	Ron Russell
Property Escort(s)/ Relationship(s) to Property	N/A - AEI conducted the site reconnaissance unaccompanied
Units/Areas Observed	Buildings/Units/Suites: None Exterior areas: AEI observed the subject property grounds, gravel paved auto parking lot, residence asphalt paved parking lot, as well as the enclosed below ground pool area.
Area(s) not accessed and reason(s)	Buildings/Units/Suites/Sheds: AEI was not provided access to any of the buildings on site due to their current state of dilapidation. Buildings not accessed include, residential dwelling, prior barn, chicken coops, and storage shed. Exterior areas: N/A Refer to Section 1.5 for discussion of limiting conditions
Other Physical Constraints	At the time of the site reconnaissance, the residence and surrounding surfaces were covered with fallen leaves, storage overfill, and chickens and therefore could not be directly observed. Based on the nature of occupancy of the property, as well as information obtained by the owner representative, this limitation is not expected to significantly change the findings of this report. Additionally, due to the large volume of materials within portions of the building and vehicles parked within exterior areas, direct visual observation of many of the floor and wall areas of the building and exterior ground surfaces was not possible. AEI's observations of the subject property were limited to outdoor areas of the property. No buildings were assessed during the reconnaissance. Refer to Section 1.5 for discussion of limiting conditions
General Observations	The subject property includes a single family residence which has been vacant for at least the past 5-1/2 years. The residence contains an asphalt paved driveway as well as a large pool area with an emptied in-ground pool. Additionally, the subject property has a horse stable which is no longer in use and a chicken coop. The subject property is developed with a barn which is no longer in use. The northern portion of the subject property has been paved with gravel and is currently in use as a parking lot/ storage area for motor vehicles, primarily diesel trucks.

Reconnaissance Findings Summary

Feature	Observed on Subject Property (see Section 7.1)	Observed on Adjoining Property (see Section 7.2)
Regulated Hazardous Substances/Wastes and/or Petroleum Products in Connection with Property Use (including drums, totes, and intermediate bulk containers)		
Aboveground/Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)		
Hazardous Substance and Petroleum Product Containers Not in Connection with Property Use		
Unidentified Substance Containers		
Electrical or Mechanical Equipment Likely to Contain Fluids		✔
Interior Stains or Corrosion		
Strong, Pungent, or Noxious Odors		

Feature	Observed on Subject Property (see Section 7.1)	Observed on Adjoining Property (see Section 7.2)
Pools of Liquid		
Drains, Sumps, and Clarifiers		✔
Pits, Ponds, and Lagoons		
Stained Soil or Pavement	✔	
Stressed Vegetation		
Solid Waste Disposal or Evidence of Fill Materials	✔	
Waste Water Discharges		
Wells	✔	
Septic Systems or Cesspools		
Biomedical Wastes		
Other		

7.1 Subject Property Reconnaissance Findings

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

7.1.1 Stained Soil and Pavement

Minor amounts of oily surface staining were observed in the parking area. The staining appears to be from leaking vehicles and is surficial in nature. Based on the small size and the surficial nature of the staining, it is not expected to represent a significant environmental concern.

7.1.2 Solid Waste Disposal or Evidence of Fill Materials

AEI observed various mounds of stockpiled gravel on the northern portion of the property, in what is currently being used as an auto storage yard. The origin of the fill material is unknown. However, no issues relating to contamination of the fill materials were noted at any of the agencies contacted.

7.1.3 Wells

- Location: Northwestern section of the subject property
- Installation date(s): Unknown
- Depth: Unknown
- Sampling data and results: Unknown
- Presence of hazardous substances/staining nearby, etc.: None

The subject property formerly obtained potable water from a private water well. The date of installation and depth of the well were not provided to AEI. In addition, no water quality testing results were provided to AEI for review. Based on the nature of use of the well, the presence of the well is not expected to represent a significant environmental concern. However, it is not clear if the well has been properly decommissioned. Since the well represents a potential conduit to the subsurface of the property, the well should be properly decommissioned.

DRAFT

7.2 Adjoining Property Reconnaissance Findings

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

7.2.1 Electrical or Mechanical Equipment Likely to Contain Fluids

Transformer(s)

Pole-mounted transformers were observed on the adjoining sites during the site reconnaissance. No spills, staining, or leaks were observed on or around the transformers. Based on the good condition of the equipment, the transformers are not expected to represent a significant environmental concern.

7.2.2 Drains, Sumps, and Clarifiers

Several storm drains were observed in the parking areas of the adjoining properties and adjoining roadways. AEI did not observe evidence of hazardous substances or petroleum products in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not expected to represent a significant environmental concern.

DRAFT

8.0 NON-ASTM SERVICES

8.1 ASBESTOS-CONTAINING BUILDING MATERIALS

Asbestos is the name for a group of naturally occurring silicate minerals that can be separated into fibers. The fibers are strong, durable, and resistant to heat and fire. They are also long, thin and flexible, so they can even be woven into cloth. Because of these qualities, asbestos has been used in thousands of consumer, industrial, maritime, automotive, scientific and building products. During the 20th century, some 30 million tons of asbestos have been used in industrial sites, homes, schools, shipyards and commercial buildings in the United States. Commercial use of ACM began in the early 1900s and peaked in the period between 1940 and into the 1970s. Common ACMs include pipe-covering, insulating cement, insulating block, refractory and boiler insulation materials, transite board, fireproofing spray, joint compound, vinyl floor tile, ceiling tile, mastics, roofing products, and duct insulation for HVAC applications. Inhalation of asbestos fibers can result in deleterious health effects.

The potential for ACM was evaluated based the United States EPA Guidance Document: Managing Asbestos in Place - A Building Owner's Guide to Operations and Maintenance Programs for Asbestos-Containing Materials (the Green Book). In 1973 the NESHAPS banned the use of most spray-applied surfacing ACM, specifically asbestos containing spray-on fireproofing and insulation. Subsequent revisions to this regulation in 1975 and 1978 effectively eliminated the use of friable pre-molded pipe, boiler, turbine, and duct insulation; and the spray application of friable asbestos-containing materials for all uses in buildings. In 1989 the EPA issued regulations to ban some asbestos-containing products and phase out most others over a multi-year period. The "Ban and Phase-Down" rule was challenged in court and the regulation remanded to the agency. As a result, any asbestos-containing products then "in commerce" would not be banned. Those not in commerce would be banned. Those materials "banned" could not be sold. It did not affect such materials already installed, or in use. Most US firms voluntarily ceased production of asbestos containing building materials not covered by the aforementioned Federal bans by the mid-1980s. In 1994, the OSHA determined that employers and building owners are required to treat installed thermal system installation and sprayed on and troweled-on surfacing materials, as well as vinyl or asphalt flooring material, as ACM in buildings constructed no later than 1980 until tested by laboratory analysis to prove otherwise.

The information below is for general informational purposes only and does not constitute an asbestos survey. In addition, the information is not intended to comply with federal, state or local regulations in regards to ACM.

Due to the age of the subject property building(s), there is a potential that ACMs are present. A limited list of typical suspect ACMs is included in the following table:

DRAFT

Material Type	Location
Plaster (acoustical and smooth)	Walls and ceilings
Ceiling tile	Ceiling systems
Thermal systems insulations, packings, and gaskets	Heating systems, cooling systems, domestic and heating and cooling piping, ductwork, and other equipment
Floor tile and associate mastics, flooring felts, and papers (under hardwood/other)	Floors
Vinyl sheet flooring and adhesives	Floors
Cove base and associated mastics	Walls
Ceramic tile adhesives and grouts	Walls, floors, and ceilings
All adhesives	Mirrors, wall coverings, construction, etc.
Grout and caulking	Windows and doors
Gypsum board, tape, and joint compound	Wall and ceiling systems
Insulation materials	Walls, ceilings, and attic spaces
Roofing materials (felts, rolled, shingle, flashings, adhesives, tar, and insulations)	Roof and parapet wall systems
Brick and block, mortars	Walls

Based on the potential presence of ACMs, AEI recommends the property owner implement an O&M Plan which stipulates that assessment, repair and maintenance of damaged materials be performed to protect the health and safety of the building occupants. In the event that building renovation or demolition activities are planned, a thorough asbestos survey is required in accordance with the EPA NESHAP 40 CFR Part 61 prior to demolition or renovation activities that may disturb ACMs.

8.2 Lead-Based Paint

Lead-based paint (LBP) is defined as any paint, varnish, stain, or other applied coating that has ≥1 mg/cm² (5,000 µg/g or 5,000 ppm) or more of lead by federal guidelines; state and local definitions may differ from the federal definitions in amounts ranging from 0.5 mg/cm² to 2.0 mg/cm². Section 1017 of the Housing and Urban Development (HUD) Guidelines, Residential Lead-Based Paint Hazard Reduction Act of 1992, otherwise known as "Title X," defines a LBP hazard as "any condition that causes exposure to lead that would result in adverse human health effects" resulting from lead-contaminated dust, bare, lead-contaminated soil, and/or lead-contaminated paint that is deteriorated or present on accessible, friction, or impact surfaces. Therefore, under Title X, intact LBP on most walls and ceilings would not be considered a "hazard," although the paint should be maintained and its condition monitored to ensure that it does not deteriorate and become a hazard. Additionally, Section 1018 of this law directed HUD and EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978. Most private housing, public housing, or federally owned or subsidized housing is affected by this rule.

Under OSHA, lead-containing paint (LCP) is defined as any paint with any detectable amount of lead present in it. Therefore, all LBP is considered LCP. Conversely, LCP may not meet the criteria to be considered LBP in accordance with HUD guidelines or some states' definition of LBP.

It is important to note that LCP may create a lead hazard when being removed. The condition of these materials must be monitored when they are being disturbed. In the event LCP is subject to abrading, sanding, torching, and/or cutting during demolition or renovation activities, there may be regulatory issues that must be addressed.

DRAFT

The information below is for general informational purposes only and does not constitute a lead hazard evaluation. In addition, the information is not intended to comply with federal, state, or local regulations in regards to LBP.

In buildings constructed after 1978, it is unlikely that LBP is present; however, some paints utilized after 1978 will be LCP under OSHA. Structures built prior to 1978 and especially prior to the 1960s should be expected to contain LBP.

Due to the age of the subject property buildings, there is a potential that LBP is present. AEI was not provided access to the interiors of the buildings (buildings were locked and boarded up), therefore, the condition of the interior painted surfaces could not be evaluated. During the site reconnaissance, AEI observed damaged and peeling paint on the exterior of the subject property residence as well as on some of the barn structures. Local regulations may apply to LBP in association with building demolition/renovations and worker/occupant protection. Actual material samples would need to be collected or an XRF survey performed in order to determine if LBP is present. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.

8.3 Naturally-Occurring Radon

Radon is a naturally-occurring, odorless, and invisible gas. Natural radon levels vary and are closely related to geologic formations. Radon may enter buildings through basement sumps or other openings.

The United States EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three radon zones, with Zone 1 being those areas with the average predicted indoor radon concentration in residential dwellings exceeding the EPA Action Limit of 4.0 pCi/L. It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the EPA recommends site specific testing to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not requested as part of this assessment. According to the US EPA, the radon zone level for the area is Zone 2, which has a predicted average indoor screening level between 2.0 pCi/L and 4.0 pCi/L, equal to or below the action level of 4.0 pCi/L set forth by the US EPA.

8.4 Suspect Mold or Microbial Growth Conditions

AEI did not observe interior areas of the subject property buildings, as the buildings were locked, boarded up and Mr. Clyde Stauff, owner's represented, stated in an email dated March 7, 2023 that the building was in bad condition and he would not going into the building. Based on absence of mechanical ventilation for an extended period of time, the interior finishes may have been impacted by condensation and ensuing mold.

DRAFT

8.5 WETLANDS

A review of the US Fish and Wildlife Service National Wetlands Inventory (NWI) map showed that the subject property is not located within a federally designated wetlands area. In addition, no natural standing bodies of water or typically hydrophytic vegetation were observed on the subject property during the site reconnaissance.

DRAFT

9.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR Part 312.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL ---------- National Priority List
Proposed NPL ---------- Proposed National Priority List Sites
NPL LIENS ---------- Federal Superfund Liens

Lists of Federal Delisted NPL sites

Delisted NPL ---------- National Priority List Deletions

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY ---------- Federal Facility Site Information listing
SEMS ---------- Superfund Enterprise Management System

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE ---------- Superfund Enterprise Management System Archive

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS ---------- Corrective Action Report

Lists of Federal RCRA TSD facilities

RCRA-TSDF ---------- RCRA - Treatment, Storage and Disposal

Federal institutional controls / engineering controls registries

LUCIS ---------- Land Use Control Information System
US ENG CONTROLS ---------- Engineering Controls Sites List
US INST CONTROLS ---------- Institutional Controls Sites List

Federal ERNS list

ERNS ---------- Emergency Response Notification System

Lists of state- and tribal (Superfund) equivalent sites

CA RESPONSE ---------- State Response Sites

DRAFT

EXECUTIVE SUMMARY

Lists of state and tribal landfills and solid waste disposal facilities

CA SWF/LF ..... Solid Waste Information System

Lists of state and tribal leaking storage tanks

INDIAN LUST ..... Leaking Underground Storage Tanks on Indian Land

Lists of state and tribal registered storage tanks

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 11/21/2022 has revealed that there are 6 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 11/21/2022 has revealed that there are 10 RCRA-SQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 10/24/2022 has revealed that there are 3 CA ENVIROSTOR sites within approximately 1 mile of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 11/21/2022 has revealed that there are 45 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 01/03/2022 has revealed that there are 7 PFAS ECHO sites within approximately 0.25 miles of the target property.

DOMESTIC DIESEL AND AUTO SERVICE (Continued) **S105725235**

Site ID: 613594
CERS ID: 10901194
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 613594
Site Name: Domestic Diesel and Auto Service
Violation Date: 06-08-2022
Citation: Un-Specified
Violation Description: Hazardous Waste Generator Program - Administration/Documentation - General Local Ordinance
Violation Notes: Returned to compliance on 06/21/2022. OBSERVATION: Observed the facility to be operating without a valid CUPA hazardous waste generator permit. CORRECTIVE ACTION: Obtain and maintain a valid San Bernardino County CUPA hazardous waste generator permit. Sign and return the certificate of compliance.
Violation Division: San Bernardino County Fire Department
Violation Program: HW
Violation Source: CERS,

Site ID: 613594
Site Name: Domestic Diesel and Auto Service
Violation Date: 06-08-2022
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 07/18/2022. OBSERVATION: At the time of the inspection, observed the facility to have the 55-gallon waste oil drum open when not in use. CORRECTIVE ACTION: Ensure all hazardous waste containers are completely closed, except when actively adding or removing waste.
Violation Division: San Bernardino County Fire Department
Violation Program: HW
Violation Source: CERS,

Site ID: 613594
Site Name: Domestic Diesel and Auto Service
Violation Date: 06-08-2022
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes: Returned to compliance on 08/19/2022. OBSERVATION: At the time of the inspection, observed the facility to have never electronically submitted a hazardous materials business plan to the California Environmental Reporting System (CERS). CORRECTIVE ACTION: Complete and electronically submit the hazardous materials business plan to CERS withing 30 days of the inspection.
Violation Division: San Bernardino County Fire Department
Violation Program: HMRRP
Violation Source: CERS,

Description:	Caller states the main valve failed on a large collection trailer which resulted in the release of a mixture of cow blood and water. The release left private property, went out onto the street, then into a storm drain that runs to Chino Creek but the City of Chino Public Works stopped the flow by using sandbags before the release could impact the creek. An outside contractor is on scene performing clean up.

AMERICAN BEEF PACKERS INC. (Continued) **U001568845**

Site ID: 384764
CERS ID: 729176
CERS Description: Industrial Facility Storm Water

Violations:
Site ID: 384764
Site Name: AMERICAN BEEF PACKERS INC.
Violation Date: 03-07-2019
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 04/08/2019. OBSERVATION: (1) 5 gallon container of used oil was observed open when not in use. CORRECTIVE ACTION: Close all the hazardous waste containers and submit photos to the CUPA demonstrating that the container listed above has been properly closed.
Violation Division: San Bernardino County Fire Department
Violation Program: HW
Violation Source: CERS,

Site ID: 384764
Site Name: AMERICAN BEEF PACKERS INC.
Violation Date: 03-07-2019
Citation: HSC 6.5 25250.22 - California Health and Safety Code, Chapter 6.5, Section(s) 25250.22
Violation Description: Failure to properly manage used oil and/or fuel filters in accordance with the requirements.
Violation Notes: Returned to compliance on 04/08/2019. OBSERVATION: Facility failed to properly manage waste metal filters. CORRECTIVE ACTION: Submit photos to the CUPA demonstrating that the used oil and fuel filters are being properly managed or submit a bill of lading to this department demonstrating proper disposal.

	the environment.
Violation Notes:	Returned to compliance on 04/08/2019. OBSERVATION: At the time of inspection, observed oil spill in the hazardous materials storage area. Operator was advised to clean it up. CORRECTIVE ACTION: Properly clean up the spilled oil and manage spent absorbent and contaminated soil as a hazardous waste. Submit photos to this division demonstrating the spill has been properly removed and managed.
Violation Division:	San Bernardino County Fire Department
Violation Program:	HW
Violation Source:	CERS,
Site ID:	384764
Site Name:	AMERICAN BEEF PACKERS INC.
Violation Date:	05-02-2022
Citation:	HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)
Violation Description:	Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes:	OBSERVATION: The CERS hazardous materials inventory submitted on 4/5/2019 was rejected because it was not representative of the chemical inventory observed during the 2019 inspection. The hazardous materials inventory observed today was also not consistent with the inventory submitted in CERS. The following items needs to be added to the CERS inventory: 5500 gallon tank ChemFloc, 55 gallon drums of Organic Peroxide, compressed cylinders of argon, argon/C02 and oxygen, 4 x 55 gallon drums of waste oil, 55 gallon drum of waste aerosol cans, Purac CL, Denaturant, SubDue Extra, and Meta Clean. The maximum daily quantities disclosed in CERS were also found to be inaccurate. Update the maximum daily amounts for all listed chemicals to represent the most on site at any one time. As an example Flo Klow was listed at 110 gallons when 400 gallons were observed on site. CORRECTIVE ACTION: Submit an accurate and complete hazardous materials inventory in CERS.

Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Robert Bolin could not locate the SWPPP or inspection records for the site. He indicated that Frog Environmental is the consulting firm assisting him in recertfying and collecting their stormwater samples. There are two discharge points for the site. Low flow goes to the on-site treatment system and then to the sewer. There are High Flow bypass via rain sensors. When triggered, they open and allow water from the site to flow off-site to the storm drain system. This site is a 24 hour per day operation and appears to be very clean. At the time of inspections they were not processing live cattle. Potential pollution sources at the site appear to be: Livestock holding area, cardboards bailing area, maintenance area, and loading docks where bones are transferred via a conveyor to open trailers for off-site sale.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
OSHA ESTABLISHMENT
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
STATE MASTER
HAZARDOUS WASTE BIENNIAL REPORTER
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region

that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring. SSTS (Section Seven Tracking System) evolved from the FIFRA and TSCA Enforcement System (FATES). SSTS tracks the registration of all pesticide-producing establishments and tracks annually the types and amounts of pesticides, active ingredients, and related devices that are produced, sold, or distributed each year.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat at to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Date: 04-13-2022
Citation: HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2
Violation Description: Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.
Violation Notes: Returned to compliance on 04/13/2022. OBSERVATION: At the time of the inspection, the Hazardous Materials Business Plan was last submitted via CERS on 03/05/2020. The violation was corrected at the time of the inspection.
Violation Division: San Bernardino County Fire Department
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 368958
Site Name: A & N WELDING
Violation Date: 04-08-2019
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit a site map with all required content.
Violation Notes: Returned to compliance on 04/11/2019. OBSERVATION: Site map uploaded into CERS is missing the following information: storm and sewer drains, evacuation staging areas, hazardous material storage areas and emergency response equipment. CORRECTIVE ACTION: Submit an accurate and complete site map into CERS.
Violation Division: San Bernardino County Fire Department
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 368958
Site Name: A & N WELDING
Violation Date: 04-08-2019
Citation: Un-Specified
Violation Description: Business Plan Program - Administration/Documentation - General Local Ordinance
Violation Notes: Returned to compliance on 04/11/2019. OBSERVATION: Facility stores hazardous materials above the reportable quantities (55 gallons for liquids, 500 pounds for solids, and/or 200 cubic feet for compressed gases) and has an expired CUPA Permit. Permit expired on 08/31/2018. CORRECTIVE ACTION: Pay permit fees as soon as possible.

BRIGHT SHARK POWDER COATING (Continued) **S113099661**

Site Name: BRIGHT SHARK POWDER COATING
Violation Date: 07-27-2015
Citation: HSC 6.5 Multiple Sections - California Health and Safety Code, Chapter 6.5, Section(s) Multiple Sections
Violation Description: Haz Waste Generator Program - Operations/Maintenance - General
Violation Notes: Returned to compliance on 11/17/2015. Failure to inspect Hazardous Waste container storage areas weekly (CCR 66265.174) Facility did not properly inspection hazardous waste area.
Violation Division: San Bernardino County Fire Department
Violation Program: HW
Violation Source: CERS,

Site ID: 100054
Site Name: BRIGHT SHARK POWDER COATING
Violation Date: 11-07-2018
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 11/07/2018. Observed (1) 55 gallon drum containing rags contaminated with powder coating materials to be open at the time of the inspection. Violation corrected on site at the time of the inspection.
Violation Division: San Bernardino County Fire Department
Violation Program: HW
Violation Source: CERS,

Site ID: 100054
Site Name: BRIGHT SHARK POWDER COATING

DRAFT

BRIGHT SHARK POWDER COATING (Continued) **S113099661**

Site ID:	100054
Site Name:	BRIGHT SHARK POWDER COATING
Violation Date:	11-07-2018
Citation:	HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	Returned to compliance on 11/27/2018. Observed (1) 55 gallon drum containing rags contaminated with powder coating materials. Operator stated the contents of this drum is being managed by the facility as hazardous waste. No hazardous waste disposal records were available for review at the time of the inspection for this waste stream. The drum was not labeled at the time of the inspection. CORRECTIVE ACTION: Sign the Certificate of Compliance in attestation that all hazardous waste that has exceeded the facility's accumulation time frame has been transported off site by a licensed hazardous waste transporter. The accumulation time frame for this facility was 180 days at the time of the inspection.
Violation Division:	San Bernardino County Fire Department
Violation Program:	HW
Violation Source:	CERS,

Site ID:	100054
Site Name:	BRIGHT SHARK POWDER COATING
Violation Date:	11-07-2018
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 11/07/2018. Observed (1) 55 gallon drum containing rags contaminated with powder coating materials to be missing hazardous waste labeling. Operator stated the contents of this drum is being managed by the facility as hazardous waste. Observed (1) 55 gallon drum containing waste powder coating material and solvent mixture to have illegible hazardous waste labeling at the time of the inspection. Violation corrected on site at the time of the inspection.

