

# Marbled Shaving Cream Earth

## Supplies

shaving cream  
liquid watercolors (or food coloring)  
baking sheet  
chopstick or stir stick (for swirling)  
white cardboard (or paper plate, white card stock, etc.)

## Instructions

1. Cut out the paper Earth traced on a plate or the printed circle on the cardstock.
2. Squirt shaving cream all over the baking sheet.
3. With an icing spreader or spatula, smooth out the shaving cream.
4. Drip the liquid watercolors generously all over the shaving cream.
5. Use a chopstick or a stir-stick and swirl the watercolors all through the shaving cream. Cover up as much of the white as possible for this project.
6. Once the shaving cream is swirled, lay the paper Earth on the surface and gently press it into the foam to ensure the colors transfer well.
