

Paper Plate Avenger Masks

Supplies

- white paper plates
- scissors
- paint
- hole punch and stapler
- paint and paintbrushes
- Sharpies
- string

Instructions

1. Cut two slits in the top of the paper plate. Then, cut out two eye holes (make sure the child can see through them).
2. Cut out the rest of the mask's shape.
3. Once mask is cut out, staple the top portion as shown below. This way the mask will fit the child's face better and look more 3-dimensional.
4. Use a Sharpie to add details or just start painting.
5. Once dry, punch out a hole on either side. String and tie on elastic cord and you're done!