Site Name:	BRIGHT SHARK POWDER COATING
Violation Date:	07-27-2015
Citation:	HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2
Violation Description:	Failure to annually review and electronically certify that the business plan is complete, accurate, and up-to-date.

DRAFT

BRIGHT SHARK POWDER COATING (Continued) **S113099661**

Violation Notes: Returned to compliance on 11/17/2015. Facility did not update their Business Plan on CERS.
Violation Division: San Bernardino County Fire Department
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 100054
Site Name: BRIGHT SHARK POWDER COATING
Violation Date: 07-27-2015
Citation: HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple
Violation Description: Haz Waste Generator Program - Administration/Documentation - General
Violation Notes: Returned to compliance on 11/17/2015. Failure to retain Hazardous Waste Manifests for at least 3 years (CCR 66262.40(a)) Facility did not have hazardous waste disposal records available at time of inspection.
Violation Division: San Bernardino County Fire Department
Violation Program: HW
Violation Source: CERS,

Site ID: 100054

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Violation Date:	06-01-2022
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 06/01/2022. OBSERVATION: At the time of the inspection, observed the waste oil drum to be unlabeled. CORRECTED ON SITE: Operator properly labeled the waste oil drum. Ensure all waste containers are completely and accurately labeled as hazardous waste.
Violation Division:	San Bernardino County Fire Department
Violation Program:	HW
Violation Source:	CERS,

Site ID:	614164
Site Name:	Advanced Precision Inc
Violation Date:	06-01-2022
Citation:	40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description:	Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes:	Returned to compliance on 06/01/2022. OBSERVATION: At the time of the inspection, the waste oil drum was observed to be open, but not in use. CORRECTED ON SITE: Operator closed the waste oil drum during the inspection. Ensure that all waste oil drums are closed unless waste is actively being added or removed.

Site Name: Spectrum Concrete Products LLC
Violation Date: 06-02-2022
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes: Returned to compliance on 07/20/2022. OBSERVATION: At the time of the inspection, observed the facility to not have initially submitted a hazardous materials business plan to CERS. CORRECTIVE ACTION: Submit a complete and accurate hazardous materials business plan to CERS within 30 days of the inspection.
Violation Division: San Bernardino County Fire Department
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 613677
Site Name: Spectrum Concrete Products LLC
Violation Date: 06-02-2022
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes: OBSERVATION: 1. At the time of the inspection, observed the facility to be holding approximately (130) 5-gallon buckets, and approximately (20) 55-gallon drums of expired, unsaleable, retail waste over the 180 day time period. 2. At the time of the inspection, observed the facility to be holding hazardous waste in the from of (19) 55-gallon drums of bag house dust, over the 180 day time period. CORRECTIVE ACTION: All hazardous waste on site must be sent for hazardous waste disposal, treatment, or storage within 180 days of generation. Provide waste removal manifests to the inspector, and photos of the cleared out waste collection areas to the inspector within 30 days of the inspection. Sign and return the Certificate of Compliance to the inspector indicating the hazardous waste has been removed from site.

Violation Date:	06-02-2022
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	OBSERVATION: Observed all hazardous waste drums on site to be missing the appropriate Hazardous Waste labeling. CORRECTIVE ACTION: Ensure all hazardous waste containers are properly labeled as Hazardous Waste including the name of the generator, chemical and physical properties, and the accumulation start date. Provide photos of the accurately labeled hazardous waste drums to the inspector within 30 days of the inspection. Sign and return the certificate of compliance indicating the hazardous waste has been completely and accurately labeled.
Violation Division:	San Bernardino County Fire Department

Citation:	22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description:	Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes:	OBSERVATION: AT the time of the inspection, observed the facility to not have the required manifest records available for review. CORRECTIVE ACTION: Ensure all hazardous materials manifests, signed by the designated facility, are kept on site for a minimum of three (3) years following pick up by initial transporter. Provide a copy of the newest hazardous waste manifest to the inspector within 30 days of the inspection.

Violation Date:	06-02-2022
Citation:	HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	OBSERVATION: 1. At the time of the inspection, observed the facility to be holding approximately (130) 5-gallon buckets, and approximately (20) 55-gallon drums of expired, unsaleable, retail waste over the 180 day time period. 2. At the time of the inspection, observed the facility to be holding hazardous waste in the from of (19) 55-gallon drums of bag house dust, over the 180 day time period. CORRECTIVE ACTION: All hazardous waste on site must be sent for hazardous waste disposal, treatment, or storage within 180 days of generation. Provide waste removal manifests to the inspector, and photos of the cleared out waste collection areas to the inspector within 30 days of the inspection. Sign and return the Certificate of Compliance to the inspector indicating the hazardous waste has been removed from site.

Gepaid: CAD983649328
TSD EPA ID: CAT000613927
CA Waste Code: 134 - Aqueous solution with total organic residues less than 10 percent
Disposal Method: H01 - Transfer Station
Tons: 0.4032

Year: 2000
Gepaid: CAD983649328
TSD EPA ID: CAT080013352
CA Waste Code: 223 - Unspecified oil-containing waste
Disposal Method: R01 - Recycler
Tons: 2.2518

Year: 2000
Gepaid: CAD983649328
TSD EPA ID: CAD099452708
CA Waste Code: 223 - Unspecified oil-containing waste
Disposal Method: R01 - Recycler
Tons: 0.2293

Year: 1999
Gepaid: CAD983649328
TSD EPA ID: CAT080013352
CA Waste Code: 223 - Unspecified oil-containing waste
Disposal Method: R01 - Recycler
Tons: 3.3359

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

requires modification to any portion of the business plan.

Violation Notes: Returned to compliance on 01/27/2022. OBSERVATION: It was found that the secondary emergency contact and the environmental contact listed in CERS are no longer current. CORRECTIVE ACTION: Submit an annual update to CERS to update the contact information. Submit a signed signed certificate of compliance.
Violation Division: San Bernardino County Fire Department
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 361508
Site Name: Rahn Industries, Inc.
Violation Date: 12-20-2018
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit a site map with all required content.
Violation Notes: Returned to compliance on 01/18/2019. OBSERVATION: The map uploaded into CERS was missing the following information: adjacent streets, storm and sewer drains, emergency shutoffs, and emergency response equipment. CORRECTIVE ACTION: Submit an accurate and complete site map into the California Environmental Reporting System (CERS).
Violation Division: San Bernardino County Fire Department
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 361508
Site Name: Rahn Industries, Inc.
Violation Date: 01-08-2016
Citation: HSC 6.95 25508.1(a)-(e) - California Health and Safety Code, Chapter 6.95, Section(s) 25508.1(a)-(e)
Violation Description: Failure to electronically update business plan within 30 days of any one of the following events: A 100 percent or more increase in the quantity of a previously disclosed material. Any handling of a previously undisclosed hazardous materials at or above reportable quantities. A change of business address, business ownership, or business name.
Violation Notes: Returned to compliance on 01/18/2016.
Violation Division: San Bernardino County Fire Department
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 361508
Site Name: Rahn Industries, Inc.
Violation Date: 01-18-2022
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes: Returned to compliance on 02/09/2022. OBSERVATION: Uniform Hazardous Waste Manifests were not available at the time of inspection. CORRECTIVE ACTION: Submit a signed statement that 3 years of prior manifests will be available for review. Submit copies of all 2021 manifests for review.

Violation Date:	01-18-2022
Citation:	22 CCR 11 66261.7 - California Code of Regulations, Title 22, Chapter 11, Section(s) 66261.7
Violation Description:	Failure to manage empty containers greater than 5 gallons in capacity that previously held a hazardous material/waste in accordance with 22 CCR 11 66261.7 including but not limited to the following: (e)(2)By reclaiming its scrap value onsite or shipping the container or inner liner to a person who reclaims its scrap value; or (3) By reconditioning or remanufacturing the container or inner liner onsite for subsequent reuse, or shipping the container or inner liner to a person who reconditions or remanufactures the container or inner liner; or (4) By shipping the container or inner liner to a supplier or to another intermediate collection location for accumulation prior to managing the container or inner liner pursuant to subsections (e)(2) or (e)(3) of 22 CCR 11 66261.7; or (i) By shipping the container or inner liner back to the supplier for the purpose of being refilled. (f) A container or an inner liner removed from a container larger than five gallons in capacity which is managed pursuant to subsection (e) of 22 CCR 11 66261.7 shall be marked with the date it has been emptied and shall be managed within one year of being emptied.
Violation Notes:	Returned to compliance on 02/09/2022. OBSERVATION: Approximately twenty empty 55 gallon drums the previously held hazardous materials were found stored inside a storage container on the east side of the building. These drums were not dated as to when they were emptied. CORRECTIVE ACTION: Have these drums removed by a recycler or returned back to the vendor. Submit photos/documentation to this department demonstrating that the empty drums have been marked with the date they were emptied and are being properly managed pursuant to 22 CCR 11 66261.7.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
Registry ID: 110010061949

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

CERS:
Name: HI-LITE MANUFACTURING CO
Address: 13450 MONTE VISTA AVE
City,State,Zip: CHINO, CA 91710
Site ID: 122484
CERS ID: 110041362058
CERS Description: US EPA Air Emission Inventory System (EIS)

Violations:
Site ID: 122484
Site Name: HI-LITE MANUFACTURING CO
Violation Date: 03-16-2022
Citation: HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 05/17/2022. OBSERVATION: At the time of the inspection, observed the federal hazard categories in the inventory section of the CERS submittal to be inaccurate and missing required data. CORRECTIVE ACTION: Ensure that all inventory items have their federal hazard categories updated within 30 days of this inspection. Update "Max Daily Amount" to reflect the maximum quantities available on site at any given time, within 30 days of this inspection.
Violation Division: San Bernardino County Fire Department
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 122484
Site Name: HI-LITE MANUFACTURING CO
Violation Date: 03-16-2022
Citation: HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2
Violation Description: Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.
Violation Notes: Returned to compliance on 04/11/2022. OBSERVATION: At the time of the inspection, the facility had last reviewed and certified the business plan in CERS on 03/13/2019. CORRECTIVE ACTION: Ensure the business plan is reviewed and certified annually before March 1. This is a repeat violation from the previous 2 inspections.
Violation Division: San Bernardino County Fire Department
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 122484
Site Name: HI-LITE MANUFACTURING CO
Violation Date: 01-13-2016
Citation: HSC 6.5 Multiple Sections - California Health and Safety Code, Chapter 6.5, Section(s) Multiple Sections
Violation Description: Haz Waste Generator Program - Operations/Maintenance - General
Violation Notes: Returned to compliance on 08/07/2017. Failure to note accumulation start date on labels (CCR 66262.34(f)(2)) Accumulation start date missing on the hazardous waste label.
Violation Division: San Bernardino County Fire Department
Violation Program: HW
Violation Source: CERS,

Violation Date:	02-06-2019
Citation:	22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12
Violation Description:	Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste.
Violation Notes:	OBSERVATION: The generator's EPA ID number is inactive. A hazardous waste generator shall not treat, store, dispose of, transport or offer for transportation, hazardous waste without an active EPA ID number. CORRECTIVE ACTION: Submit documentation to the CUPA demonstrating that you have reactivated the facility's EPA ID number.

Citation:	HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)
Violation Description:	Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes:	Returned to compliance on 05/17/2022. OBSERVATION: At the time of the inspection, observed the federal hazard categories in the inventory section of the CERS submittal to be inaccurate and missing required data. CORRECTIVE ACTION: Ensure that all inventory items have their federal hazard categories updated within 30 days of this inspection. Update "Max Daily Amount" to reflect the maximum quantities available on site at any given time, within 30 days of this inspection.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violations:
Site ID: 45820
Site Name: MACADEE ELECTRICAL
Violation Date: 03-11-2019
Citation: 22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12
Violation Description: Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste.
Violation Notes: Returned to compliance on 04/02/2019. OBSERVATION: The generator has not obtained an active EPA ID number to manage hazardous waste. CAL00265673 is site specific to 4755 Lanier Road, a new EPA ID number is needed for 4821 Lanier Road. A hazardous waste generator shall not treat, store, dispose of, transport or offer for transportation, hazardous waste without an active EPA ID number. CORRECTIVE ACTION: Submit documentation to the CUPA demonstrating that you have obtained an EPA ID number.
Violation Division: San Bernardino County Fire Department
Violation Program: HW
Violation Source: CERS,

Site ID: 45820
Site Name: MACADEE ELECTRICAL
Violation Date: 03-11-2019
Citation: 40 CFR 1 265.174 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.174
Violation Description: Failure to inspect hazardous waste storage areas at least weekly and look for leaking and deteriorating containers.
Violation Notes: Returned to compliance on 04/02/2019. OBSERVATION: Weekly hazardous waste container inspections have not been conducted. CORRECTIVE ACTION: Submit a signed certificate of compliance to indicated that the hazardous waste storage area is being inspected weekly.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:
Waste Code: F001
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F002
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 07/03/2003
Comments: This PEA was conducted under a contract between Tetra Tech and DTSC. DTSC approved the Preliminary Endangerment Assessment (PEA) and determined neither an actual or a potential release of hazardous material, nor the presence of naturally occurring hazardous material indicated at the site pose a threat to human health or the environment under any land use. Therefore, DTSC concurred that no further environmental investigation or cleanup was required at this site, and approved the PEA.

File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Soil
Potential Contaminants of Concern:	* Solvents, Total Petroleum Hydrocarbons (TPH), Waste Oil / Motor / Hydraulic / Lubricating
Site History:	On 1/12/1990, one 10,000-gallon waste oil UST was removed from the site under the oversight of San Bernardino County Fire. On March 1, 1990, SBCF granted closure sitting that the residual affected sol was below levels of concern. While total petroleum hydrocarbons were below levels of concern, residual soil concentrations include PCE, TCE and TCA at 7.4, 1.46, and 1.5 ppm, respectively. Additional assessment is necessary to define the vertical extent of the chlorinated solvent affected soil and evaluate potential vapor intrusion risk at the site.

County: SAN BERNARDINO
Object ID: 24
USACE Division: SPD
USACE District: Los Angeles District (SPL)
Status: Properties with all projects at site closeout
Current Owner: LOCAL: CITY 20-acres occupied by the Chino Fairgrounds, John Godinho current president of the fairgrounds; PRIV: PRIVATE 10-acres, Dan McCalla and his brother own the 10 acre lot located immediately north of the fairgrounds.
EMS Map Link: https://fudsportal.usace.army.mil/ems/inventory/map?id=63092
Eligibility: Eligible
Has Projects: Yes
NPL Status: Not reported
Project Required: Yes
Feature Description: The camp site was originally constructed to house laborers associated with various Work Programs Administration (WPA) projects in the Chino area. At the beginning of WWII, a quartermaster unit of the New York National Guard moved into the camp. Eventually, the National Guard vacated the property and the camp returned to housing farm laborers. In October 1944, the Army established a German prisoner of war camp at the site. The prisoners were used as farm labor in the region. In April 1945, the camp became a sub-depot to the Pomona Ordnance Depot. A newspaper article from May 194S relates a fire and explosion in a quonset hut storing gas bombs, hand grenades, and small arms ammunition. No other information regarding storage and use of ordnance at this site was found. The date the Army terminated use of the camp is unknown. The camp was acquired by the Chino Junior Fair Association in 1956 from the State of California. Currently, an approximate 10 acre parcel is privately owned and used for storage of heavy equipment. The remainder of the property is occupied by the Chino Fairgrounds.
Latitude: 33.999401

RAB: Not reported
NPL Status: Not reported
Description: There are two portions to this site: A square shaped lot approximately 10 acres) and a rectangle shaped lot, which is now the Chino Fairgrounds, consisting of 20 acres. The 10 acre lot is located immediately north of the Chino Fairgrounds and is under lease by Tri State Equipment Rentals and Starlite Safety Supply. The 10-acre lot is currently being used for heavy equipment storage associated with the activities of Tri-State Equipment Rentals and Sales. The lot is completely disturbed with various portions undergoing shallow excavation. No part of this lot is covered but consists of bare soil and sporadic vegetation. The lot is completely fenced. Remnants of the former POW camp were not observed. No part of the site appears to be contaminated. The Chino Fairgrounds completely occupies the rectangular 20-acre (approximately) lot. The western half of this lot is undeveloped and bare soil. Part of this area is covered with trimmed vegetated and part is covered with rock and gravel for parking. No evidence of contamination or remains of the former POW camp were observed in this portion of the 20-acre lot. This half of

DRAFT

CHINO PRISONER OF WAR CAMP - ARMY (Continued) **1007372715**

the lot appears to be used for parking during fairground events. The eastern half of the fairgrounds is largely developed. one large building (Brinderson Hall) occupies the middle of the fairgrounds and is the multi-purpose building. It also contains the office for the facility. North of this large building are a couple of small storage shelters, restrooms, and a mobile home which is the residence for the onsite caretaker. A grass area is present south of the Hall and extends almost to the southern boundary of the fairgrounds. Immediately east of Brinderson Hall is the outdoor pavillion which is designed for rodeos. It consists of bleachers, a large bare dirt riding area, and a staging area for the animals. A stable area is located at the northeast corner of

History: The camp site was originally constructed to house laborers associated with various Work Programs Administration (WPA) projects in the Chino area. At the beginning of WWII, a quartermaster unit of the New York National Guard moved into the camp. Eventually, the National Guard vacated the property and the camp returned to housing farm laborers. In October 1944, the Army established a German prisoner of war camp at the site. The prisoners were used as farm labor in the region. In April 1945, the camp became a sub-depot to the Pomona Ordnance Depot. GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

DRAFT

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

DRAFT

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

DRAFT

PFAS ATSDR: PFAS Contamination Site Location Listing

PFAS contamination site locations from the Department of Health & Human Services, Center for Disease Control & Prevention. ATSDR is involved at a number of PFAS-related sites, either directly or through assisting state and federal partners. As of now, most sites are related to drinking water contamination connected with PFAS production facilities or fire training areas where aqueous film-forming firefighting foam (AFFF) was regularly used.

PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

DRAFT

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

South Map:	5640938 PRADO DAM, CA
Version Date:	2012

DRAFT

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

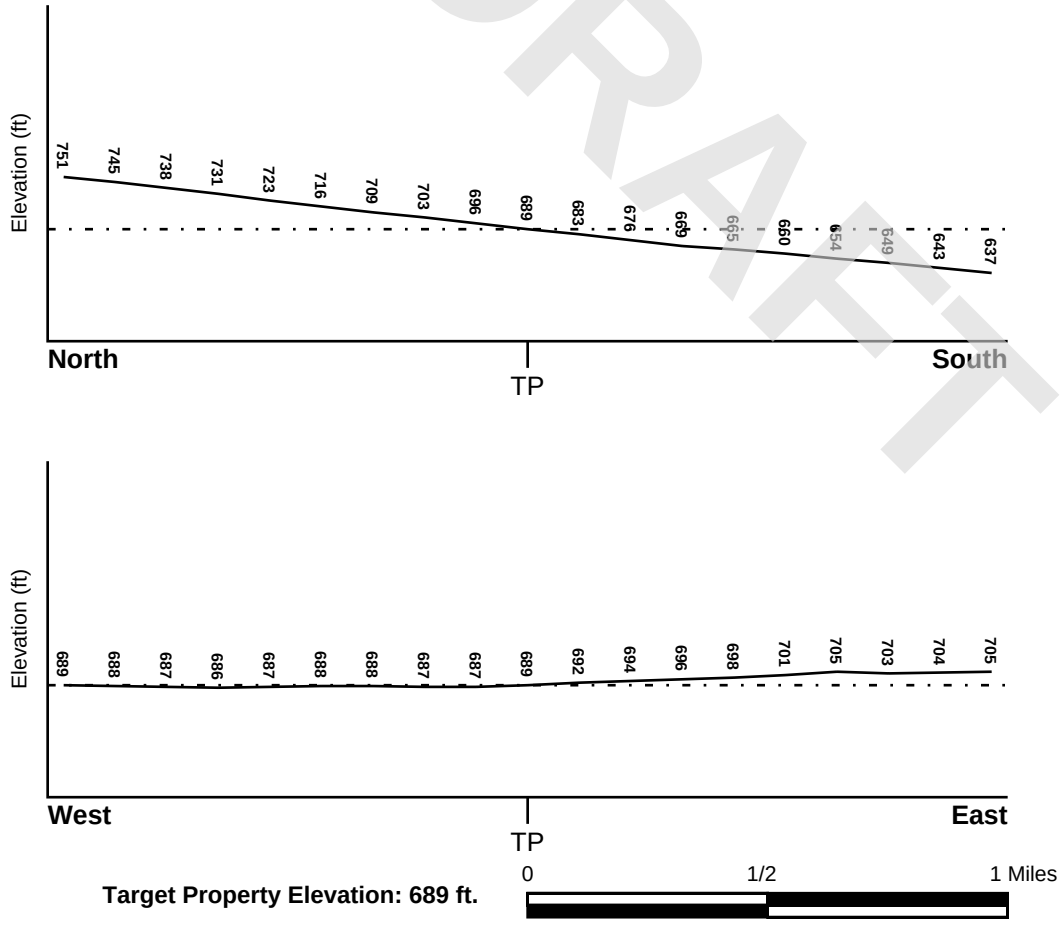

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

DRAFT

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06037C1750F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06071C8620H	FEMA FIRM Flood data
06071C8615H	FEMA FIRM Flood data
06071C9330H	FEMA FIRM Flood data
06071C9335H	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
ONTARIO	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
C10	1/4 - 1/2 Mile SE	Not Reported
2G	1/4 - 1/2 Mile SE	Not Reported

For additional site information, refer to Physical Setting Source Map Findings.

