

# Captain America Paper Plate Shield

## Supplies

- 3 paper plates (you want them to fit inside of each color so, 3 different sizes)
- red acrylic paint and paintbrush
- blue cardstock
- white cardstock star print
- black foam sheet
- hot glue gun
- scissors
- pencil

## Instructions

1. Paint the backside of the largest paper plate and the smallest paper plate red and allow them both to dry.
2. Trace and cut out a circle on the blue cardstock that is just large enough to fit on top of the smallest paper plate.
3. Print the star on white card stock and cut out.
4. Paint the backside of the largest and smallest paper plate. Take the black foam sheet cut out a long strip to make handles. This is going to be the handle you glue onto the paper plate to hold your shield.
5. After all is dry, assemble the shield by hot gluing the plates onto each other then add the blue circle and star.
6. Flip the shield over and glue the black foam piece onto the backside of the plate. Allow to dry.