DRAFT

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: CHINO

Soil Surface Texture: silt loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	16 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 7.9
2	16 inches	59 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 7.9

Soil Map ID: 2

Soil Component Name: GRANGEVILLE

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Somewhat poorly drained

DRAFT

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

DRAFT

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by AEI Consultants were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 1648-4FCA-B036

PO # 330766

Project 475849

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 1648-4FCA-B036

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1965 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 1320 feet of the target property.

Summary information obtained is provided in the text of this report.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

Request

Re: 13610 Yorba Avenue, Chino, CA 91710

Please provide the following:

BUILDING DEPARTMENT:

*****Permit summary (date, type of permit, applicant/tenant) or available permits from construction to present. Upon review of a permit summary we may request review of individual permits.
*****Construction date (current building, previous buildings if applicable).

*****List of tenants which have occupied the subject property.

*****Permits of environmental concern (petroleum storage tanks, septic systems, oil/water separators).

*****Oldest and most recent site layout plan from the above mentioned property if available.

*****Erosion control plans on record for the subject property.

*****Record violations or complaints registered against the subject property.

PLANNING DEPARTMENT:

*****Record of any Activity Use Limitations (AULs) in connection with the property. AULs are typically in place at sites which would prevent future uses of a property.

DRAFT

*****Subject property zoning and any current zoning violations.

FIRE DEPARTMENT:

*****Records regarding hazardous materials usage/storage/incidents or known environmental concerns/contamination which may have affected the property,

*****Records regarding aboveground or underground storage tank (UST) systems, which are currently or historically located at the property.

*****Records of fire inspections at the subject property.

Requester + Staff

Good afternoon,

I noticed that your request includes fire code violations, please note that City contracts its fire/medical services with the Chino Valley Independent Fire District, so they would be the custodian of any fire-related records. To request these records, please re-direct your request to Chino Valley Independent Fire District at https://chinovalleyfiredistrict.nextrequest.com/.

If you have any questions, please feel free to let us know.

Thank you,

City of Chino

March 6, 2023, 5:26pm by Natalie Gonzaga, Deputy City Clerk (Staff)

External Message

Requester + Staff

Hello,

Thank you for submitting your public records request to the City of Chino. Our city staff will begin working on your request and will provide our 10-day determination. Please note the 10-day window to make a determination will begin immediately if received during Monday through Friday from 7:30 a.m. to 5:30 p.m. All requests received on National Holidays or weekends will be counted as received on the immediate weekday with regular operating hours.

Chino Valley Fire District Public Records

Record request #23-63 has been closed. The closure reason supplied was:

Thank you for your request. We were not able to locate any records per your request.

Please contact the County of San Bernardino, Office of the State Fire Marshal as they oversee historical USTs on site, as well as all permitted facilities who handle hazardous materials, generate hazardous waste, above ground petroleum storage tanks (APSA), underground storage tanks (UST's), California Accidental Release Program (Cal ARP businesses who handle state and federally regulated hazardous materials) and tiered permitting sites (businesses who treat hazardous waste to make it less hazardous or nonhazardous. Their contact number is (909)386—8401.

FILE REVIEW REQUEST

- ❑ I hereby request access to, or copies, of the following identified record at no charge other than the fee for any copies at 25 cents per page.
- ❑ I hereby request access to the Hazardous Materials Emergency Business Plan only, pursuant to Chapter 6.95, Health and Safety Code, Community Right-to-Know provisions.
- ❑ I am the owner of the facility or property described below.

FACILITY OR PROPERTY NAME _____

PROPERTY ADDRESS

(Exact address must be provided.) 13610 Yorba Avenue, Chino, CA 91710

RECORD TYPE Hazardous Materials Records

RECORD DATE Records after Oct. 2022 FILE OR I.D. NO. _____

DOCUMENT DESCRIPTION Records pertaining to hazardous materials, USTs, ASTs, leaks or spills.

REQUESTED BY:

Individual Name Ron Russell Title Environmental Professional

Company Name AEI Consultants

Mailing Address 9431 Haven Avenue, Suite 100 Rancho Cucamonga, CA 91730

Phone No. ( ) (909) 631-5907 Fax ( ) (909) 912-1901

Email address: ronmrussell @ gmail.com

SIGNATURE: Ron Russell DATE 3/8/23

This is NOT a request for Certified Hazardous Materials Records Search Finding Report.
Records retrieved and provided are based solely on the information provided above.
A separate application is required for each record requested.

Access to or copies of any reasonably identified record not otherwise restricted by law or exempt from disclosure will be provided without charge except direct costs of duplication.

Copies of records will be made at a charge of 25 cents per page. Or, you may bring a portable copier or digital camera to your appointment, or contact a private copy service who can come on site, make copies, and arrange delivery to you. We are unable to authorize removal of original records from this office.

Hazardous Materials Division files are working files and may be signed out to various Division program staff. As a result, there may be a delay in retrieving records if records are signed out to staff. Once the record is retrieved and evaluated, a file review appointment can be scheduled. You will be contacted by phone to schedule an appointment or arrange copies.

Records provided for public review are screened and evaluated for information for which disclosure is not required or is prohibited by law, or for which the interest in non-disclosure clearly outweighs the interest served by disclosure.

DRAFT

EXECUTIVE SUMMARY

AEI Consultants (AEI) was retained by George Fredric Putnam Trust to conduct a Phase I ESA in conformance with AEI's contract and the scope and limitations of ASTM Standard Practice E1527-13 and E1527-21 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), for the property located at 13610 Yorba Avenue, Chino, San Bernardino County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

Pertinent subject property information is noted below:

Property Information	
Site Address(es)	13610 Yorba Avenue, Chino, San Bernardino County, - California 91710
Property ID (APN or Block/Lot)	101-950-101 and 101-951-107
Location	Northwest corner of the intersection of Yorba Avenue and Schaefer Avenue
Property Type	Mixed-Use (Office, Retail, and/or Multifamily)
Site and Building Information	
Approximate Site Acreage/Source	13.96/Assessor
Number of Buildings	Four
Building Construction Date(s)/Source	1916/Assessor
Building Square Footage (SF)/Source	1,858/Assessor
Number of Floors/Stories	One
Basement or Subgrade Area(s)	Yes; partial basement
Number of Units	N/A
Additional Improvements	The subject property is improved with a single family residence which has been vacant for at least the past five years. The residence contains an asphalt paved driveway as well as a large pool area with an emptied in-ground pool. Additionally, the subject property has a horse stable and chicken coop which are currently in use as storage buildings. The property is developed with a barn which has been converted into a residence. The northern portion of the subject property has been paved with gravel and is currently in use as a parking lot/ storage area for motor vehicles, primarily diesel trucks.
On-site Occupant(s)	N/A
Current On-site Operations/Use	As of the issuance of this report, the subject property is occupied by the former ranch hand and his auto parking business; however, according to the subject property owner representative, he has been served an eviction notice and all property belonging to him and his business must be removed from the site by November 14, 2022.
Current Use of Hazardous Substances	None identified
Regulatory Information	
Regulatory Database Listing(s)	None identified

A chronological summary of historical subject property information is as follows:

DRAFT

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
Prior to 1916	Unknown use/Data failure; refer to Section 1.6.1	Aerial photographs, city directories, topographic maps, agency records, interviews
1916	Current residential dwelling constructed (13610 Yorba Avenue)	Agency records
1938-1977	Agricultural land with current farmstead	Aerial photographs, interviews
1985-Present	Farmstead on otherwise vacant land	Agency records

The immediately surrounding properties consist of the following:

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
North	Vacant Land (APN: 101-951-106)	Yes; refer to Section 5.1
East	Yorba Avenue followed by: Anderson International Trading (13551 Yorba Avenue) Executive Plastics, Inc. (13575 Yorba Avenue) AST Enzymes (13591 Yorba Avenue) Wing Lee Farms (13625 Yorba Avenue) American Beef Packers Inc (13677 Yorba Avenue) Schaefer Avenue followed by: Multi-tenant commercial office (4711 Schaefer Avenue)	Yes; refer to Section 5.1
South	Schaefer Avenue followed by: Diamond Wipes International, Inc. (4651 Schaefer Avenue)	Yes; refer to Section 5.1
West	Schaefer Avenue followed by: ProColor Collision Chino (4590 Schaefer Avenue) Road America, Inc (4525 Schaefer Avenue) Inland Countertops, Inc. (4575 Carter Court) Domestic Diesel & Auto Services (4588 Carter Court) Chino Mini Storage (13555 Ramona Avenue) Buena Vista High School (13509 Ramona Avenue)	Yes; refer to Section 5.1

DRAFT

Findings and Opinions

Significant Data Gap(s) is defined by the current ASTM Standard E1527 as a data gap that affects the ability of the environmental professional to identify a recognized environmental condition.

AEI did not identify significant data gaps which affected our ability to identify RECs.

Recognized Environmental Condition (REC) is defined by the current ASTM Standard E1527 as the (1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

- AEI did not identify evidence of RECs during the course of this assessment.

Controlled Recognized Environmental Condition (CREC) is defined by the ASTM Standard E1527 as a recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).

- AEI did not identify evidence of CRECs during the course of this assessment.

Historical Recognized Environmental Condition (HREC) is defined by the ASTM Standard E1527 as a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations).

- AEI did not identify evidence of HRECs during the course of this assessment.

Other Environmental Considerations (OEC) warrant discussion, but do not qualify as RECs as defined by the current ASTM Standard E1527. These include, but are not limited to, de minimis conditions and/or environmental considerations such as the presence of ACMs, LBP, radon, mold, and lead in drinking water, which can affect the liabilities and financial obligations of the client, the health and safety of site occupants, and the value and marketability of the subject property. A de minimis condition is defined by the ASTM Standard as a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

- Due to the age of the subject property buildings, there is a potential that ACMs are present. AEI was not provided access to the interiors of the buildings (buildings were locked and boarded up), therefore the condition of suspect ACMs could not be evaluated. Based on the potential presence of ACMs, AEI recommends the implementation of an O&M Plan which stipulates that the repair and maintenance of damaged materials should be performed to protect the health and safety of the building occupants. In the event that building renovation or demolition activities are planned, a thorough asbestos survey to identify asbestos-containing building materials is required in accordance with the EPA NESHAP 40 CFR Part 61 prior to demolition or renovation activities that may disturb suspect ACMs.

DRAFT

- Due to the age of the subject property buildings, there is a potential that LBP is present. AEI was not provided access to the interiors of the buildings (buildings were locked and boarded up), therefore the condition of interior painted surfaces could not be evaluated. During the site reconnaissance, AEI observed damaged and peeling paint on the exterior of the subject property residence as well as on some of the barn structures. Based on the potential presence of LBP, AEI recommends the property owner implement an O&M Plan which stipulates that the assessment, repair and maintenance of damaged painted surfaces be performed to protect the health and safety of the building occupants. Local regulations may apply to LBP in association with building demolition/renovations and worker/occupant protection. Actual material samples would need to be collected or an x-ray fluorescence (XRF) survey performed in order to determine if LBP is present. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.
- AEI did not observe interior areas of the subject property buildings, as the buildings were locked and boarded up. According to Cyndy Franz, owner representative, the subject property residence has been vacant and unoccupied for at least the last three years. Mrs. Franz informed AEI that due to the state of dilapidation of the building as well as the vast material build up located inside the building, she did not feel comfortable escorting the assessor through the building. Additionally, Mrs. Franz stated that on the few occasions in which personnel have been allowed into the building, they have been in full protection gear in order to protect from any and decomposing material and animal feces present. Based on absence of mechanical ventilation for an extended period of time, the interior finishes may have been impacted by condensation and ensuing mold.
- The south adjoining site across Schaefer Avenue, Diamond Wipes International, Inc., is a heavy industrial manufacturer of wet wipes. This facility has various listings detailing the treatment and disposal of liquid and.or semisolid waste as well as seasonal discharge of contaminated water. Additionally, this facility is listed in both the NPDES and CIWQS databases in relation to their industrial storm water discharge. See Section 5.1 for additional details. Further investigation is pending. PFAS are not currently classified by CERCLA as a hazardous substance and thus the potential presence of PFAS does not represent a REC at this time. However, the report User should be aware that regulatory criteria and classifications are subject to change. As such, it would be prudent for the property owner to review future assessment reports associated with this facility to ensure that the subject property is not impacted.

CONCLUSIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and E1527-21, of 13610 Yorba Avenue, Chino, San Bernardino County, California, the *subject property*. Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

This assessment has revealed no evidence of recognized environmental conditions, controlled recognized environmental conditions, or significant data gaps in connection with the subject property.

RECOMMENDATIONS

AEI recommends no further investigation for the subject property at this time.

DRAFT

1.0 INTRODUCTION

This report documents the methods and findings of the Phase I Environmental Site Assessment performed in conformance with AEI's contract and scope and limitations of ASTM Standard Practice E1527-13 and E1527-21 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), for the property located at 13610 Yorba Avenue, Chino, San Bernardino County, California (Appendix A: Figures and Appendix B: Property Photographs).

1.1 Scope of Work

The purpose of the Phase I ESA is to assist the client in identifying potential RECs, in accordance with the most current ASTM E1527 Standard associated with the presence of any hazardous substances or petroleum products, their use, storage, and disposal at and in the vicinity of the subject property. Property assessment activities focused on: 1) a review of federal, state, tribal, and local databases that identify and describe underground fuel tank sites, leaking underground fuel tank sites, hazardous waste generation sites, and hazardous waste storage and disposal facility sites within the ASTM approximate minimum search distance; 2) a property and surrounding site reconnaissance, and interviews with the past and present owners and current occupants and operators to identify potential environmental contamination; and 3) a review of historical sources to help ascertain previous land use at the site and in the surrounding area.

1.2 Additional Services

Other Environmental Considerations such as ACMs, LBP, lead in drinking water, radon, mold, and wetlands can result in business environmental risks for property owners which may disrupt current or planned operations or cash flow and are generally beyond the scope of a Phase I assessment as defined by the current ASTM Standard E1527. Based upon the agreed-on scope of services this ESA did not include subsurface or other invasive assessments, business environmental risks, or other services not specifically identified and discussed herein.

1.3 Significant Assumptions

The following assumptions are made by AEI in this report. AEI relied on information derived from secondary sources including governmental agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, and personal interviews. AEI has reviewed and evaluated the thoroughness and reliability of the information derived from secondary sources including government agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, or personal interviews. It appears that all information obtained from outside sources and reviewed for this assessment is thorough and reliable. However, AEI cannot guarantee the thoroughness or reliability of this information.

Groundwater flow, unless otherwise specified by on-site well data or well data from the subject property or nearby sites, is inferred from contour information depicted on the USGS topographic maps. AEI assumes the property has been correctly and accurately identified by the client, designated representative of the client, property contact, property owner, and property owner's representatives.

DRAFT

1.4 LIMITATIONS

Property conditions, as well as local, state, tribal, and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this assessment apply strictly to the environmental regulations and property conditions existing at the time the assessment was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the property. AEI makes no warranty, expressed or implied, except that the services have been performed in accordance with generally accepted environmental property assessment practices applicable at the time and location of the assessment.

Considerations identified by ASTM as beyond the scope of a Phase I ESA that may affect business environmental risk at a given property include the following: ACMs, radon, LBP, lead in drinking water, wetlands, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, mold, and high voltage lines. These environmental issues or conditions may warrant assessment based on the type of the property transaction; however, they are considered non-scope issues under the current ASTM Standard E1527.

If requested by the client, these non-scope issues are discussed herein. Otherwise, the purpose of this assessment is solely to satisfy one of the requirements for qualification of the innocent landowner defense, contiguous property owner or bona fide prospective purchaser under CERCLA. The current ASTM Standard E1527 and the United States EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) constitute the "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in:

1. 42 U.S.C. § 9601(35)(B), referenced in the current ASTM Standard E1527.
2. Sections 101(35)(B) (ii) and (iii) of CERCLA and referenced in the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312).
3. 42 U.S.C. § 9601(40) and 42 U.S.C. § 9607(q).

The Phase I Environmental Site Assessment is not, and should not be construed as, a warranty or guarantee about the presence or absence of environmental contaminants that may affect the property. Neither is the assessment intended to assure clear title to the property in question. The sole purpose of assessment into property title records is to ascertain a historical basis of prior land use. All findings, conclusions, and recommendations stated in this report are based upon facts, circumstances, and industry-accepted procedures for such services as they existed at the time this report was prepared (i.e., federal, state, and local laws, rules, regulations, market conditions, economic conditions, political climate, and other applicable matters). All findings, conclusions, and recommendations stated in this report are based on the data and information provided, current subject property use, and observations and conditions that existed on the date and time of the property reconnaissance.

Responses received from local, state, or federal agencies or other secondary sources of information after the issuance of this report may change certain facts, findings, conclusions, or circumstances to the report. A change in any fact, circumstance, or industry-accepted procedure upon which this report was based may adversely affect the findings, conclusions, and recommendations expressed in this report.

DRAFT

AEI's limited radon screening, if included, is intended to provide a preliminary screening to evaluate the potential presence of elevated radon concentrations at the site. The proposed scope is not intended to define the full extent of the presence of radon at the subject property. As such, the results should be used for lending purposes only. The recommendations and conclusions presented as a result of the limited preliminary radon screening apply strictly to the property conditions existing at the time the sampling was performed. The sample analytical results are only valid for the time, place, and condition of the site at the time of collection and AEI does not warrant that the results will be repeatable or are representative of past or future conditions.

1.5 Limiting Conditions/Deviations

The performance of this assessment was limited by the following:

- While additional assessments may have been conducted on the subject property, these documents must be provided for AEI's review in order for the information to be summarized/included in this report. Please refer to Section 6.3 for a summary of previous reports and other documentation provided to AEI during this assessment.
- The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.
- A search of historical city directories was not conducted for the adjoining sites to the west. Based on the construction of the buildings primarily during regulatory oversight times and the identified listings for the sites in the regulatory database, this limitation is not expected to alter the Findings of this assessment.
- The subject property owner was not interviewed during this assessment. Based on information obtained from other sources, including the key site manager, this limiting condition is not expected to alter the overall findings of this assessment.
- Due to the large volume of materials within portions of the building and vehicles parked within exterior areas, direct visual observation of many of the floor and wall areas of the building and exterior ground surfaces was not possible. Features may be present that were not observed during AEI's field reconnaissance. Based on the quality of information obtained from other sources, this limitation is not expected to alter the overall findings of this assessment.
- Due to unsafe conditions during the site reconnaissance, AEI was not able to view the entirety of the subject property. AEI's observations of the subject property were limited to outdoor areas of the property. No buildings were assessed during the reconnaissance. In addition, supplemental interview information was available from Mrs. Cyndy Franz, key site manager and owner representative, in person as she escorted AEI through the property. Based on information obtained by Mrs. Franz, this limitation is not expected to significantly alter the findings of this assessment.
- At the time of the site reconnaissance, the residence and surrounding surfaces were covered fallen leaves, storage overfill, and stray animals and therefore could not be directly observed. Based on the nature of occupancy of the property, as well as information obtained by the owner representative, this limitation is not expected to significantly change the findings of this report.

DRAFT

1.6 Data Failure and Data Gaps

According to the current ASTM Standard E1527, data gaps occur when the Environmental Professional is unable to obtain information required by the Standard, despite good faith efforts to gather such information. Pursuant to the current ASTM Standard E1527, only significant data gaps, defined as those that affect the ability of the Environmental Professional to identify RECs, need to be documented.

Data failure is one type of data gap. According to the current ASTM Standard E1527, data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met. Pursuant to the current ASTM Standard E1527, historical sources are required to document property use back to the property's first developed use or back to 1940, whichever is earlier, or periods of five years or greater.

1.6.1 Data Failure

The following data failure was identified during the course of this assessment:

Data Failure	The earliest historical resource obtained during this assessment was assessor's office information indicating that the subject property was developed with a residence in 1916. The lack of historical sources for the subject property dating back to first developed use represents historical data source failure. However, as it is assumed that the subject property would have been previously used for residential and/or agricultural purposes, if not undeveloped, this data failure is not expected to significantly alter the findings of this assessment.
Information/Sources Consulted	Aerial photographs, city directories, topographic maps, agency records, interviews

1.6.2 Significant Data Gaps

AEI did not identify significant data gaps which affected our ability to identify RECs.

1.7 Reliance

All reports, both verbal and written, are for the benefit of George Fredric Putnam Trust. This report has no other purpose and may not be relied upon by any other person or entity without the written consent of AEI. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with AEI granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against AEI, its officers, employees, vendors, successors or assigns. Reliance is provided in accordance with AEI's contract and Terms and Conditions executed by George Fredric Putnam Trust on October 17, 2022. The limitation of liability defined in the Terms and Conditions is the aggregate limit of AEI's liability to the client and all relying parties.

DRAFT

2.0 SITE AND VICINITY DESCRIPTION

2.1 Site Location and Description

Property Information	
Site Address(es)	13610 Yorba Avenue, Chino, San Bernardino County, - California 91710
Property ID (APN or Block/Lot)	101-950-101 and 101-951-107
Location	Northwest corner of the intersection of Yorba Avenue and Schaefer Avenue
Property Type	Mixed-Use (Office, Retail, and/or Multifamily)
Site and Building Information	
Approximate Site Acreage/Source	13.96/Assessor
Number of Buildings	Four
Building Construction Date(s)/Source	1916/Assessor
Building Square Footage (SF)/Source	1,858/Assessor
Number of Floors/Stories	One
Basement or Subgrade Area(s)	Yes; partial basement
Number of Units	N/A
Additional Improvements	The subject property is improved with a single family residence which has been vacant for at least the past five years. The residence contains an asphalt paved driveway as well as a large pool area with an emptied in-ground pool. Additionally, the subject property has a horse stable and chicken coop which are currently in use as storage buildings. The property is developed with a barn which has been converted into a residence. The northern portion of the subject property has been paved with gravel and is currently in use as a parking lot/ storage area for motor vehicles, primarily diesel trucks.
On-site Occupant(s)	N/A
Current On-site Operations/Use	As of the issuance of this report, the subject property is occupied by the former ranch hand and his auto parking business; however, according to the subject property owner representative, he has been served an eviction notice and all property belonging to him and his business must be removed from the site by November 14, 2022.
Current Use of Hazardous Substances	None identified
Regulatory Information	
Regulatory Database Listing(s)	None identified

2.2 On-Site Utilities

Utility	Source/System Information
Heating System	Natural gas
Cooling System	Electricity
Potable Water	City of Chino Utilities
Sewage Disposal/Treatment	City of Chino Utilities

According to Mrs. Cyndy Franz, key site manager and owner representative, the subject property main residence has been disconnected from utilities for at least the past five years. However, the subject property barn was converted into a residence approximately 18 years

ago and is still occupying public utilities. The information provided in the table above pertains to the aforementioned residence and was was provided by Mrs. Cyndy Franz, key site manager and owner representative.

2.3 Site and Vicinity Characteristics

The subject property is located in a mixed use industrial and residential area of Chino, California. The immediately surrounding properties consist of the following:

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
North	Vacant Land (APN: 101-951-106)	Yes; refer to Section 5.1
East	Yorba Avenue followed by: Anderson International Trading (13551 Yorba Avenue) Executive Plastics, Inc. (13575 Yorba Avenue) AST Enzymes (13591 Yorba Avenue) Wing Lee Farms (13625 Yorba Avenue) American Beef Packers Inc (13677 Yorba Avenue) Schaefer Avenue followed by: Multi-tenant commercial office (4711 Schaefer Avenue)	Yes; refer to Section 5.1
South	Schaefer Avenue followed by: Diamond Wipes International, Inc. (4651 Schaefer Avenue)	Yes; refer to Section 5.1
West	Schaefer Avenue followed by: ProColor Collision Chino (4590 Schaefer Avenue) Road America, Inc (4525 Schaefer Avenue) Inland Countertops, Inc. (4575 Carter Court) Domestic Diesel & Auto Services (4588 Carter Court) Chino Mini Storage (13555 Ramona Avenue) Buena Vista High School (13509 Ramona Avenue)	Yes; refer to Section 5.1

2.4 Physical Setting

Geologic Unit: Description/Source	Q: Marine and nonmarine (continental) sedimentary rocks derived from the Pleistocene-Halocene era. This composition consists of alluvium, lake, playa, and terrace deposits; unconsolidated and semi-consolidated mostly nonmarine in nature, but includes marine deposits near the coast./USGS and United States Department of the Interior
Soil Series: Description/Source	Cb: Chino silt loam is a soil composition that lies anywhere from 20 to 3,100 feet in elevation and typically receives 8 to 20 inches of precipitation annually. If properly irrigated, this soil type makes for prime farmland. The soil landform is composed of linear, talf, toeslope basin floors and flood plains of alluvium derived from mixed material. This soil type is somewhat poorly drained and has a medium level runoff class. It is rare for soil of this composition to flood or pond. /USDA Soil Survey
Groundwater Flow Direction/Source	South-to-southwest/Topographic map interpretation
Estimated Depth to Groundwater/Source	37-50 feet bgs/Case Closure Summary for Chino Automotive Services located at 13688 Cental Avenue, Chino, California 91710

DRAFT

Surface waters on the subject property or adjoining sites	None
Additional notes	None

Note: Groundwater flow direction can be influenced locally and regionally by the presence of local wetland features, surface topography, recharge and discharge areas, horizontal and vertical inconsistencies in the types and location of subsurface soils, and proximity to water pumping wells. Depth and gradient of the water table can change seasonally in response to variation in precipitation and recharge, and over time, in response to urban development such as storm water controls, impervious surfaces, pumping wells, cleanup activities, dewatering, seawater intrusion barrier projects near the coast, and other factors.

DRAFT

3.0 HISTORICAL RECORDS REVIEW

Reasonably ascertainable standard historical sources as outlined in the current ASTM Standard E1527 were used to determine previous uses and occupancies of the subject property that are likely to have led to RECs in connection with the subject property. A chronological summary of historical data found, including but not limited to aerial photographs, historical city directories, Sanborn fire insurance maps, and agency records, is as follows:

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
Prior to 1916	Unknown use/Data failure; refer to Section 1.6.1	Aerial photographs, city directories, topographic maps, agency records, interviews
1916	Current residential dwelling constructed (13610 Yorba Avenue)	Agency records
1938-1977	Agricultural land with current farmstead	Aerial photographs, interviews
1985-Present	Farmstead on otherwise vacant land	Agency records

A review of historical aerial photographs indicates that the subject property was formerly developed as a farmstead which included the current building as well as other residential and/or agricultural-type structures. Due to the historical use of the subject property, the potential exists that fuel tanks may have formerly been present on site. However, no documentation of any fuel tanks at the subject property was found during the course of this assessment; therefore, this former use is not expected to represent a significant environmental concern.

If available, copies of historical sources are provided in Appendix D.

3.1 AERIAL PHOTOGRAPHS

AEI reviewed aerial photographs of the subject property and surrounding area. A search was made of the EDR collection of aerial photographs. Aerial photographs were reviewed for the following years (1938-2016, non-inclusive):

Year(s)	Subject Property Description	Adjoining Site Descriptions
1938	Current residential dwelling present on the central eastern edge of the property. Northern portion of the property developed with agricultural orchards. Southern portion of subject property remains vacant.	NORTH: Agricultural land EAST: Roadway followed by agricultural land SOUTH: Roadway followed by agricultural land as well as two residential dwellings WEST: Agricultural land
1946, 1948, 1953	Previous orchards and vacant land redeveloped with row crops; residence remained unchanged	NORTH: No significant changes EAST: No significant changes SOUTH: No significant changes WEST: No significant changes
1959	Corral added onto the western edge of the subject property residence	NORTH: No significant changes EAST: No significant changes SOUTH: Additional residential dwelling constructed across roadway, otherwise no significant changes WEST: No significant changes
1964	No significant changes	NORTH: Residential dwelling constructed on otherwise agricultural land EAST: Roadway followed by agricultural land

DRAFT

Year(s)	Subject Property Description	Adjoining Site Descriptions
		as well as a single commercial/industrial building SOUTH: No significant changes WEST: No significant changes
1966	Previous coral separated into smaller corrals/stables.	NORTH: No significant changes EAST: Roadway followed by both agricultural and vacant land as well as previous commercial.industrial building SOUTH: Previous agricultural land largely cleared into what appears to be a track WEST: No significant changes
1975	Northern portion of subject property cleared and graded, otherwise no significant changes	NORTH: No significant changes EAST: Roadway followed by agricultural land as well as two commercial/industrial buildings SOUTH: Previous track redeveloped agriculturally WEST: No significant changes
1977	Previous corrals expanded northward and additional building constructed, otherwise no significant changes	NORTH: No significant changes EAST: No significant changes SOUTH: No significant changes WEST: No significant changes
1985, 1989, 1994	All previous agricultural land cleared and graded; previous residence still present	NORTH: No significant changes EAST: Roadway followed by several industrial buildings SOUTH: Roadway followed by vacant land as well as the current large industrial building WEST: Vacant land as well as two commercial/industrial buildings and a storage center
2002, 2005	Dirt race track developed on the northern portion of property; otherwise no significant changes	NORTH: Dirt race track developed on property; previous residence still present EAST: No significant changes SOUTH: Roadway followed by current industrial buildings WEST: Current commercial/industrial buildings as well as a storage center
2009, 2012, 2016	Former racetrack no longer present, otherwise no significant changes	NORTH: Former track and residential dwelling no longer present; cleared graded land EAST: No significant changes SOUTH: No significant changes WEST: No significant changes

Subject property:

- Agricultural land - Refer to Section 3.0

Adjoining Sites:

- Large-scale industrial facilities - Refer to Section 5.1

DRAFT

3.2 Sanborn Fire Insurance Maps

Sanborn Fire Insurance maps were developed in the late 1800s and early 1900s for use as an assessment tool for fire insurance rates in urbanized areas. A search was made of the EDR collection of Sanborn Fire Insurance maps.

Sanborn map coverage was not available for the subject property.

3.3 City Directories

A search of historical city directories was conducted for the subject property utilizing EDR. No potential tenants of concern were identified based on AEI's review of the historical city directories. Directories were reviewed in approximate five-year increments from 1922-2017, non-inclusive. The first listing for the subject property appeared in 1965. The following table summarizes the results of the city directory search.

Subject Property

Year(s)	Address - Occupant Listed
1965	13610 Yorba Avenue - George Putnam
1999	13610 Yorba Avenue - Alonso Sarabia
2003	13610 Yorba Avenue - George Putnam, Alonso Sarabia
2004, 2009, 2014	13610 Yorba Avenue - Alonso Sarabia

If listed above, XXXX indicates that the address is valid but there is no occupancy information available.

A search of historical city directories was also conducted for the adjoining sites noted below utilizing EDR. Please refer to the appendices for a complete list of historical adjoining site tenants identified by EDR. The table below summarizes the potential tenants of concern based on AEI's review of the historical city directories.

Adjoining Site Addresses

Direction	Address(es)
North	N/A
East	13551-13677 Yorba Avenue, 4711 Schaefer Avenue
South	4651 Schaefer Avenue
West	4525 and 4590 Schaefer Avenue, 4575 and 4588 Carter Court, 13509 and 13555 Ramona Avenue

City directory coverage was not obtained for the adjoining sites to the west, refer to Section 1.5.

3.4 Historical Topographic Maps

In an attempt to close any data failure, AEI reviewed historical topographic maps utilizing NETR Online (www.historicaerials.com). Historical topographic maps were reviewed for the years 1897-1982, non-inclusive. No additional historical information was obtained from available topographic maps.

3.5 Chain of Title

Based on the quality of information obtained from other sources, a chain of title search was not performed as part of this assessment.

DRAFT

4.0 REGULATORY AGENCY RECORDS REVIEW

Local and state agencies, such as environmental health departments, fire prevention bureaus, and building and planning departments are contacted to identify any current or previous reports of hazardous substance use, storage, and/or unauthorized releases that may have impacted the subject property. In addition, information pertaining to AULs, defined as legal or physical restrictions, or limitations on the use of, or access to, a site or facility, is requested.

4.1 Local Environmental Health Department and/or State Environmental Agency

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
San Bernardino County Fire Department Hazardous Material Division (SBCoFD HMD)	October 28, 2022	Email	Mrs. Christina Rivera, Office Specialist	No hazardous substances records on file

4.2 Fire Department

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Chino Valley Fire District (-CVFD)	October 31, 2022	Online	N/A	No records on file

4.3 Building Department

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
The City of Chino Building Division (CBD)	October 31, 2022	Online	N/A	No records on file

4.4 Planning Department

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
City of Chino Planning Division (-CPD)	October 31, 2022	Online and via telephone	N/A	No evidence indicating the existence of AULs on file for the subject property

4.5 Assessor's Office

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
San Bernardino County Assessor's Office	October 31, 2022	Online	N/A	Information obtained is discussed below

Records Summary

APN	101-950-101 and 101-951-107
Acreage	13.96 acres
Construction Date	1916

DRAFT

Building Square Footage	1,858 square feet
Current Owner	George F Putman Trust
Additional Information	According to client provided information, the subject property consists of 13.81 acres which were developed in 1918, however, according to information obtained from the San Bernardino County Assessor's office, the subject property consists of 13.96 acres and was developed with a single family residence in 1916.

4.6 Other Agencies Searched

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
CA State Water Resources Control Board (SWRCB) GeoTracker	October 31, 2022	Online	N/A	No records on file
SWRCB GeoTracker Historical Hazardous Substance Storage Information	October 31, 2022	Online	N/A	No records on file
CA Department of Toxic Substances Control (DTSC) Hazardous Waste Tracking System (HWTS)	October 31, 2022	Online	N/A	No records on file
CA DTSC EnviroStor	October 31, 2022	Online	N/A	No records on file
CalEPA Regulated Site Portal	October 31, 2022	Online	N/A	No records on file
South Coast Air Quality Management District (AQMD)	October 31, 2022	Online	N/A	No records on file

No other agencies were contacted during the course of this assessment.

4.7 Oil and Gas Wells

Agency	Date Referenced	Resource	Oil or gas wells located within 500 feet of the subject property
California Geologic Energy Management Division (CalGEM)	October 28, 2022	CalGEM Map	No

4.8 Oil and Gas Pipelines

Agency	Date Referenced	Resource	Pipelines located within 500 feet of the subject property
National Pipeline Mapping System (NPMS)	October 28, 2022	NPMS Public Map Viewer	No

4.9 State Environmental Superliens

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state environmental superliens.

DRAFT

4.10 State Property Transfer Laws

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state property transfer laws.

DRAFT

5.0 REGULATORY DATABASE RECORDS REVIEW

AEI contracted EDR to conduct a search of publicly available information from federal, state, tribal, and local databases containing known and suspected sites of environmental contamination and sites of potential environmental significance. Data gathered during the current regulatory database search is compiled by EDR into one regulatory database report. Location information for listed sites is designated using geocoded information provided by federal, state, or local agencies and commonly used mapping databases with the exception of "Orphan" sites. Due to poor or inadequate address information, Orphan sites are identified but not geocoded/mapped by EDR, rather, information is provided based upon vicinity zip codes, city name, and state. The minimum search distance from the federal and state environmental records database listings specified in the current ASTM Standard E1527 is included in Section 5.1. A copy of the regulatory database report, which includes detailed descriptions of the databases noted below as well as the total number of sites identified, is included in Appendix C of this report.

In determining if a listed site is a potential environmental concern to the subject property, AEI generally applies the following criteria to classify the site as lower potential environmental concern: 1) the site only holds an operating permit (which does not imply a release), 2) the site's distance from, and/or topographic position relative to, the subject property, and/or 3) the site has recently been granted "No Further Action" by the appropriate regulatory agency.

Regulatory database listings associated with the subject property, adjoining site(s) and/or nearby sites of concern that were determined to warrant additional discussion are identified and further discussed in Section 5.1.

DRAFT

5.1 RECORDS SUMMARY

Database	Search Distance (Miles)	Subject Property	Adjoining Site(s)	Other Nearby Sites of Concern
Federal NPL (Superfund) sites	1.0			
Federal Delisted NPL sites	0.5			
Federal CERCLA removals/orders sites	0.5			
Federal CERCLA sites with NFRAP	0.5			
Federal RCRA facilities undergoing Corrective Action	1.0			
Federal RCRA TSD facilities	0.5			
Federal RCRA generators (LQG, SQG, VSQG)	SP/ADJ		✔	
Federal RCRA NonGen/NLR sites	SP/ADJ		✔	
Federal IC/EC sites	SP			
Federal ERNS sites	SP			
State- and tribal "Superfund" equivalent sites	1.0			
State- and tribal hazardous waste facilities	0.5			
State/Tribal landfill and solid waste disposal facilities	0.5			
State/Tribal leaking storage tanks	0.5			
State/Tribal registered storage tanks	SP/ADJ		✔	

Database	Search Distance (Miles)	Subject Property	Adjoining Site(s)	Other Nearby Sites of Concern
State/Tribal voluntary cleanup sites	0.5			
State/Tribal EC/IC registries	SP			
State/Tribal brownfield sites	0.5			
Orphans	N/A			
Additional Environmental Record lists	SP/ADJ		✔	

Facility Name	CVUSD Yorba Property
Address	31512 Yorba Avenue
Distance & Direction	Adjoining to the North
Hydrologic Position	Up-gradient
Databases Listed	RCRA NONGEN/NLR
Comments	Details provided for the RCRA Non Generator (NONGEN)/No Longer Regulated (NLR) listing identified the site as "not a generator, verified" in 2006. The NAICS Description provided for the business is "new housing operative builders". No violations were identified in connection with the RCRA listing. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern.

Facility Name	E S M Plastics
Address	13575 Yorba Avenue
Distance & Direction	Adjoining to the east across Yorba Avenue
Hydrologic Position	Up-gradient
Databases Listed	SAN BERN. CO. PERMIT
Comments	E S M Plastics was issued a special generator permit by San Bernardino County due to its storage and handling of special chemicals and hazardous materials. All permits have since expired as of the issuance of this report. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern.

Facility Name	American Lamb, Wing Lee Farms
Address	13625 Yorba Avenue
Distance & Direction	Adjoining to the east across Yorba Avenue
Hydrologic Position	Up-gradient
Databases Listed	SWEEPS UST, CA FID UST, HIST UST, SAN BERN. CO. PERMIT
Comments	Wing Lee Farms was granted a permit to store and operate using special chemicals and hazardous materials by San Bernardino County. This permit expired on March 31, 2018 and has not been renewed since. According to the regulatory database, a diesel fuel UST of unknown capacity was previously located at this facility. The database lists the UST as becoming active on July 1, 1985. Based on the inferred groundwater flow direction and the relative proximity to the subject property, a possible UST release at this site has the potential to impact the subject property. However, assessment of the subject property does not indicate that the subject property would be investigated as a source of this contamination. It is unlikely that the subject property owner would be responsible for any cleanup costs associated with the potential release at this site. Nevertheless, the site does pose a potential

DRAFT

	concern for vapor-phase contaminant migration to the subject property. However, based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern.

Facility Name	Specialty Enzymes & Biochemicals
Address	13591 Yorba Avenue
Distance & Direction	Adjoining to the east across Yorba Avenue
Hydrologic Position	Up-gradient
Databases Listed	SAN BERN. CO. PERMIT
Comments	Specialty Enzymes & Chemicals was issued a hazmat handler permit for facilities operating with 11-25 employees San Bernardino County. This permit has been expired since March 31, 2012. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern.

Facility Name	American Beef Packers Inc., Vandereyk Case, Atlas Meat
Address	13677 Yorba Avenue
Distance & Direction	Adjoining to the east across Yorba Avenue
Hydrologic Position	Up-gradient
Databases Listed	RCRA NONGEN/NLR, SWEEPS UST, CA FID UST, HIST UST, CHMIRS, NPDES, CERS, CERS HAZ WASTE, SAN BERN. CO. PERMIT
Comments	According to the regulatory database, this site was equipped with one (1) 3,000-gallon unleaded gasoline UST as well as one 5,000-gallon diesel UST which were installed on 1984. Although these USTs are listed in the HIST UST database, they are also listed in both the SWEEPS UST and CA FID UST databases as "active." No releases have been reported in association with this UST. Due to the lack of a documented release, the storage of hazardous materials within registered tanks is not a significant environmental concern. According to the regulatory database, this site is listed as a NPDES site for a basic industrial storm water discharge permit which was issued on November 13, 2008 and remains active as of the issuance of this report. No violations are reported in association with this permit. Based on the lack of reported violations, this listing is not expected to represent a significant environmental concern. Atlas Meat was listed as a CERS and CERS HAZ WASTE facility for its use as a chemical storage facility and hazardous waste generator, respectively. This facility received various citation notices between 2010 and 2022 for failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities, failure to properly label hazardous waste accumulation containers and portable tanks, failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method, and various other administrative violations; all violations have since been returned to compliance. Details provided for the RCRA Non Generator (NONGEN)/No Longer Regulated (NLR) listing identified American Beef Packers Inc as "not a generator, verified" in 2009. The NAICS Description provided for the business is "animal (except poultry) slaughtering". No violations were identified in connection with the RCRA listing.

PROOF

	American Beef Packers Inc was granted permits by San Bernardino County for its operation as a large quantity generator, hazardous material operator, and EPCRA facility. All permits pertaining to this facility expired on September 30, 2022 and remain inactive as of the issuance of this report. As such, these permits are not expected to be of significant environmental concern. According to the regulatory database, this site is listed as a CHMIRS site due to an incident which occurred on September 12, 2013. According to the database, a called called the Chino Valley Fire District stated that the main valve failed on a large collection trailer which resulted in the release of about 200 gallons of a mixture of cow blood and water. The release left private property, went out onto the street, then into a storm drain that runs to Chino Creek but the City of Chino Public Works stopped the flow by using sandbags before the release could impact the creek. A third party company was contracted to perform cleanup on the scene and the release was contained. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern.

Facility Name	Avalon Holding Company LLC DBA Fix Auto, Avalon USA Holdings 1 LLCS DBA ProColor Collision
Address	4590 Schaefer Avenue
Distance & Direction	Adjoining to the west
Hydrologic Position	Down-gradient
Databases Listed	RCRA NONGEN/NLR (x2)
Comments	Details provided for the RCRA Non Generator (NONGEN)/No Longer Regulated (NLR) listing identified the site as "not a generator, verified" in 2017 and 2022. The NAICS Description provided for the business is "automotive body, paint, and interior repair and maintenance". No violations were identified in connection with the RCRA listing. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern.

Facility Name	Diamond Wipes International, Inc.
Address	4651 Schaefer Avenue
Distance & Direction	Adjoining to the south across Schaefer Avenue
Hydrologic Position	Down-gradient
Databases Listed	RCRA-SQG, RCRA-LQG, AST, ICIS, FINDS, ECHO, CHMIRS, NPDES, CIWQS, CERS, CERS HAZ WASTE, EMI, WDS, HAZNET, SAN BERN. CO. PERMIT,
Comments	According to the regulatory database, this site is listed as a NPDES and CIWQS site for a basic industrial storm water discharge permit which was issued on August 6, 2010 and expired February 14, 2017. No violations are reported in association with this permit. Based on the lack of reported violations, this listing is not expected to represent a significant environmental concern. This site is also listed as a CHMIRS site due to an incident which occurred on July 21, 2016. According to the database, a caller phoned into the San Bernardino County Fire Department stating that during transit of the substance from receiving to quarantine it was spilled by the forklift driver. This caused the release of approx 200 gallons of citrus terpenes mixed with ethanol. The spill was subsequently halted and contained.

DRAFT

	Diamond Wipes International, Inc was listed as a RCRA SQG for the generation of hazardous wastes in the years 1993 and 2020 and again as an RCRA LQG in the years 2017 and 2020. The following types of hazardous wastes were identified: ignitable waste and corrosive waste. The NAICS Descriptions provided for the business were "pesticide and other chemical manufacturing, " "pharmaceutical preparation manufacturing," "motor vehicle body manufacturing," and "toilet preparation manufacturing". No violations were identified in connection with the RCRA listing. This property is listed as a FINDS and ECHO site in association with the aforementioned RCRA listings. No violations or enforcement actions were identified on the EPA websites Envirofacts and ECHO. Based on the nature of this listings and lack of violations, they are not expected to represent a significant environmental concern. According to the regulatory database, this site is equipped with one (1) 1,455-gallon AST of unknown contents. No releases have been reported in association with this AST. Due to the lack of a documented release, the storage of hazardous materials within registered tanks is not a significant environmental concern. Diamond Wipes International, Inc was listed as a CERS and CERS HAZ WASTE facility for its use as a chemical storage facility and hazardous waste generator, respectively. This facility received various citation notices between 2016 and 2020 for failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities, failure of a large quantity RCRA generator to prepare the Biennial report (Form 8700), and submit to DTSC, failure to submit 2019 - 2020 Annual Report by due date, and various other administrative violations; all violations have since been returned to compliance. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern.

Facility Name	Pressroom Solutions, Inc
Address	4575 Carter Court
Distance & Direction	Adjoining to the west
Hydrologic Position	Down-gradient
Databases Listed	EMI, SAN BERN. CO. PERMIT
Comments	Pressroom Solutions, Inc was identified on the EMI regulatory database for the release of two tons of organic hydrocarbon gasses in 1990. No other releases have been reported to the South Coast Air Quality Management District since then. Additionally, in 2010 the facility was issued two permits from the San Bernardino County for operating as an EPCRA facility handling hazmats with no more than 10 employees. According to the database, both permits expired on January 31, 2010 and have not been renewed since. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern.

Facility Name	Domestic Diesel and Auto, Local Motivated Transportation Inc
Address	4588 Carter Court
Distance & Direction	Adjoining to the west
Hydrologic Position	Down-gradient

DRAFT

Databases Listed	RCRA NONGEN/NLR, CERS, CERS HAZ WASTE, HWTS, HAZNET, EMI, SAN BERN. CO. PERMIT
Comments	Details provided for the RCRA Non Generator (NONGEN)/No Longer Regulated (NLR) listing identified Domestic Diesel and Auto as "not a generator, verified" in 2017. The NAICS Description provided for the business is "general automotive repair". No violations were identified in connection with the RCRA listing. Local Motivated Transportation, Inc was listed in the HWTS database as a permanent state hazardous waste generator site on July 19, 2017. The property was listed in the HAZNET regulatory database in connection several tons of hazardous waste produced between the years 2017 and 2022. Among the waste generated were the following: unspecified organic liquid mixtures and unspecified oil containing waste. The waste disposal methods were noted as including of storage. bulking, and/or transfer off site as well as acid regeneration, organics recovery, etc. Several transporters are listed as being reponsible for the waste produced at the facility. Among these are: Abury Environmental Services, US Ecology Vernon Inc, and Advanced Environmental Inc. The facility remains active as of the issuance of this report. Additionally, Local Motivated Transportation Inc was listed as a CERS and CERS HAZ WASTE facility for its use as a chemical storage facility and hazardous waste generator, respectively. This facility received various citation notices in 2022 for failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities, failure to properly label hazardous waste accumulation containers and portable tanks, failure to adequately establish and implement a business plan when storing/handling a hazardous material at or above reportable quantities, and various other administrative violations; all violations have since been returned to compliance. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern.

5.2 Vapor Migration

AEI reviewed reasonably ascertainable information for the subject and nearby properties, including a regulatory database, files for nearby release sites, and/or historical documentation, to determine if potential vapor-phase migration concerns may be present which could impact the subject property.

AEI did not identify significant on-site concerns and/or regulated listings from nearby sites which suggest that a vapor-phase migration concern currently exists at the subject property.

DRAFT

6.0 INTERVIEWS AND USER PROVIDED INFORMATION

6.1 INTERVIEWS

Pursuant to the current ASTM Standard E1527, the following interviews were performed during this assessment in order to obtain information indicating RECs in connection with the subject property.

6.1.1 OWNER AND KEY SITE MANAGER

Relation to Property	Name	Date Interviewed	Method of Contact	Year First Associated w/ Property	Notes
Owner/Owner Representative	Mrs. Jil Putnam John	N/A	N/A	1961	Not interviewed; refer to Section 1.5
Key Site Manager	Mrs. Cyndy Franz, Title, Company	October 31, 2022	In Person and telephone	2019	Interviewed; see Interview Summary table below

DRAFT

INTERVIEW SUMMARY

Question	Owner (Representative) Response/ Comment	Key Site Manager Response/ Comment
Do you have any knowledge of USTs, clarifiers or oil/water separators, sumps, or other subsurface features?	N/A	No
Do you have any knowledge of previous environmental investigations conducted on site?	N/A	No
Do you have any knowledge of current or past industrial operations and/or other operations which would involve the use of hazardous substances and/or petroleum products?	N/A	No
Are you aware of any known plans for site redevelopment or change in site use?	N/A	Yes
Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, at, or from the subject property?	N/A	No
Are you aware of any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on, at, or from the subject property?	N/A	No
Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?	N/A	No
Are you aware of any incidents of flooding, leaks, or other water intrusion, and/or complaints related to indoor air quality?	N/A	No

According Mrs. Cyndy Franz, key site manager and owner representative, the site has been occupied as a residence and horse breeding facility since at least the 1960s. The property was acquired by George Putnam in the 1960s who used the estate as his vacation home. The property was developed with various horse stables, barns, and a race track for the horses. According to information passed along by Mrs. Jil Putnam, Mr. Putman's daughter and property trustee, the house never contained any USTs or tanks baring hazardous materials. The house was remodeled once, cosmetically, in the 1970s and has sat untouched since. Originally, Mr. Putman acquired land outstretching to Ramona Avenue but chose to sell a large portion of

his land near the end of his life. He left his estate to his girlfriend Sally Conlin upon his death. Unaware of how to properly care for the estate herself, Sally entrusted the ranch hand, Mr. Alonso Sarabia, to take care of all aspects of the property both cosmetically and financially. Approximately five years ago, Mrs. Conlin was moved out of the house due to the build up of clutter she had acquired. She was moved into a small trailer that was kept on the property and all utility services to the main residence were shut off. According to Mrs. Franz, Mr. Sarabia began operating a truck and auto storage site out of the northern portion of the property approximately 14 years ago, if not more. No maintenance operations are known to have been operated on site. Additionally, Mr. Sarabia converted the former barn into a residential quarter. As such, public utilities are still being received at the property, at this second residence. Mrs. Cyndy Franz informed AEI that Mr. Sarabia has been served a formal eviction notice and has been given until November 14, 2022 to vacate the premises. All materials left on site, including any stored autos will thereafter be auctioned off. Although she was unaware of the exact future of the estate, Mrs. Franz informed AEI that the property will likely be developed with a warehouse for distribution services.

6.1.2 Past Owners, Operators, and Occupants

AEI did not attempt to interview past owners, operators, and occupants of the subject property because information from these sources would likely be duplicative of information already obtained from other sources.

6.1.3 Interview with Others

Information obtained during interviews with local government officials is incorporated into the appropriate segments of this report.

6.2 User Provided Information

User provided information is intended to help identify the possibility of RECs in connection with the subject property. According to the current ASTM Standard E1527 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), certain items should be researched by the prospective landowner or grantee, and the results of such inquiries may be provided to the Environmental Professional. The responsibility for qualifying for LLPs by conducting the inquiries ultimately rests with the User, and providing the information to the Environmental Professional would be prudent if such information is available.

The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.

Question	Response/ Comment
1. Environmental liens that are filed or recorded against the property (40 CFR 312.25) Did a search of recorded land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?	Information not provided
2. Activity and use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and vi)).	Information not provided

DRAFT

Question	Response/ Comment
Did a search of recorded land title records (or judicial records where appropriate) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?	
3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28). Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	Information not provided
4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29). Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?	Information not provided
5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30). Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example: (a) Do you know the past uses of the property? (b) Do you know of specific chemicals that are present or once were present at the property? (c) Do you know of spills or other chemical releases that have taken place at the property? (d) Do you know of any environmental cleanups that have taken place at the property?	Information not provided
6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31). Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?	Information not provided

6.3 Previous Reports and Other Provided Documentation

No prior reports or other relevant documentation in association with the subject property was made available to AEI during the course of this assessment.

6.4 Environmental Lien Search

In accordance with our approved scope of services, an environmental lien search was not performed as part of this assessment.

DRAFT

7.0 SITE RECONNAISSANCE

Site Reconnaissance Date	October 31, 2022
AEI Site Assessor(s)	Breezy Carreno
Property Escort(s)/ Relationship(s) to Property	Mrs. Cyndy Franz/Key Site Manager and Owner Representative
Units/Areas Observed	Buildings/Units/Suites: None Exterior areas: AEI observed the subject property ranch yards, gravel paved auto parking lot, residence asphalt paved parking lot, as well as the enclosed below ground pool area.
Area(s) not accessed and reason(s)	Buildings/Units/Suites/Sheds: AEI was not provided access to any of the buildings on site due to their current state of dilapidation. Building not accessed include, residential dwelling, prior barn, chicken coops, and storage shed. Exterior areas: N/A Refer to Section 1.5 for discussion of limiting conditions.
Other Physical Constraints	At the time of the site reconnaissance, the residence and surrounding surfaces were covered fallen leaves, storage overfill, and stray animals and therefore could not be directly observed. Based on the nature of occupancy of the property, as well as information obtained by the owner representative, this limitation is not expected to significantly change the findings of this report. Additionally, due to the large volume of materials within portions of the building and vehicles parked within exterior areas, direct visual observation of many of the floor and wall areas of the building and exterior ground surfaces was not possible. AEI's observations of the subject property were limited to outdoor areas of the property. No buildings were assessed during the reconaissance. Refer to Section 1.5 for discussion of limiting conditions
General Observations	The subject property includes a single family residence which has been vacant for at least the past three years. The residence contains an asphalt paved driveway as well as a large pool area with an emptied in-ground pool. Additionally, the subject property has a horse stable and chicken coop which are currently in use as storage buildings. The property is developed with a barn which has been converted into a residence. The northern portion of the subject property has been paved with gravel and is currently in use as a parking lot/ storage area for motor vehicles, primarily diesel trucks.

Reconnaissance Findings Summary

Feature	Observed on Subject Property (see Section 7.1)	Observed on Adjoining Property (see Section 7.2)
Regulated Hazardous Substances/Wastes and/or Petroleum Products in Connection with Property Use		✔
Aboveground/Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)		✔
Hazardous Substance and Petroleum Product Containers Not in Connection with Property Use		
Unidentified Substance Containers		
Electrical or Mechanical Equipment Likely to Contain Fluids		✔
Interior Stains or Corrosion		

Feature	Observed on Subject Property (see Section 7.1)	Observed on Adjoining Property (see Section 7.2)
Strong, Pungent, or Noxious Odors		
Pools of Liquid		
Drains, Sumps, and Clarifiers		✔
Pits, Ponds, and Lagoons		
Stained Soil or Pavement	✔	✔
Stressed Vegetation		
Solid Waste Disposal or Evidence of Fill Materials	✔	
Waste Water Discharges		
Wells		
Septic Systems or Cesspools		
Other	✔	

7.1 Subject Property Reconnaissance Findings

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

7.1.1 Stained Soil and Pavement

Minor amounts of oily surface staining were observed in the parking area. The staining appears to be from leaking vehicles and is surficial in nature. Based on the small size and the surficial nature of the staining, it is not expected to represent a significant environmental concern.

7.1.2 Solid Waste Disposal or Evidence of Fill Materials

AEI observed various mounds of stockpiled gravel on the northern portion of the property, in what is currently being used as an auto storage yard. The origin of the fill material is unknown. However, no issues relating to contamination of the fill materials were noted at any of the agencies contacted. Additionally, Mrs. Cyndy Franz expressed that she believed the fill material was likely sources locally and used only to fill divots caused by rain and/or stagnant vehicles.

7.2 Adjoining Property Reconnaissance Findings

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

7.2.1 Regulated Hazardous Substances/Wastes and/or Petroleum Products in Connection with Property Use

The adjoining site to the south, across Schaefer Avenue was observed to be occupied by a heavy-industrial business. Based on the nature of use, hazardous substances and/or petroleum products are likely utilized/stored on the site. Based on the lack of a documented release, this adjoining site is not expected to represent a significant environmental concern.

DRAFT

7.2.2 Aboveground/Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)

The adjoining site to the south across Schaefer Avenue was observed to be occupied by a heavy-industrial business. Based on the nature of use, as well as identification in the AST regulatory database, ASTs as well as other hazardous substances and/or petroleum are stores and/or utilized on the site. Based on the lack of a documented release, this adjoining site is not expected to represent a significant environmental concern.

7.2.3 Electrical or Mechanical Equipment Likely to Contain Fluids

Toxic PCBs were commonly used historically in electrical equipment such as transformers, fluorescent lamp ballasts, and capacitors. According to United States EPA regulation 40 CFR, Part 761, there are three categories for classifying such equipment: <50 ppm of PCBs is considered "Non-PCB"; between 50 and 500 ppm is considered "PCB-Contaminated"; and >500 ppm is considered "PCB-Containing." Pursuant to 15 U.S.C. 2605(e)(2)(A), the manufacture, process, or distribution in commerce or use of any polychlorinated biphenyl in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

Transformers

The management of potential PCB-containing transformers is the responsibility of the local utility or the transformer owner. Actual material samples need to be collected to determine if transformers are PCB-containing.

Three pad-mounted transformers were observed on the adjoining sites during the site reconnaissance. No spills, staining, or leaks were observed on or around the transformers. Based on the good condition of the equipment, the transformers are not expected to represent a significant environmental concern.

7.2.4 Drains, Sumps, and Clarifiers

Several storm drains were observed in the parking areas of the adjoining properties and adjoining roadways. AEI did not observe evidence of hazardous substances or petroleum products in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not expected to represent a significant environmental concern.

7.2.5 Stained Soil and Pavement

Minor amounts of oily surface staining were observed in the parking area. The staining appears to be from leaking vehicles and is surficial in nature. Based on the small size and the surficial nature of the staining, it is not expected to represent a significant environmental concern.

DRAFT

8.0 NON-ASTM SERVICES

8.1 Asbestos-Containing Building Materials

Due to the age of the subject property buildings, there is a potential that ACMs are present. AEI was not provided access to the interiors of the buildings (buildings were locked and boarded up), therefore the condition of suspect ACMs could not be evaluated. Based on the potential presence of ACMs, AEI recommends the implementation of an O&M Plan which stipulates that the repair and maintenance of damaged materials should be performed to protect the health and safety of the building occupants. In the event that building renovation or demolition activities are planned, a thorough asbestos survey to identify asbestos-containing building materials is required in accordance with the EPA NESHAP 40 CFR Part 61 prior to demolition or renovation activities that may disturb suspect ACMs.

8.2 Lead-Based Paint

Due to the age of the subject property buildings, there is a potential that LBP is present. AEI was not provided access to the interiors of the buildings (buildings were locked and boarded up), therefore the condition of interior painted surfaces could not be evaluated. During the site reconnaissance, AEI observed damaged and peeling paint on the exterior of the subject property residence as well as on some of the barn structures. Based on the potential presence of LBP, AEI recommends the property owner implement an O&M Plan which stipulates that the assessment, repair and maintenance of damaged painted surfaces be performed to protect the health and safety of the building occupants. Local regulations may apply to LBP in association with building demolition/renovations and worker/occupant protection. Actual material samples would need to be collected or an x-ray fluorescence (XRF) survey performed in order to determine if LBP is present. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.

8.3 Naturally-Occurring Radon

Radon is a naturally-occurring, odorless, and invisible gas. Natural radon levels vary and are closely related to geologic formations. Radon may enter buildings through basement sumps or other openings.

Radon sampling was not requested as part of this assessment. According to the California Department of Health Services Radon Database, 18 tests were conducted for radon levels in the subject property zip code (91710) in 2016. All of these tests indicated that radon levels were below the action level of 4.0 pCi/L set forth by the United States EPA. Therefore, radon is not expected to represent a significant environmental concern.

8.4 Suspect Mold or Microbial Growth Conditions

AEI did not observe interior areas of the subject property buildings, as the buildings were locked and boarded up. According to Cyndy Franz, owner representative, the subject property residence has been vacant and unoccupied for at least the last three years. Mrs. Franz informed AEI that due to the state of dilapidation of the building as well as the vast material build up located inside the building, she did not feel comfortable escorting the assessor through the building. Additionally, Mrs. Franz stated that on the few occasions in which personnel have been allowed into the building, they have been in full protection gear in order to protect

from any and decomposing material and animal feces present. Based on absence of mechanical ventilation for an extended period of time, the interior finishes may have been impacted by condensation and ensuing mold.

8.5 Emerging Contaminants

As defined in Section 3.2.36 the ASTM Standard, hazardous substance means "those substances defined as a hazardous substance pursuant to CERCLA 42 USC § 9601(14), as interpreted by EPA regulations and the courts." There are some substances that non-environmental professionals and others may assume to be hazardous substances that are not defined (or not yet defined) as hazardous substances under CERCLA, through interpretation by EPA regulations and the courts. These substances may include: (i) some substances that occur naturally or through biological digestion (for example, methane), and (ii) substances about which human understanding is evolving (for example, per- and polyfluoroalkyl substances, also known as "PFAS"). These and any other "emerging contaminants," where they are not identified as a hazardous substance by CERCLA, as interpreted by EPA regulations and the courts, are not included in the scope of this standard. Some of these substances may be considered a "hazardous substance" (or equivalent) under applicable state laws. In those instances, where a Phase I Environmental Site Assessment is performed to satisfy both federal and state requirements, or as directed by the user of the report, it is permissible to include analysis and/or discussion of these substances, in the same manner as any other Non-Scope Consideration. If and when such emerging contaminants are defined to be a hazardous substance under CERCLA, as interpreted by EPA regulations and the courts, such substances shall be evaluated within the scope of this standard.

Based on AEI's historical research of the subject property, the subject property does not appear to be a potential source of PFAS contamination.

The south adjoining site across Schaefer Avenue, Diamond Wipes International, Inc., is a heavy industrial manufacturer of wet wipes. This facility has various listings detailing the treatment and disposal of liquid and/or semisolid waste as well as seasonal discharge of contaminated water. Additionally, this facility is listed in both the NPDES and CIWQS databases in relation to their industrial storm water discharge. According to the Associated RCRA listing, NAICS code 325XXX is used at the property, which is listed as a potential sources of PFAS impacts. See Section 5.1 for additional details. Further investigation is pending. PFAS are not currently classified by CERCLA as a hazardous substance and thus the potential presence of PFAS does not represent a REC at this time. However, the report User should be aware that regulatory criteria and classifications are subject to change. As such, it would be prudent for the property owner to review future assessment reports associated with this facility to ensure that the subject property is not impacted. However, based on the lack of use of groundwater at the subject property at this time, PFAS impacts, even if they did exist on the subject property, are not expected to represent a significant health risk to the occupants or owners of the property at this time.

DRAFT

9.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR Part 312.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/20/2022 has revealed that there are 5

DRAFT

RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/20/2022 has revealed that there are 10 RCRA-SQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EPA ID:: CAD008507055

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 06/20/2022 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 07/25/2022 has revealed that there are 3 CA ENVIROSTOR sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

CA CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CA CPS-SLIC list, as provided by EDR, has revealed that there are 2 CA CPS-SLIC sites within approximately 0.5 miles of the target property.

Local Lists of Registered Storage Tanks

CA SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the CA SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 5 CA SWEEPS UST sites within approximately 0.25 miles of the target property.

DRAFT

LOCAL MOTIVATED TRANSPORTATION INC (Continued) **S105725235**

	Chapter 16, Section(s) 66266.81(b)
Violation Description:	Failure to properly manage, store, and label a damaged lead acid battery in a nonreactive, structurally secure, closed container, and/or failure to label damaged lead acid battery with the date that the first battery in the container was placed there with ink, paint or other weather-resistant material so as to minimize the release of acid and lead and to protect the environment.
Violation Notes:	OBSERVATION: At the time of the inspection, observed the facility to be storing their defective lead acid batteries on the floor in the shop. CORRECTIVE ACTION: Ensure all damaged lead acid batteries are store in a non-reactive, structurally secure, closed container labeled with the accumulation start date, to minimize the release of acid and lead into the environment.
Violation Division:	San Bernardino County Fire Department
Violation Program:	HW
Violation Source:	CERS,
Site ID:	613594
Site Name:	Domestic Diesel and Auto Service
Violation Date:	06-08-2022
Citation:	HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)
Violation Description:	Failure to establish and/or electronically submit an adequate training program in safety procedures in the event of a release or threatened release of a hazardous material. *Verify agricultural handler exemption HSC 25507.1
Violation Notes:	OBSERVATION: At the time of the inspection, observed the facility to not have an adequate hazardous materials training program. CORRECTIVE ACTION: Establish and implement an adequate hazardous materials training program in the safety procedures of how to handle a release or a threatened release of a hazardous material. Provide training record to the inspector within 30 days of the inspection.

Description:	Caller states the main valve failed on a large collection trailer which resulted in the release of a mixture of cow blood and water. The release left private property, went out onto the street, then into a storm drain that runs to Chino Creek but the City of Chino Public Works stopped the flow by using sandbags before the release could impact the creek. An outside contractor is on scene performing clean up.

Violation Date: 05-02-2022
Citation: HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: OBSERVATION: The CERS hazardous materials inventory submitted on 4/5/2019 was rejected because it was not representative of the chemical inventory observed during the 2019 inspection. The hazardous materials inventory observed today was also not consistent with the inventory submitted in CERS. The following items needs to be added to the CERS inventory: 5500 gallon tank ChemFloc, 55 gallon drums of Organic Peroxide, compressed cylinders of argon, argon/C02 and oxygen, 4 x 55 gallon drums of waste oil, 55 gallon drum of waste aerosol cans, Purac CL, Denaturant, SubDue Extra, and Meta Clean. The maximum daily quantities disclosed in CERS were also found to be inaccurate. Update the maximum daily amounts for all listed chemicals to represent the most on site at any one time. As an example Flo Klow was listed at 110 gallons when 400 gallons were observed on site. CORRECTIVE ACTION: Submit an accurate and complete hazardous materials inventory in CERS.

Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-19-2015
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Robert Bolin could not locate the SWPPP or inspection records for the site. He indicated that Frog Environmental is the consulting firm assisting him in recertfying and collecting their stormwater samples. There are two discharge points for the site. Low flow goes to the on-site treatment system and then to the sewer. There are High Flow bypass via rain sensors. When triggered, they open and allow water from the site to flow off-site to the storm drain system. This site is a 24 hour per day operation and appears to be very clean. At the time of inspections they were not processing live cattle. Potential pollution sources at the site appear to be: Livestock holding area, cardboards bailing area, maintenance area, and loading docks where bones are transferred via a conveyor to open trailers for off-site sale.

Violation Date:	03-07-2019
Citation:	HSC 6.5 25250.22 - California Health and Safety Code, Chapter 6.5, Section(s) 25250.22
Violation Description:	Failure to properly manage used oil and/or fuel filters in accordance with the requirements.
Violation Notes:	Returned to compliance on 04/08/2019. OBSERVATION: Facility failed to properly manage waste metal filters. CORRECTIVE ACTION: Submit photos to the CUPA demonstrating that the used oil and fuel filters are being properly managed or submit a bill of lading to this department demonstrating proper disposal.
Violation Division:	San Bernardino County Fire Department
Violation Program:	HW
Violation Source:	CERS,
Site ID:	384764
Site Name:	AMERICAN BEEF PACKERS INC.
Violation Date:	03-07-2019
Citation:	22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description:	Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes:	Returned to compliance on 04/08/2019. OBSERVATION: Sludge that is collected from the wastewater treatment process is being collected and transported off site. A proper waste determination has not been made for the sludge. CORRECTIVE ACTION: Submit documentation to the CUPA demonstrating that the sludge has been properly characterized to determine if it is a hazardous waste. If determined to be hazardous submit a manifest/receipt documenting proper disposal and a statement demonstrating how you will manage it in the future.
Violation Division:	San Bernardino County Fire Department
Violation Program:	HW

Violation Description: Haz Waste Generator Program - Operations/Maintenance - General
Violation Notes: Returned to compliance on 08/19/2016. Failure to label hazardous waste containers (CCR 66262.34(f)(3)) Hazardous waste label not on container.
Violation Division: San Bernardino County Fire Department
Violation Program: HW
Violation Source: CERS,

Site ID: 384764
Site Name: AMERICAN BEEF PACKERS INC.
Violation Date: 05-02-2022
Citation: HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: OBSERVATION: The CERS hazardous materials inventory submitted on 4/5/2019 was rejected because it was not representative of the chemical inventory observed during the 2019 inspection. The hazardous materials inventory observed today was also not consistent with the inventory submitted in CERS. The following items needs to be added to the CERS inventory: 5500 gallon tank ChemFloc, 55 gallon drums of Organic Peroxide, compressed cylinders of argon, argon/C02 and oxygen, 4 x 55 gallon drums of waste oil, 55 gallon drum of waste aerosol cans, Purac CL, Denaturant, SubDue Extra, and Meta Clean. The maximum daily quantities disclosed in CERS were also found to be inaccurate. Update the maximum daily amounts for all listed chemicals to represent the most on site at any one time. As an example Flo Klow was listed at 110 gallons when 400 gallons were observed on site. CORRECTIVE ACTION: Submit an accurate and complete hazardous materials inventory in CERS.
Violation Division: San Bernardino County Fire Department
Violation Program: HMRRP

Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-19-2015
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Robert Bolin could not locate the SWPPP or inspection records for the site. He indicated that Frog Environmental is the consulting firm assisting him in recertfying and collecting their stormwater samples. There are two discharge points for the site. Low flow goes to the on-site treatment system and then to the sewer. There are High Flow bypass via rain sensors. When triggered, they open and allow water from the site to flow off-site to the storm drain system. This site is a 24 hour per day operation and appears to be very clean. At the time of inspections they were not processing live cattle. Potential pollution sources at the site appear to be: Livestock holding area, cardboards bailing area, maintenance area, and loading docks where bones are transferred via a conveyor to open trailers for off-site sale.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource

DRAFT

DIAMOND WIPES INTERNATIONAL, INC. (Continued) **1000857248**

Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
OSHA ESTABLISHMENT
STATE MASTER
HAZARDOUS WASTE BIENNIAL REPORTER
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.
SSTS (Section Seven Tracking System) evolved from the FIFRA and TSCA Enforcement System (FATES). SSTS tracks the registration of all pesticide-producing establishments and tracks annually the types and amounts of pesticides, active ingredients, and related devices that are produced, sold, or distributed each year.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

DIAMOND WIPES INTERNATIONAL, INC. (Continued) **1000857248**

Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-08-2016
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: The facility was visited in a dry day. Mr. Benjamin Do, Regulatory Affairs Coordinator is responsible for compliance of storm water regulations. A site-specific SWPPP, monitoring Plan and log of inspections were reviewed at the site. All manufacturing is conducted indoor. Yard was clean during the inspection. Mr. do told that a new building had been erected and will be used for warehousing. Board staff suggested revising SWPPP and modifying monitoring plan to depict discharge locations and sampling point. There was non-storm water discharge from the facility.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

BRIGHT SHARK POWDER COATING (Continued) **S113099661**

Section(s) Multiple
Violation Description: Haz Waste Generator Program - Administration/Documentation - General
Violation Notes: Returned to compliance on 11/17/2015. Failure to retain Hazardous Waste Manifests for at least 3 years (CCR 66262.40(a)) Facility did not have hazardous waste disposal records available at time of inspection.
Violation Division: San Bernardino County Fire Department
Violation Program: HW
Violation Source: CERS,

Site ID: 100054
Site Name: BRIGHT SHARK POWDER COATING
Violation Date: 07-27-2015
Citation: HSC 6.5 Multiple Sections - California Health and Safety Code, Chapter 6.5, Section(s) Multiple Sections
Violation Description: Haz Waste Generator Program - Operations/Maintenance - General
Violation Notes: Returned to compliance on 11/17/2015. Failure to complete hazardous waste labels (CCR 66262.34(f)(3)) Hazardous waste labels missing information.
Violation Division: San Bernardino County Fire Department
Violation Program: HW
Violation Source: CERS,

Site ID: 100054
Site Name: BRIGHT SHARK POWDER COATING
Violation Date: 11-07-2018
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 11/07/2018. Observed (1) 55 gallon drum containing rags contaminated with powder coating materials to be missing hazardous waste labeling. Operator stated the contents of this drum is being managed by the facility as hazardous waste. Observed (1) 55 gallon drum containing waste powder coating material and solvent mixture to have illegible hazardous waste labeling at the time of the inspection. Violation corrected on site at the time of the inspection.
Violation Division: San Bernardino County Fire Department
Violation Program: HW

Site ID:	100054
Site Name:	BRIGHT SHARK POWDER COATING
Violation Date:	07-27-2015
Citation:	HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2
Violation Description:	Failure to annually review and electronically certify that the business plan is complete, accurate, and up-to-date.
Violation Notes:	Returned to compliance on 11/17/2015. Facility did not update their Business Plan on CERS.
Violation Division:	San Bernardino County Fire Department
Violation Program:	HMRRP
Violation Source:	CERS,
Site ID:	100054
Site Name:	BRIGHT SHARK POWDER COATING
Violation Date:	11-07-2018
Citation:	HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	Returned to compliance on 11/27/2018. Observed (1) 55 gallon drum containing rags contaminated with powder coating materials. Operator stated the contents of this drum is being managed by the facility as hazardous waste. No hazardous waste disposal records were available for review at the time of the inspection for this waste stream. The drum was not labeled at the time of the inspection. CORRECTIVE ACTION: Sign the Certificate of Compliance in attestation that all hazardous waste that has exceeded the facility's accumulation time frame has been transported off site by a licensed hazardous waste transporter. The accumulation time frame for this facility was 180 days at the time of the inspection.
Violation Division:	San Bernardino County Fire Department
Violation Program:	HW
Violation Source:	CERS,
Site ID:	100054
Site Name:	BRIGHT SHARK POWDER COATING
Violation Date:	11-07-2018
Citation:	40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description:	Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes:	Returned to compliance on 11/07/2018. Observed (1) 55 gallon drum containing rags contaminated with powder coating materials to be open at the time of the inspection. Violation corrected on site at the time of the inspection.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

POTW:	Not reported
Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS. detail in the EDR Site Report.

Violations:

Site ID:	613677
Site Name:	Spectrum Concret Products LLC
Violation Date:	06-02-2022
Citation:	HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2)

DRAFT

SPECTRUM CONCRET PRODUCTS LLC (Continued) **S124877667**

	The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	OBSERVATION: 1. At the time of the inspection, observed the facility to be holding approximately (130) 5-gallon buckets, and approximately (20) 55-gallon drums of expired, unsaleable, retail waste over the 180 day time period. 2. At the time of the inspection, observed the facility to be holding hazardous waste in the from of (19) 55-gallon drums of bag house dust, over the 180 day time period. CORRECTIVE ACTION: All hazardous waste on site must be sent for hazardous waste disposal, treatment, or storage within 180 days of generation. Provide waste removal manifests, and photos of the cleared out waste collection areas to the inspector within 30 days of the inspection.
Violation Division:	San Bernardino County Fire Department

FINDS:
Registry ID: 110010061949

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violations:

Site ID:	361508
Site Name:	Rahn Industries, Inc.
Violation Date:	01-18-2022
Citation:	22 CCR 11 66261.7 - California Code of Regulations, Title 22, Chapter 11, Section(s) 66261.7
Violation Description:	Failure to manage empty containers greater than 5 gallons in capacity that previously held a hazardous material/waste in accordance with 22 CCR 11 66261.7 including but not limited to the following: (e)(2)By reclaiming its scrap value onsite or shipping the container or inner liner to a person who reclaims its scrap value; or (3) By reconditioning or remanufacturing the container or inner liner onsite for subsequent reuse, or shipping the container or inner liner to a person who reconditions or remanufactures the container or inner liner; or (4) By shipping the container or inner liner to a supplier or to another intermediate collection location for accumulation prior to managing the container or inner liner pursuant to subsections (e)(2) or (e)(3) of 22 CCR 11 66261.7; or (i) By shipping the container or inner liner back to the supplier for the purpose of being refilled. (f) A container or an inner liner removed from a container larger than five gallons in capacity which is managed pursuant to subsection (e) of 22 CCR 11 66261.7 shall be marked with the date it has been emptied and shall be managed within one year of being emptied.
Violation Notes:	Returned to compliance on 02/09/2022. OBSERVATION: Approximately twenty empty 55 gallon drums the previously held hazardous materials were found stored inside a storage container on the east side of the building. These drums were not dated as to when they were emptied. CORRECTIVE ACTION: Have these drums removed by a recycler or returned back to the vendor. Submit photos/documentation to this department demonstrating that the empty drums have been marked with the date they were emptied and are being properly managed pursuant to 22 CCR 11 66261.7.
Violation Division:	San Bernardino County Fire Department

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

Violation Date: 06-28-2019
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes: Returned to compliance on 07/03/2019. OBSERVATION: (4) 30 gallon drums of corrosive acidic liquid waste and (2) 30 gallon drums of waste cyanide plating solution were observed being stored on site longer than 180 days. CORRECTIVE ACTION: Dispose of hazardous waste that has been stored over the applicable time limit and provide documentation that the violation has been corrected.

File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Soil
Potential Contaminants of Concern:	* Solvents, Total Petroleum Hydrocarbons (TPH), Waste Oil / Motor / Hydraulic / Lubricating
Site History:	On 1/12/1990, one 10,000-gallon waste oil UST was removed from the site under the oversight of San Bernardino County Fire. On March 1, 1990, SBCF granted closure sitting that the residual affected sol was below levels of concern. While total petroleum hydrocarbons were below levels of concern, residual soil concentrations include PCE, TCE and TCA at 7.4, 1.46, and 1.5 ppm, respectively. Additional assessment is necessary to define the vertical extent of the

USACE Division:	spd
USACE District:	spl
Status:	Properties with all projects at site closeout
Current Owner:	LOCAL: CITY 20-acres occupied by the Chino Fairgrounds, John Godinho current president of the fairgroundsPRIV: PRIVATE 10-acres, Dan McCalla and his brother own the 10 acre lot located immediately north of the fairgrounds.
EMS Map Link:	https://fudsportal.usace.army.mil/ems/inventory/map?id=63092
Eligibility:	Eligible
Has Projects:	Yes
NPL Status:	Not on the NPL
Property History:	The camp site was originally constructed to house laborers associated with various Work Programs Administration (WPA) projects in the Chino area. At the beginning of WWII, a quartermaster unit of the New York National Guard moved into the camp. Eventually, the National Guard

DRAFT

CHINO PRISONER OF WAR CAMP - ARMY (Continued) **1007372715**

vacated the property and the camp returned to housing farm laborers. In October 1944, the Army established a German prisoner of war camp at the site. The prisoners were used as farm labor in the region. In April 1945, the camp became a sub-depot to the Pomona Ordnance Depot. A newspaper article from May 194S relates a fire and explosion in a quonset hut storing gas bombs, hand grenades, and small arms ammunition. No other information regarding storage and use of ordnance at this site was found. The date the Army terminated use of the camp is unknown. The camp was acquired by the Chino Junior Fair Association in 1956 from the State of California. Currently, an approximate 10 acre parcel is privately owned and used for storage of heavy equipment. The remainder of the property is occupied by the Chino Fairgrounds.

Project Required: Yes
Feature Description: Not reported
Latitude: 33.999401
Longitude: -117.688004

FUDS Detail as of Jan 2015:
Fiscal Year: 2013
Federal Facility ID: CA9799FA384
RAB: Not reported
NPL Status: Not reported
Description: There are two portions to this site: A square shaped lot approximately 10 acres) and a rectangle shaped lot, which is now the Chino Fairgrounds, consisting of 20 acres. The 10 acre lot is located immediately north of the Chino Fairgrounds and is under lease by Tri State Equipment Rentals and Starlite Safety Supply. The 10-acre lot is currently being used for heavy equipment storage associated with the activities of Tri-State Equipment Rentals and Sales. The lot is completely disturbed with various portions undergoing shallow excavation. No part of this lot is covered but consists of bare soil and sporadic vegetation. The lot is completely fenced. Remnants of the former POW camp were not observed. No part of the site appears to be contaminated. The Chino Fairgrounds completely occupies the rectangular 20-acre (approximately) lot. The western half of this lot is undeveloped and bare soil. Part of this area is covered with trimmed vegetated and part is covered with rock and gravel for parking. No evidence of contamination or remains of the former POW camp were observed in this portion of the 20-acre lot. This half of the lot appears to be used for parking during fairground events. The eastern half of the fairgrounds is largely developed. one large building (Brinderson Hall) occupies the middle of the fairgrounds and is the multi-purpose building. It also contains the office for the facility. North of this large building are a couple of small storage shelters, restrooms, and a mobile home which is the residence for the onsite caretaker. A grass area is present south of the Hall and extends almost to the southern boundary of the fairgrounds. Immediately east of Brinderson Hall is the outdoor pavillion which is designed for rodeos. It consists of bleachers, a large bare dirt riding area, and a staging area for the animals. A stable area is located at the northeast corner of
History: The camp site was originally constructed to house laborers associated with various Work Programs Administration (WPA) projects in the Chino area. At the beginning of WWII, a quartermaster unit of the New York National Guard moved into the camp. Eventually, the National Guard vacated the property and the camp returned to housing farm laborers.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

DRAFT

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DRAFT

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006
Date Data Arrived at EDR: 03/01/2007
Date Made Active in Reports: 04/10/2007

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)
The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

DRAFT

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

DRAFT

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Version Date:	2012

DRAFT

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

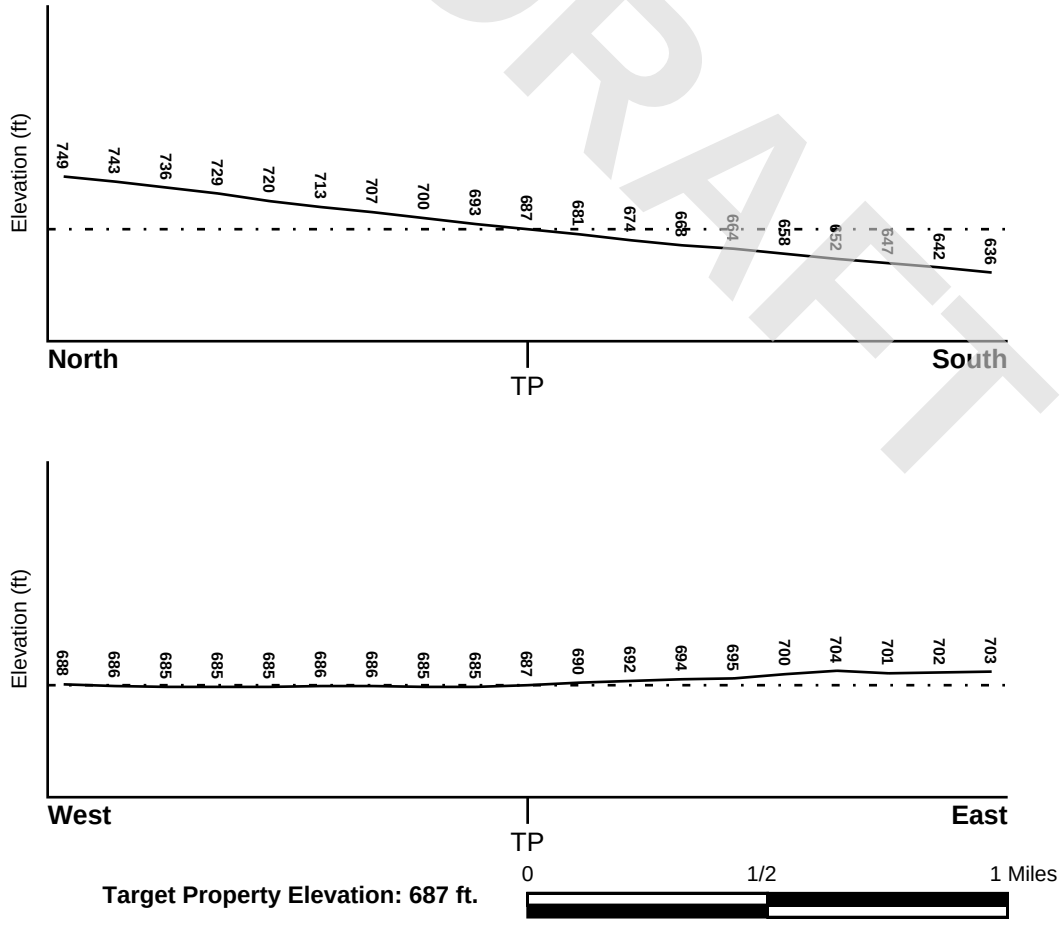

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

DRAFT

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06037C1750F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06071C8620H	FEMA FIRM Flood data
06071C8615H	FEMA FIRM Flood data
06071C9330H	FEMA FIRM Flood data
06071C9335H	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
ONTARIO	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
C8	1/4 - 1/2 Mile SE	Not Reported
2G	1/4 - 1/2 Mile SE	Not Reported

For additional site information, refer to Physical Setting Source Map Findings.

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

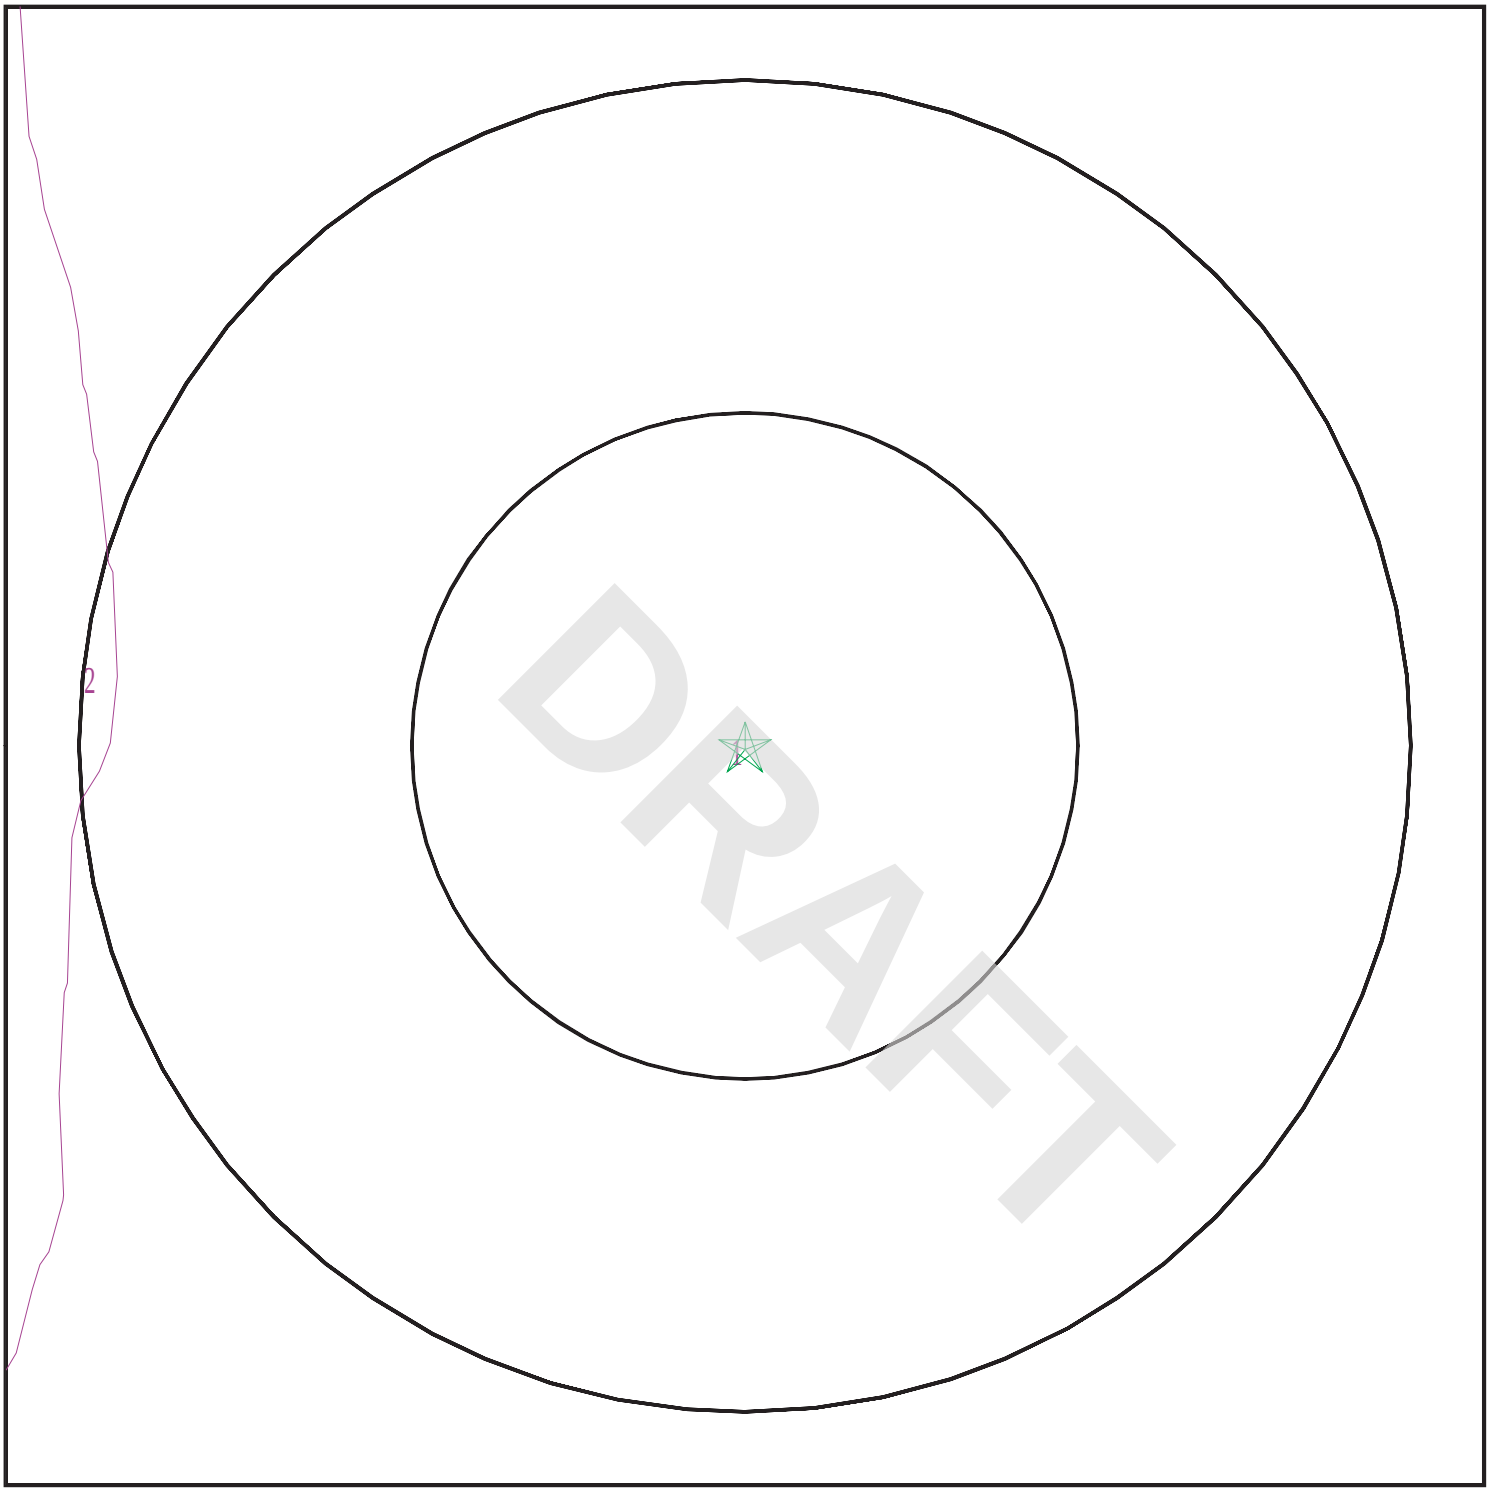

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: CHINO

Soil Surface Texture: silt loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	16 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 7.9
2	16 inches	59 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 7.9

Soil Map ID: 2

Soil Component Name: GRANGEVILLE

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Somewhat poorly drained

DRAFT

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

DRAFT

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by AEI Consultants were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Request

13610 Yorba Avenue,

Chino, CA 91710

United States

Building Department:

- Permit summary (date, type of permit, applicant/tenant) or available permits from construction to present. Upon review of a permit summary we may request review of individual permits.
- Construction date (current building, previous buildings if applicable)
- List of tenants which have occupied the subject property
- Permits of environmental concern (petroleum storage tanks, septic systems, oil/water separators)
- Oldest and most recent site layout plan from the above mentioned property if available
- Erosion control plans on record for the subject property

DRAFT

- Record violations or complaints registered against the subject property

Planning Department:

- Record of any Activity Use Limitations (AULs) and/or land use covenants (LUC) in connection with the property. AULs are typically in place at sites which would prevent future uses of a property.
- Subject property zoning and any current zoning violations.

Fire Department:

- Records regarding hazardous materials usage/storage/incidents or known environmental concerns/contamination which may have affected the property.
- Records regarding aboveground or underground storage tank (UST) systems, which are currently or historically located at the property.
- Records of fire inspections at the subject property.

External Message Requester + Staff

Hello,

Thank you for submitting your public records request to the City of Chino. Our city staff will begin working on your request and will provide our 10-day determination. Please note the 10-day window to make a determination will begin immediately if received during Monday through Friday from 7:30 a.m. to 5:30 p.m. All requests received on National Holidays or weekends will be counted as received on the immediate weekday with regular operating hours.

REQUEST FOR AN ENVIRONMENTAL AUDIT PHASE 1 CERTIFIED HAZARDOUS MATERIALS RECORDS SEARCH FINDING REPORT

The main focus of a REQUEST FOR AN ENVIRONMENTAL AUDIT PHASE 1 CERTIFIED HAZARDOUS MATERIALS RECORDS SEARCH FINDING REPORT is to determine whether there exists in San Bernardino County Fire Protection District (SBCFPD) any record relating to contamination or reports of spills at a particular site. An Environmental Phase 1 Certified Hazardous Materials Records Search Finding Report should reveal whether there are any facilities at the site that are subject to current or past regulatory activity by SBCFPD, such as underground storage tanks, hazardous material handlers, hazardous waste generators, and CalARP facilities, as well as any reports of spills, incidents, complaints, or cleanup activity, which can be a useful tool in providing a history of compliance or non-compliance.

Once SBCFPD has completed its records search, an Environmental Phase 1 Certified Hazardous Materials Records Search Finding Report will be prepared and issued. Such report will detail all SBCFPD records associated with a particular site by type, date, location, and status (where applicable). All files identified in an Environmental Phase 1 Certified Hazardous Materials Records Search Finding Report can be made available for copies and/or review upon request.

If the completed records search reveals no SBCFPD record of hazardous material activity at the site, an Environmental Phase 1 Certified Hazardous Materials Records Search Finding Report will be issued, noting that "no records" were identified.

Please provide a specific site address or location description. If a situs address does not exist or cannot be found, list another type of location identifier such as Assessor Parcel Number (preferable), cross streets or intersections (e.g., NWC 5th Ave. & Main St.), and/or legal description. If possible, please attach a map to this request form.

SITE INFORMATION		
Property Owner or Business Name	Location (Site Address and/or Assessor Parcel No.) 13610 Yorba Avenue	City/Community Chino

Please provide your name, the company you represent, and contact information below.

** IMPORTANT –THIS PAGE MUST BE SIGNED PRIOR TO SUBMITTAL **

DISCLAIMER: While all attempts are made to provide accurate, current, and reliable information, San Bernardino County Fire Protection District *(further referred to as SBDFPD)* recognizes the possibility of human error. Therefore, SBCFPD, its officers, employees, agents and volunteers, make no representations as to the accuracy, completeness or suitability of an Environmental Audit Phase 1 Certified Hazardous Materials Records Search Finding Report and provides an Environmental Audit Phase 1 Certified Hazardous Materials Records Search Finding Report "as is," with no warranties, express or implied, including the implied warranty of fitness for a particular purpose. In no event shall SBCFPD be liable for any damages of any nature whatsoever, arising out of the issuance of a Certified Hazardous Materials Records Search Finding Report. SBCFPD therefore assumes no liability for damages incurred directly or indirectly as a result of any errors, omissions or discrepancies in a Certified Hazardous Materials Records Search Finding Report.

RELEASE AND INDEMNIFICATION: In consideration for the issuance of an Environmental Audit Phase 1 Certified Hazardous Materials Records Search Finding Report, I hereby release and forever discharge SBCFPD, its officers, employees, agents and volunteers from any and all claims, actions, losses, damages and/or liability in connection with SBCFPD's issuance of an Environmental Audit Phase 1 Certified Hazardous Materials Records Search Finding Report, including, but not limited to, claims that may arise due to the active or passive negligence of SBCFPD, its officers, employees, agents and volunteers.

I am familiar with the provisions of California Civil Code Section 1542, which provides as follows:

"A general release does not extend to claims which the creditor does not know or suspect to exist in his or her favor at the time of executing the release, which if known by him or her must have materially affected his or her settlement with the debtor."

I hereby expressly waive any and all rights that I may have there under. I understand and acknowledge the significance and consequence of this specific waiver of California Civil Code Section 1542 and assume full responsibility for any injuries, damages, losses or liabilities that I may hereafter discover as possibly resulting from SBCFPD's issuance of an Environmental Audit Phase 1 Certified Hazardous Materials Records Search Finding Report.

In further consideration for SBCFPD's issuance of an Environmental Audit Phase 1 Certified Hazardous Materials Records Search Finding Report, I hereby agree, for myself, my heirs, administrators, executors and assigns, that I shall indemnify, defend (with counsel approved by County) and hold harmless SBCFPD, its officers, employees, agents and volunteers from any and all claims, demands, actions or suits arising out of or in connection with SBCFPD's issuance of an Environmental Audit Phase 1 Certified Hazardous Materials Records Search Finding Report brought by any third party.

*** * ***

I have read the above terms and conditions, including the paragraphs entitled "DISCLAIMER" and "RELEASE AND INDEMNIFICATION", and by my signature below, I affirm that I understand these terms and conditions and accept them as part of my REQUEST FOR AN ENVIRONMENTAL AUDIT PHASE 1 CERTIFIED HAZARDOUS MATERIALS RECORDS SEARCH FINDING REPORT.

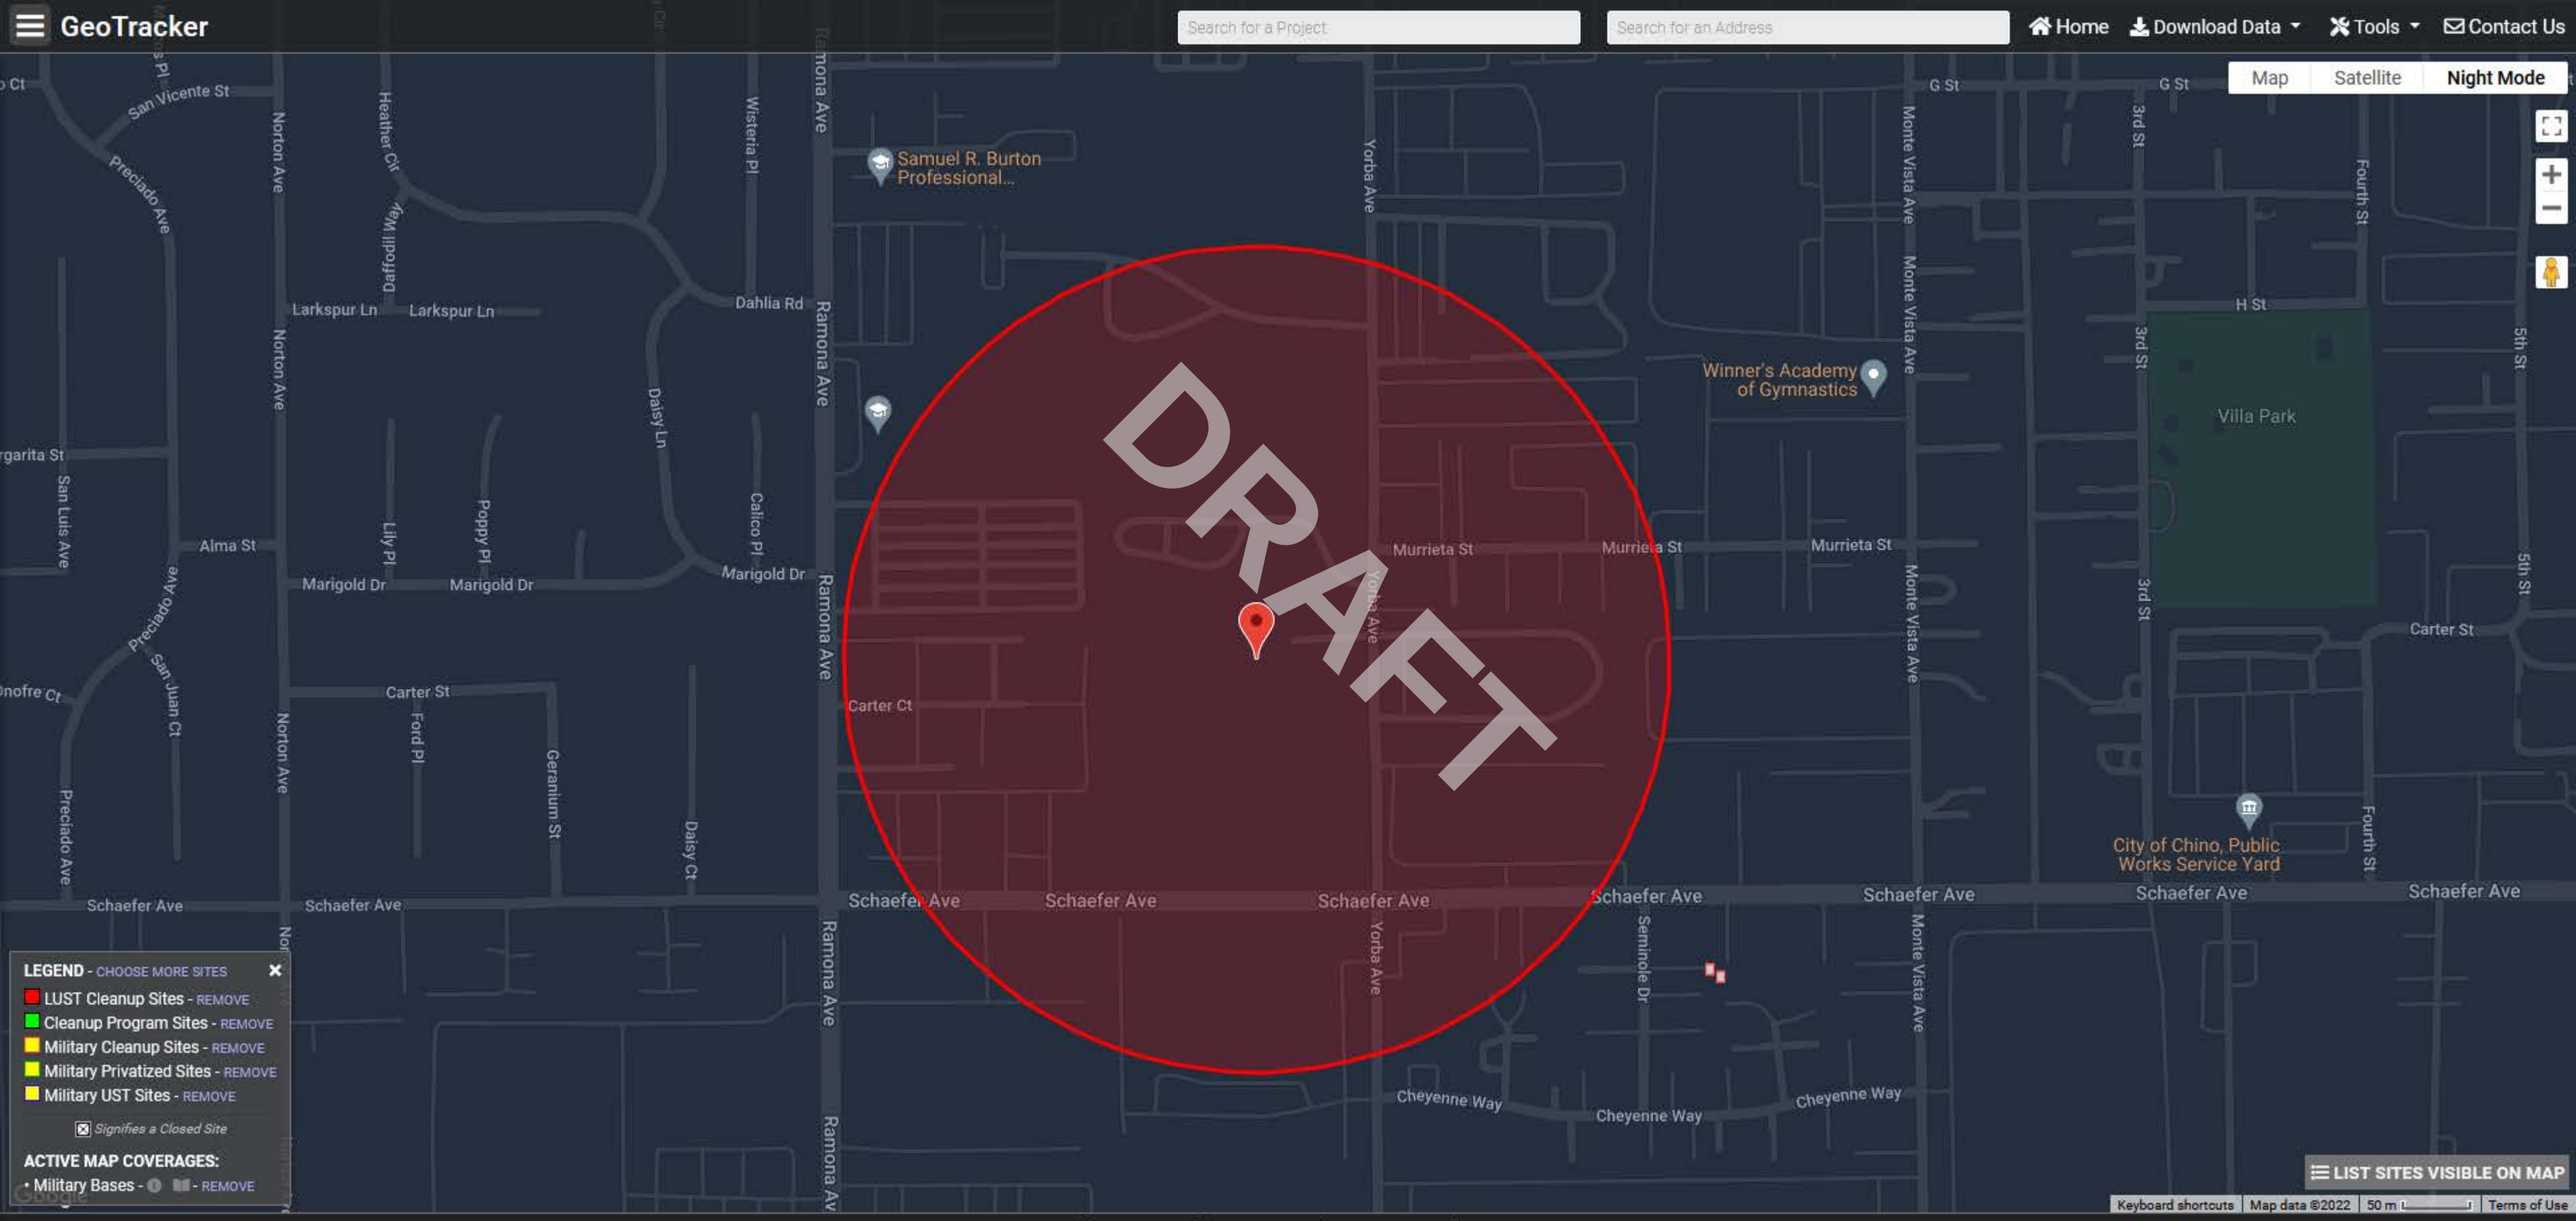

I hereby request an Environmental Audit Phase 1 Certified Hazardous Materials Records Search Finding Report for the location described on Page 1 of this application.

- ❑ **I am including payment of the initial fee of $136.00, for the first hour of research, by check or money order, payable to San Bernardino County Fire Protection District, or by credit card payment taken over the phone. I understand that research exceeding one hour will be billed at the rate of $136.00 for each additional hour spent by SBCFPD in completing this request.**
- ❑ **I have faxed or emailed this request and will forward payment along with the original request form within 48 hours.**

EDMUND G. BROWN JR.
GOVERNOR

MATTHEW RODRIQUEZ
SECRETARY FOR
ENVIRONMENTAL PROTECTION

Santa Ana Regional Water Quality Control Board

September 5, 2012

Mr. Ami Giga, Owner
Chino Automotive Service
13688 Central Avenue
Chino, CA 91710

SUBJECT: CASE CLOSURE AND WELL DESTRUCTION APPROVAL
CHINO AUTOMOTIVE SERVICE
13688 CENTRAL AVENUE, CHINO, CALIFORNIA
LUSTIS CASE NO. 083601060T

DRAFT

Dear Mr. Giga:

On August 1, 2012, we sent a notification of proposed site closure and a copy of the draft *Case Closure Summary* to you and other interested parties. No comments were received during the 30-day review process. This letter confirms the completion of the site investigation and remedial action for the former underground storage tanks (USTs) and former dispenser pumps of the subject site.

Based upon the available information, including current land use, and with the provision that the information provided to this agency was accurate and representative of site conditions, no further action related to the former USTs and dispenser pumps are required.

This notice is issued pursuant to a regulation contained in Title 23, California Code of Regulations, Division 3, Chapter 16, Section 2721(e).

Once the soil vapor extraction well is properly abandoned, a report regarding the well abandonment activities must be submitted to this office. Please submit this report no later than **October 5, 2012**.

If you should have any questions, please contact Kenneth R. Williams or Tom Mbeke-Ekanem at (951) 782-4496 or 320-2007, respectively.

Sincerely,

Kurt V. Berchtold
Executive Officer

Enclosure: *Case Closure Summary*

COMMENTS REGARDING INVESTIGATION AND REMEDIATION

In April 1989, three USTs and associated piping were removed from the site. The USTs were: one 2,000-gallon UST containing gasoline, one 2,000-gallon UST containing diesel and one 1000-gallon UST containing waste-oil. Laboratory analytical results of the soil samples collected during the tank removal activities showed that the highest TPHg concentration was detected near the former UST, at 5,010 mg/kg, collected from boring B6 at 25 feet bgs, while benzene concentration was detected at 101 ug/kg.

In July 1995, preliminary investigations were conducted by Alta Enviro-Management to the depths of approximately 38 to 45 feet bgs. A report of the investigation included analytical results from soil and groundwater samples, indicating high petroleum hydrocarbon concentrations beneath the site. Groundwater was encountered at approximately 42 feet bgs. Concentrations up to 37,000 mg/kg were detected for TPHg from boring B15 at 18 feet bgs.

Between August 1996 and September 1998, eight groundwater monitoring wells (MW1 through MW8) were installed, both on-site and off-site. Significant TPHg concentrations were detected in on-site wells located within the vicinity of the former dispenser island. TPHg concentrations were measured at 26,600 mg/kg in the soil sample collected from boring MW1 and at 5,760 mg/kg in the soil sample collected from boring MW3. The groundwater monitoring results of the First Quarter 1998 indicated concentrations of TPHg, benzene, toluene, ethyl benzene, and xylenes (BTEX) of 123,800 ug/L, 8,000 ug/L, 18,600 ug/L, 2,120 ug/L, and 12,600 ug/L, respectively, from monitoring well MW-1. An MTBE concentration of 303 ug/L was detected from monitoring well MW-5.

In July 1999, oxygen releasing compound (ORC) slurry was injected and ORC socks installed in selected wells. Results of the groundwater monitoring in September 1999 and March 2000 indicated that the TPHg and BTEX concentrations were in a decreasing trend in downgradient wells MW5 and MW6. In April 2001, two groundwater monitoring wells (MW9 and MW10) were installed south of the site to evaluate the downgradient extent of the impacted groundwater. And in July 2001, four additional groundwater monitoring wells (MW11 through MW14) were installed.

DRAFT

In August 2001, a 96-hour high vacuum dual phase extraction (HVDPE) pilot test was conducted. Short-term extraction tests were completed from individual wells MW1, MW3, MW12, and MW14. A stable long-term test was subsequently completed using well MW14, with intermittent extraction from wells MW11, MW12, and MW13. An estimated 2,709 pounds (433 gallons) of gasoline were extracted during the HVDPE pilot test. In addition, 5,500 gallons of groundwater were extracted and treated.

In 2002, two additional soil borings (MW15 and MW16) within the former dispenser island area were completed as groundwater monitoring wells to assist in the dual phase extraction. In April 2003, twelve soil borings were advanced. Three borings (MW17, MW18 and MW19) were completed as groundwater monitoring wells, while the remaining nine (VW1 through VW9) were completed as dual-phase extraction wells. The three groundwater monitoring wells were located onsite along the east and west perimeter of the plume, and the nine extraction wells were located within the impacted area.

Borings MW17 and MW18 were drilled to 55 feet bgs and installed as groundwater wells, screened from 30 to 55 feet and 28 to 53 feet bgs, respectively. Boring MW19 was drilled to 60 feet bgs and completed as an up-gradient groundwater monitoring well with a screen interval from 30 to 60 feet bgs. Borings VW1 and VW2 were continuously cored to 40 feet bgs and completed as vadose wells; and respectively screened from 10 to 40 feet and from 12 to 23 feet bgs. Vadose wells VW4 through VW9 were also drilled to 40 feet bgs and were screened with 10- to 30-foot screen lengths at different depths depending on soil lithologies and contaminant concentrations.

The April 2003 soil results revealed contamination in VW-1, the area immediately north of the former USTs and in the vicinity of borings VW2 and VW6. Soil contamination was detected in all but two borings (MW18 and MW19), which were non-detect. The highest contamination was detected in the samples collected from boring VW1 at 15 feet bgs. Maximum TPH-g, BTEX, and MTBE were detected at 17,000 ppm, 30 ppm, 420 ppm, 160 ppm, 850 ppm, and 0.50 ppm, respectively. The lateral extent of the soil contamination was not fully defined during this investigation.

In January 2004, two vadose wells (VW10 and VW14), two nested groundwater sparge/vadose wells (MW22/VW11 and MW23/VW12), and one nested groundwater/vapor extraction well (MW21/VW13) were completed. All wells were installed to aid in vapor extraction and HVDPE remediation at the site. Elevated TPHg concentrations were detected in the vicinity of the former dispenser island at 9,800 mg/kg in the soil collected from boring VW14 at 15 feet bgs, while 3,800 mg/kg was detected in a soil sample collected from boring MW22/VW11 at 25 feet bgs. The maximum benzene concentration was detected at 20 mg/kg in the soil sample collected from boring VW1 at 31 feet bgs.

It was estimated that 38,000 lbs (6,050 gallons) of fuel hydrocarbons as gasoline were released at the subject site. One of the subcontractors, Calclean, Inc., had estimated that from the initiation of the HVDPE system in August 2001 to the last remediation in December 2004, approximately 26,803 pounds of hydrocarbons had been removed as vapor and 350,721 gallons of petroleum impacted groundwater had been extracted from the site. Groundwater from all wells was sampled and analyzed regularly until the end of 2004, when the monitoring frequency was reduced in some wells.

In July 2008, the lead status for regulatory oversight was transferred from the San Bernardino Fire Department to the Regional Water Quality Control Board. In May 2010, a site closure request was submitted. The responsible party decided to request site closure since Regional Board staff opted for groundwater monitoring rather than active remediation. However, this request was denied because hydrocarbon contaminants were observed to be present in the groundwater at elevated levels. The groundwater monitoring results of the First Quarter 2010 indicated concentrations of TPHg, benzene, and TBA of 20,800 ug/L, 285 ug/L, and 483 ug/L, respectively, from monitoring well MW-15. By the Third Quarter 2010, similar concentrations of 9,150 ug/L, 641 ug/L, and 256 ug/L, were detected for TPHg, benzene, and TBA, respectively, from monitoring well MW-1.

DRAFT

III. Release and Site Characterization Information

Although concentrations of contaminants in most groundwater monitoring wells had been reduced considerably, the continued presence of impacted groundwater in monitoring well MW-1 and MW-15 did not meet the criteria for low risk closure as required in the Santa Ana Region. In view of the amount of money already expended on the site, Regional Board staff recommended ongoing groundwater monitoring to document that the site's contaminants were undergoing natural attenuation. Moreover, a file review revealed a continuous decreasing trend in the hydrocarbon concentrations, which were not low enough for low risk closure and not high enough for active remediation.

In deciding against active remediation, we took into account that there are no municipal wells in the vicinity of the site. Distance to the nearest municipal supply well, Chino well #7, as reported in the *February 2005 Feasibility and Cost Evaluation for Site Remediation* and *Updated Remedial Action Plan for Corrective Action Report,* showed the well was located approximately 180 feet south-southwest of the site.

The groundwater depth for Chino #7 in January 1998 was 186 feet. This well is currently inactive due to decreased water levels resulting from regional pumping. Municipal well Chino Hills #19 is located approximately 600 feet southeast of the site with a reported depth to groundwater of 266 feet in February 1998, and is pumped less than a total of one month per year. The reason for this low usage is linked to seasonal pumping of other wells in the vicinity that have lowered the groundwater below its pumping level.

Other municipal supply wells in the area are Chino Hills #17, located 0.2 miles west, and Chino Wells #4 and #6, located approximately 0.4 miles northwest of the site. The elevations of the groundwater level in these municipal wells are significantly lower than that of the monitoring wells present at the site. Groundwater well data obtained from the City of Chino indicates that the first major aquifer is between 150 and 260 feet bgs. The depth to groundwater encountered at the Chino Automotive site is approximately 42 feet bgs. Groundwater elevation in the well screened in deeper zone, to 135 feet in depth, was reported to be 563 feet amsl or 57 feet lower in elevation than wells screened in the shallower zone at depths less than 87 feet.

The water level in Chino #7 is reported to fluctuate greatly on a seasonal basis. For example, in March of 1995, the water level was reported to be 190 feet. In August of 1995, the water level was reported to be 260 feet. These fluctuations account for the reason the City is not using the well because the water level has dropped considerably below the designed pumping level.

The First Quarter 2011 report stated that natural attenuation was an ongoing remedial process at the site based on the previous quarterly analyzes. The maximum contaminant concentrations detected in groundwater were 5,050 ug/L, 482 ug/L, and 364 ug/L for TPHg, benzene, and TBA, respectively, from monitoring well MW-1. These values are generally less than those detected during the previous quarters.

During the month of July 2011, another set of confirmation soil borings to determine the suitability of closure were advanced. Five confirmation soil borings were drilled in the areas known for high hydrocarbon concentrations. Laboratory analytical results for soil samples collected from the confirmation borings indicated a considerable decrease in BTEX concentrations. At the same time, there was some increase in concentrations of MTBE and TBA of 1,210 ug/L and 784 ug/L, respectively, in monitoring well MW-3, just as concentrations of MTBE and TBA in MW-1 were decreasing.

Groundwater monitoring analysis conducted on November 29, 2011 in monitoring well MW-3 showed concentrations of MTBE and TBA of 188 ug/L and 172 ug/L, respectively, down from 1210 ug/L and 784 ug/L, respectively, recorded in July 2011. A follow-up analysis conducted in December 2011 showed further decrease in the concentrations of TBA to 121 ug/L, while MTBE increased slightly to 201 ug/L. Continuous monthly monitoring from the month of January through March 2012 was not possible due to a decrease in the groundwater level, as the wells became dry.

DRAFT

III. Release and Site Characterization Information

Case Closure Summary
Site Name: Chino Automotive Service

Date: September 5, 2012
Case #: 083601060T

Results of the investigations indicate that additional investigation and continued groundwater monitoring are not warranted. Based on the information received, it does not appear that the remaining hydrocarbon compounds at this site pose a continuing threat to shallow groundwater. We believe the site conditions have met the criteria for a "low-risk" closure. Therefore, site closure is recommended.

IV. Closure

DOES COMPLETED CORRECTIVE ACTION PROTECT *EXISTING* BENEFICIAL USES PER REGIONAL BOARD BASIN PLAN?				Yes

Breezy Carreno

Project Manager, Due Diligence

EDUCATION

- B.S. – Environmental Science, Conservation Biology, University of California, Los Angeles

SUMMARY OF PROFESSIONAL EXPERIENCE

Ms. Carreno provides expertise in environmental project management, consulting, and due diligence services to ensure ASTM compliance and satisfaction of client requirements for Phase I Environmental Site Assessments, Environmental Transaction Screens, Regulatory Database and Historical Records Reviews for large- and small-scale industrial, commercial, multi-tenant residential, and rural properties.

PROJECT EXPERIENCE

Project experience for Ms. Carreno includes:

- Phase I Environmental Site Assessments (PHI ESAs)
- Limited Environmental Site Assessments (LESAs)
- Environmental Transaction Screens (ETSs)
- Records Research with Risk Assessments (RSRAs)
- Regulatory Database Reviews
- Historical Records Reviews

As a Due Diligence Project Manager, Ms. Carreno provides project management and technical expertise to ensure ASTM compliance and satisfaction of client requirements in the Southern California areas.

In addition, prior to joining the environmental consulting industry, Ms. Carreno spent four years studying a diverse range of environmental disciplines including: environmental health, wildlife ecology and conservation, environmental statistics, ecology, conservation biology, environmental law and policy, and science communications.

DRAFT

Taylor Strickland
National Client Manager

EDUCATION

- B.S. – Marine Science/Biology Dual Major, Chemistry Minor, University of Miami

CERTIFICATIONS

- OSHA 40-hour Hazardous Waste Operations and OSHA Supervisor Certified

SUMMARY OF PROFESSIONAL EXPERIENCE

Mr. Strickland has worked in environmental consulting, due diligence, and remediation services since 2006. Mr. Strickland's current responsibilities include ensuring ASTM compliance and satisfaction of client requirements, project coordination, and oversight due diligence work in the Rocky Mountain Region. Work functions involve project development and planning, assisting clients, project oversight and technical writing. His experience includes due diligence investigations, soil and groundwater investigations, and remediation.

PROJECT EXPERIENCE

Project experience for Mr. Strickland includes:

- Working with petroleum related investigations including underground storage tank investigations, monitoring and remediation.
- Monitoring and operation of groundwater treatment systems.
- Oversight and installation of remediation systems, monitoring wells, and the associated sampling.
- Operation and Maintenance of multiple types of remediation systems.
- Due diligence work including database reviews, Phase I, and Phase II site investigations.
- Subsurface investigations involving various chemical releases with the soil and groundwater.

Mr. Strickland has been with AEI since 2012 and provides project management to ensure ASTM compliance and satisfaction of client requirements for Phase I Environmental Site Assessments, Environmental Transaction Analyses, Transaction Screens, and Database Reviews. Mr. Strickland's management and technical experience has allowed AEI's projects to be performed in a cost effective and timely manner to the satisfaction of AEI's clients and regulatory agencies.

RON RUSSELL
ASSOCIATE CONSULTANT

EDUCATION

- BS Chemical Engineering, City University of New York (1977)

SUMMARY OF PROFESSIONAL EXPERIENCE

Mr. Russell has experience in Phase I Environmental Site Assessments (ESAs) since 1995 working as a Senior Project Manager with a major geotechnical engineer firm. As a Senior Project Manager, his duties and responsibilities were to provide oversight for Phase I ESAs and project management implementation inclusive of Phase II and remedial actions to achieve clean closure. He has managed several hundred projects. The types of properties for projects included commercial, industrial, refining, chemical processing, and multi-tenant residential.

PROJECT EXPERIENCE

Project experience for Mr. Russell includes:

- **Assessment and remediation, various sites, Exxon Mobil Program, Southern California** – Mr. Russell acted as Senior Project Manager while working for a major geotechnical engineering firm. He conducted and supervised Phase I Environmental Site Assessments and remediation of numerous retail gasoline stations prior to development as strip malls. The Phase I studies were used to identify LUST sites prior to remediation or closure.
- **Assessment and remediation, Miami International Airport, Miami, Florida** – Mr. Russell acted as Senior Project Manager with profit and loss and technical oversight for an assessment and remediation of American Airlines, Terminal C prior to renovation of the baggage handling facility. Some of the issues associated with this project were suspicion of leaked jet fuel below the tarmac at Terminal C. This was confirmed by a Phase I/Phase II Site Assessment. The ensuing remedial action involved installation of subsurface horizontal wells with above ground soil vapor extraction. The site received a clean closure from the fire department and the FAA.
- **Remedial investigation and feasibility study, Redstone Arsenal, Huntsville, Alabama** – Mr. Russell acted as Senior Project Manager responsible for the implementation of technical specifications to safely remove and treat pentaborane utilized by NASA. The primary issue associated with this project was the toxicity and flammability of pentaborane which is lethal at 0.5 ppb. The pentaborane was stored in 100-gallon vessels and distilled yielding elemental boron.

- Due diligence work including database reviews, Phase I, and Phase II site investigations.
- Subsurface investigations involving various chemical releases with the soil and groundwater.

Mr. Strickland has been with AEI since 2012 and provides project management to ensure ASTM compliance and satisfaction of client requirements for Phase I Environmental Site Assessments, Environmental Transaction Analyses, Transaction Screens, and Database Reviews. Mr. Strickland's management and technical experience has allowed AEI's projects to be performed in a cost effective and timely manner to the satisfaction of AEI's clients and regulatory agencies.

APPENDIX I

COMMONLY USED ACRONYMS & ABBREVIATIONS

DRAFT

UNITS

µg/L	Micrograms per Liter	**pCi/L**	PicoCuries per Liter
mg/kg	Milligrams per Kilogram	**ppb**	Parts per Billion
mg/L	Milligrams per Liter	**ppm**	Parts per Million

ABBREVIATIONS AND ACRONYMS

ACM	Asbestos-Containing Material	**NESHAP**	National Emission Standards for Hazardous Air Pollutants
ADJ	Adjacent site	**NFA**	No Further Action
AEI	AEI Consultants	**NFRAP**	No Further Remedial Action Planned
AHERA	Asbestos Hazard Emergency Response Act	**NLR**	No Longer Reporting
APN	Assessor's Parcel Number	**NOV**	Notice of Violation
AST	Aboveground Storage Tank	**NPL**	National Priorities List
AUL	Activity and Use Limitation	**O&M**	Operations and Maintenance
bgs	Below Ground Surface	**OEC**	Other Environmental Considerations
BTEX	Benzene, Toluene, Ethylbenzene, and Xylenes	**OSHA**	Occupational Safety and Health Administration
CERCLA	Comprehensive Environmental Response Compensation and Liability Act	**PCB**	Polychlorinated Biphenyl
CERCLIS	Comprehensive Environmental Response Compensation and Liability Information System	**PCE, PERC**	Perchloroethylene, Tetrachloroethylene, Tetrachloroethene
CESQGs	Conditionally Exempt Small Quantity Generators	**RCRA**	Resource Conservation and Recovery Act
COC	Contaminant of Concern	**REC**	Recognized Environmental Condition
CREC	Controlled Recognized Environmental Condition	**RP**	Responsible Party
EC	Engineering Controls	**SDS**	Safety Data Sheet
EDR	Environmental Data Resources, Inc.	**SEMS**	Superfund Enterprise Management System
EPA	Environmental Protection Agency	**SF**	Square Footage/Square Feet
ERIS	Environmental Risk Information Services	**SP**	Subject Property
ERNS	Emergency Response Notification System	**SQG**	Small Quantity Generator
ESA	Environmental Site Assessment	**SWLF**	Solid Waste Landfill
GPR	Ground-Penetrating Radar	**SVOC**	Semi-Volatile Organic Compound
HREC	Historical Recognized Environmental Condition	**TCE**	Trichloroethylene, Trichloroethene
HVAC	Heating, Ventilation and Air Conditioning	**TPH**	Total Petroleum Hydrocarbons
HWS	Hazardous Waste Site	**TPHd**	Total Petroleum Hydrocarbons (diesel range)
IC	Institutional Controls	**TPHg**	Total Petroleum Hydrocarbons (gasoline range)
LBP	Lead-Based Paint	**TPHo**	Total Petroleum Hydrocarbons (oil range)
LCP	Lead-Containing Paint	**TRPH**	Total Recoverable Petroleum Hydrocarbons
LLP	Landowner Liability Protection	**TSDF**	Treatment, Storage, and Disposal Facility
LQG	Large Quantity Generator	**USDA**	United States Department of Agriculture
LUST	Leaking Underground Storage Tank	**USGS**	United States Geological Survey
MCL	Maximum Contaminant Level	**UST**	Underground Storage Tank
MTBE	Methyl Tertiary Butyl Ether	**VCP**	Voluntary Cleanup Program
ND	None Detected	**VOC**	Volatile Organic Compound
